Introduction

These scenarios allow you to use the rules of *Atlantic Chase* to play with an imaginary opponent. You take either the British role or the German, as indicated by the scenario's instructions, and strive to fulfill the objectives of the situation. The opponent will make their moves when they have Initiative. In most cases, a scenario is neither "won" nor "lost." Instead, when it concludes, a table of Outcomes is read to complete the scenario's narrative, relating what transpired to the larger context of the ongoing war (called a "Debriefing Table"). Locate your result in the rows of that table; the higher the row the more successful the outcome.

Solitaire Terminology

Scenario instructions will often invoke a term or phrase in **red**, such as "**nearest** TF" (nearest Task Force). These phrases facilitate judgment calls during play (just keep in mind that you will have to make judgment calls while playing solitaire). They allow the imaginary opponent to make reasonable moves. In some cases the phrase "**if possible**" appears: that means you should adhere to the instructions as best you can but may violate them if necessary (but do so as little as possible).

AVOID INTEL TRIGGER

Do not place a Trajectory segment in a hex that would require an Intel marker to be attached to it, such as a hex with an enemy port or air base, or a TF Station. In some cases, you are to avoid enemy air bases and ports, but not enemy TF Stations.

BRING TO BATTLE (Bring on Battle)

The selected TF must perform actions most likely to trigger a Battle. This might only require an Engage action. A Trajectory action may be performed first (use the most direct route while avoiding enemy air bases and ports, and avoid enemy Air Support range if possible).

Undamaged: The selected TF may not have a Damaged ship, and it may not have a Convoy.

Coordination: If the imaginary player has another TF or stealth force in the target hex, it uses Coordination.

Air Support: If the imaginary player has an air base or TF with a CV in range, it uses Air Support. Good Weather only.

If the target TF is not a Station: The selected TF must perform a Signals action, or if no Intel marker, a Naval Search, instead of an Engage action (and a Trajectory action **first**, if not already in the target hex; avoid Intel triggers if possible). If you do not gain the Initiative after the Signals or Naval Search action, roll again on the Action Table to determine what the imaginary player will do next. *This means that the imaginary opponent, after the Naval Search or Signals action, may 'change their mind' and no longer attempt to bring your TF to battle.*

DIRECT (FARTHEST, NEAREST, LONGEST, SHORTEST)

Measure "directness," or distance, in Trajectory segments. Fewer segments is more direct (or shorter) than more segments (for example, two segments is more direct than three segments). If also required to avoid Intel triggers, make the Trajectory as direct as possible while avoiding Intel triggers (**avoiding the triggers takes precedence**).

Reminder: A Station has zero segments (it is shortest).

IN

A TF is "in" a hex if it has its Station or one of its Trajectory segments in the hex. "In" is also "nearest."

UNIDENTIFIED

In some cases, the imaginary player will operate with an empty TF. That is, it won't have ships in its TF (they have yet to be identified). Unless instructed otherwise, the TF remains empty but operates normally. An unidentified TF's speed is **very slow**.

Identifying a TF: When an unidentified TF incurs a result that affects one or more of its ships (for example, they must be transferred to the Battle Board), the TF must be identified. Roll a die and refer to the scenario's British or German **Identify TF Table**. It will tell you the number and types of ships it contains. When the ships of an unidentified TF must be transferred to the Battle Board, immediately identify the TF. In the case of an Air Strike or Stealth Attack, a Hit of any kind requires the target TF to be identified, but a "***miss***" does not. *Remember, until identified, the TF is very slow. In an Air Strike, for example, you may not know for sure if a ship is actually affected by a*  *result until after identification. Also, a Skirmish*  *result could reveal Fast ships (the Limited Battle still happens), and Fast ships can be surprised.*

Note: If an identified TF loses all its ships and becomes empty, remove it. It does not become unidentified.

© 2022 GMT Games, LLC

Terminology examples

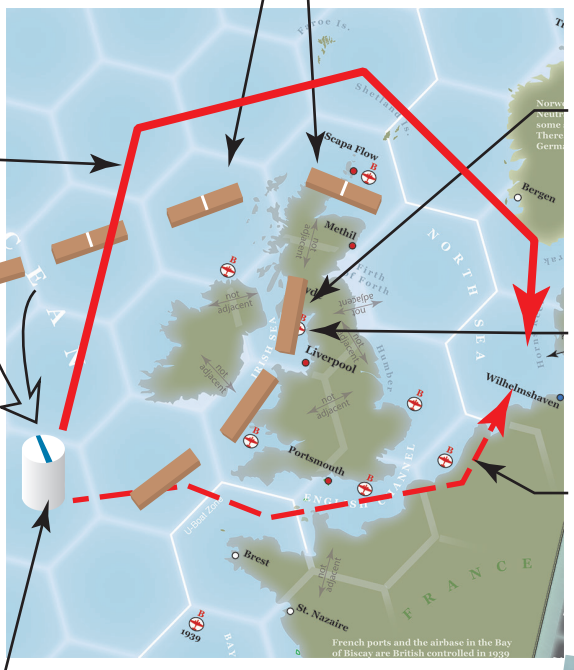

LONGEST This British TF is the longest.

IN This British TF is "in" Scapa Flow's hex. It is also NEAREST to Scapa Flow.

AVOID INTEL TRIGGER
For the German TF, this route is the most direct to Wilhelmshaven while also avoiding Intel triggers (enemy ports, Stations, and air bases).

FARTHEST
For this British TF, this end of the Trajectory is farthest from Scapa Flow.

BRING TO BATTLE
For this British TF, to bring the German TF to Battle, it would need to perform a Trajectory action (adding two segments and triggering Intel attachment in the station's hex), and then an Engage action (after Interruption).

NEAREST
This British TF is nearest the German TF, and to Clyde. And this hex is nearest to that port (the TF is 'in' that port hex).

SHORTEST
This TF is the shortest British Trajectory.

DIRECT
For the German TF, this route is the most direct to Wilhelmshaven (but includes Intel triggers).

UNIDENTIFIED
If the German TF is not identified, it has no ships in its box on the Task Force Display. Until it has ships, it is **very slow**.

Action Tables

When the imaginary opponent has Initiative, use the scenario's Action Table to determine the action or actions that the imaginary opponent performs. *For example, at the start of scenario BL1 on page 7, with zero British Completion actions, if you roll a 2, the imaginary opponent performs an Air Strike action (the Action Table result is '**A**', but if the Weather is bad the result becomes '**X**').* In some cases, the action to be performed may seem ambiguous. In those cases, use your best judgment, keeping in mind that the enemy strives to foil your objectives. Rely on the guidelines in the **Solitaire Terminology** on p. 1. **Unless noted otherwise, if the imaginary player retains Initiative after the action, roll again on the Action Table.**

In many instances, Action Table Results will only give you partial information regarding the overall situation. For example, an 'X' result in scenario BL2 may give you the impression that the unidentified German TF contains raiders hunting your convoy, and that may indeed be true. However, it may actually be a German merchant ship scurrying home. You won't know for sure until you engage it.

Evasive Maneuvers

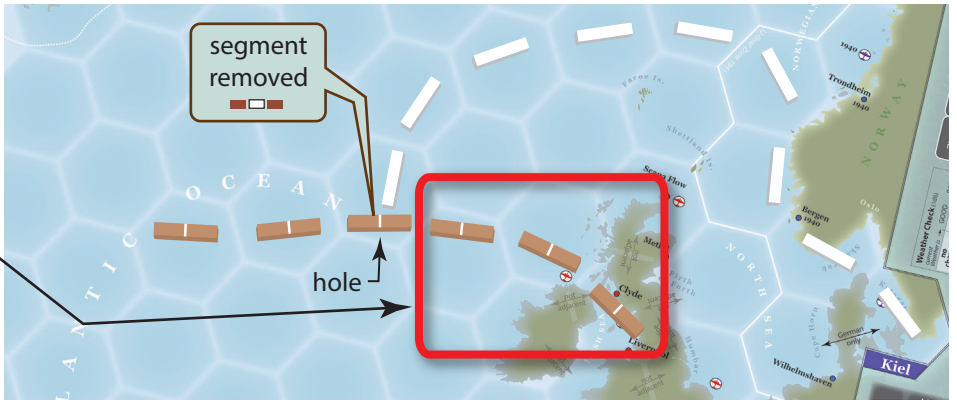

When the imaginary opponent has the choice between attempting to Seize Initiative or take an Evasive Maneuvers marker, make the decision by rolling a die: If **1-4**, it attempts to Seize Initiative, and if **5-6** it takes the Evasive Maneuvers marker (attach it to a TF with a Convoy, or if no Convoy in play, to a TF with a Damaged ship; and if none of those are in play, on any TF). If all TFs already have an Evasive Maneuvers marker (or if no TFs are in play), it attempts to Seize Initiative.

When to use an Evasive Maneuvers Marker? As soon as possible. If the imaginary player has the option to use it, it does so.

© 2022 GMT Games, LLC

Early or Late ▬▭▬ , and Shadow ▬▬

When the imaginary player garners a result on the Naval Search table, such as Early or Late or Shadow, remove Trajectory segments in a manner that is advantageous to the imaginary player. What constitutes "advantageous" is usually obvious, but if it is not, exercise your best judgment. Or, use a die to make a random choice.

Germans are EARLY not Late
In this example, the imaginary player is the Germans, and so, would prefer to remove segments east of the hole.

Battle Behavior

When Battle is triggered and the Battle Board is used, you must operate the imaginary player's ships as well as your own. Do not hesitate to imagine an interesting narrative; making decisions for the sake of drama or caution is equally worthy. Exercise your best judgment while guided by the following tendencies:

Gunnery & Air Strikes
The imaginary player will target a **Convoy** when possible. If no **Convoy**, it will target the most lethal ship (that is, the ship with the largest Gun Value at that range).
Multiple Ships: If the imaginary player has two or more ships that can attack, each will attack a different target, if multiple targets are available. *Let's say there is a **Convoy** and a **BB** as targets, the imaginary player will attack both, if possible.*

Maneuver
British: If the imaginary player is British, undamaged ships will move closer to the enemy. When they have the opportunity, torpedo-capable ships will move into the Close zone. Convoys and Damaged ships move to the Far Zone.
German: If the imaginary player is German, its ships will remain in, or move to, the Far zone, preferring Extreme and Long range battles. However, if they face nothing but a Convoy, they will move closer to the enemy. If they face nothing more lethal than a **DD Squadron**, a Damaged ship, or a **CL**, they will move closer to the enemy. However, if they face a torpedo-capable enemy in the Close zone, German ships will move away from the enemy.

Break Away
British: If the imaginary player is British, it will attempt Break Away if it has a **Convoy** or a Damaged ship, or, if it does not have a **BC** or **BB** and the Germans have a **BC** or **BB**.
German: If the imaginary player is German, it will attempt Break Away if it has a **Convoy**, a **DD Squadron** carrying troops/supplies, or a Damaged ship. If the British have an undamaged **BB** or **BC**, German ships will attempt Break Away (in general, the Kriegsmarine was wary of risking assets).

British & French
Unless stated otherwise, "British" also refers to French ships. "French" only refers to French ships.

© 2022 GMT Games, LLC

‘BL’ Scenarios: Blockade

This first batch of scenarios explores the operations from September 1939 to March 1940. The war has just started and both navies scramble to test the enemy and gain advantage. The British seek to bottle the Kriegsmarine in the North Sea, itching for a decisive battle, one that will render Germany’s modern ships ineffective. It also is charged with disrupting Germany’s merchant shipping to Norway and elsewhere. Conversely, the Kriegsmarine seeks to test the new blockade, hoping to slip lone raiders through to the wide open Atlantic Ocean and beyond.

Convoys

In these scenarios, a Convoy ship marker represents only a few ships (indeed, a German Convoy might only represent a single ship). A German **Convoy** is destroyed if it suffers one Hit, and a British **Convoy** is destroyed when it suffers two Hits (”destroyed” is equivalent to “sunk”; remove the Convoy marker). Neither **Convoy** may disperse. When a **Convoy** is destroyed, remove it from play (if it was the only ship in the Task Force, remove the Task Force from play as well).

Prize Rules

In these scenarios, when a **Convoy’s** TF is brought to battle (Engage action, for example), and there is no other ship in its Task Force, do not fight the Battle (that is, do not transfer ships to the Battle Board). Instead, automatically the **Convoy** is destroyed (actually, it is captured and sent to a German port), and a Contact marker is attached to the active TF just as though it fought the Battle (and it must be rendered a TF Station). If on the Battle Board and the Convoy becomes the only ship in the Task Force, the Battle immediately ends and the Convoy is destroyed (prior to that, a Convoy on the Battle Board may be attacked with Gunnery or Torpedo attacks during a Battle Round).

International Incidents

In some scenarios, if a **Convoy** is the target of an Air Strike, an International Incident is sparked. There is no immediate effect of an International Incident, but it may have an effect on the Action Table and on Debriefing.

The Convoy represents potentially neutral merchant ships, and at this stage in the war, both sides adhered to internationally accepted “prize rules.” Should a neutral merchant prove to be a combatant or in commerce with a combatant nation, it could be seized, but the ship had to be boarded first in order to determine its alignment.

Rendezvous Markers

Some of these scenarios require use of RV markers. They represent scheduled locations where two or more ships are ordered to intersect for the purpose of fueling. The ship rendezvoused with is not represented in the game. “Fueling” means the transfer of fuel, but also the shifting from one vessel to another of provisions, ammunition, sick and wounded, and prisoners. It also implies the transfer of information, the latest news and rumors of war in a radio-silent landscape.

”The destruction of the Graf Spee *in the action off the Plate in December, 1939, had brought to an abrupt end the first German campaign against our shipping in the wide oceans....Admiral Raeder, whose ideas on the conduct of the German war at sea were technically sound, had some difficulty in carrying his views in the Fuehrer’s councils. He had even at one time to resist a proposal made by the Army to disarm all his heavy ships and use their guns for long-range batteries on shore.”*

- *Winston Churchill,* Their Finest Hour, *1949.*

© 2022 GMT Games, LLC

BL1: Raiders of the North Atlantic

German player

September, 1939. Grand Admiral Raeder intends to interfere with British merchant traffic in the Atlantic. Before war was declared, ships were already sent beyond the North Sea to take up position (RV markers), and now he has ordered raiders to slip through the developing blockade to harass Britain's supply lines.

Objective

Score Hits on British Convoys. Under no circumstances, however, are you to lose a German vessel. Your ships may Complete in Wilhelmshaven, Kiel, or Murmansk (see the **Murmansk?** table on p.8). Rendezvous may change your objective.

Set-Up

Weather: Good
Initiative: German (the player)
Map: Operations Map (game board)
Enemy: British and French TFs start as indicated.
RV markers: Place 3 Rendezvous markers as shown below.

Rendezvous Markers

These markers have no effect on play except when a German TF Station is in a hex with one of them. When you have Initiative, and a German TF is in a hex with a marker, make a Fueling Check (roll a die and apply the result on the Fueling Table, p. 6).

The End

The scenario ends when there are two or fewer Rendezvous markers remaining and the Germans have no Task Forces in play. It may also end as a result of the British Action Table.

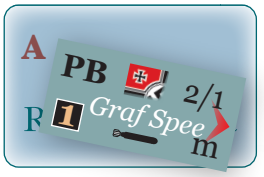

B-Dienst

When the Germans have Initiative, you may attach an Intel marker to a British Trajectory segment. You may do this at any time, but only once during the scenario.

INTEL

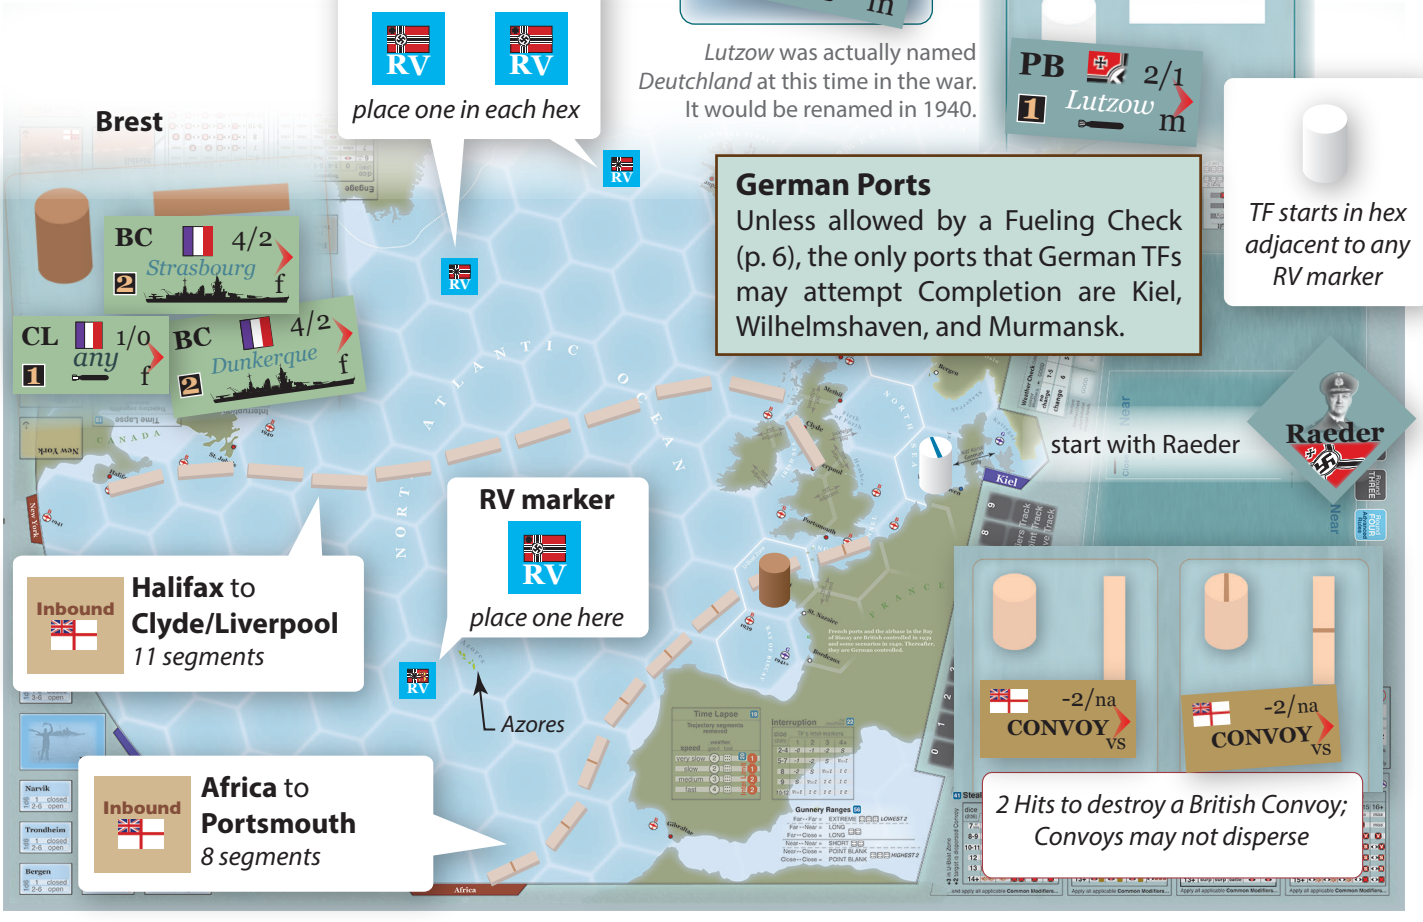

Reinforcement

The *Graf Spee* starts in Reinforcement Group A in Kiel

Lutzow was actually named *Deutchland* at this time in the war. It would be renamed in 1940.

© 2022 GMT Games, LLC

Fueling Check

When you have Initiative, if a German TF is in the same hex as a Rendezvous marker and the TF is a Station, you must roll a die and apply the result on the Fueling Table (on this page). Unless noted otherwise by the Fueling Table result, you maintain Initiative after the check. When asked to remove the RV marker, remove the one that triggered the Fueling Check.

Clarification: A Fueling Check can't happen during a Pass action's Time Lapse.

Legend of Fueling Table Results:

a. 

Remove the RV marker. Remove (repair) one Hit from one German ship in the TF (if it has one).

New Objective: Proceed to South America. Henceforth in this scenario, the only German port this TF may attempt Completion is South America. The TF is not permitted to perform Reorganize actions (Split or Merge), and it may not perform another Fueling Check. *The ship has been ordered to steam south and raid British shipping in the South Atlantic and possibly the Indian Ocean.*

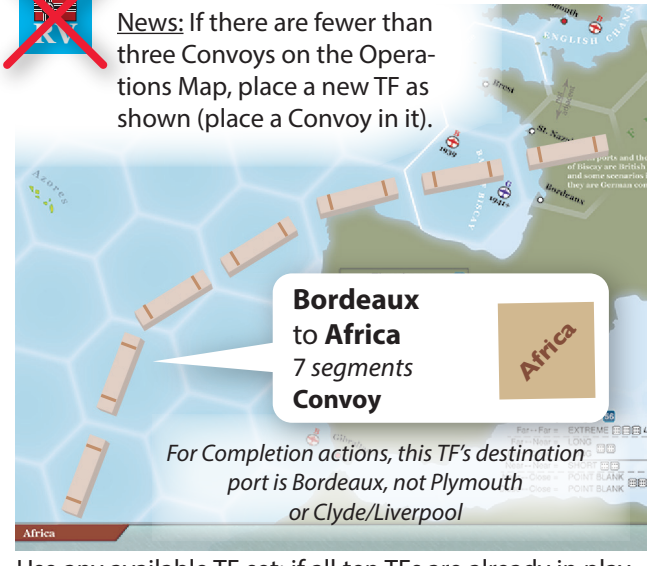

British TF in hex? If a British TF is **in** the hex, an airplane is spotted. Attach a Contact marker to the German TF. If it already has one, place a British Airbase marker in the hex. If the hex has the Arctic Line in it, place the air base marker in the nearest non-Arctic Line hex.

b. 

Remove the RV marker.
News: If there are fewer than three Convoys on the Operations Map, place a new TF as shown (place a Convoy in it).

Use any available TF set; if all ten TFs are already in play, do not add this new TF.

c. Shift the RV marker to an adjacent hex (your choice). Then, V for I

British TF in hex? If a British TF is **in** the hex with your TF, instead of Vieing for Initiative, IC

move 1 hex

Fueling Table

no modifiers

	1d6 →	1	2	3	4	5	6
Good	W	a.	a.	b.	c.	d.	e.
Bad	W BAD	a.	c.	e.	f.	f.	g.

A Fueling Check represents the TF rendezvousing with another ship or U-Boat at a pre-arranged location and time. Fuel, ammunition, provisions, perhaps prisoners are transferred. Information may also be exchanged, including intelligence or orders.

d. 

Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

New Objective: The only actions this TF is permitted is Trajectory, Completion, and Pass. You may not attach an Evasive Maneuvers marker to this TF. *The ship has developed severe mechanical problems. If there is another ship in the TF, it now serves as escort (Split/Reorganize action is not allowed).*

British TF in hex? If a British TF is **in** the hex, V for I

e. 

Good Weather

Remove the RV marker. If Good Weather, also remove an Evasive Maneuvers marker from the German TF (if it has one).

f. 

Remove the RV marker. There is no other effect.

g. Shift the RV marker to an adjacent hex (your choice).
British TF in hex? If a British TF is **in** the hex with your TF, V for I

move 1 hex

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of successful British Completion actions and/or destroyed Convoys (count only Completion actions involving TFs with Convoys).

British Action Table

Number of successful British Convoy Completion actions and/or destroyed Convoys	1d6 → 1	2	3	4	5	6
0	A	A	B	B	C	C
1	A	A	X	convoy	C	C
2+	F	A	A	X	convoy	C

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: If the Weather is Bad, treat as an '**X**' result if there is a British TF in play with a **CA** in it (the TF with a **CA** is the selected TF). If no **CA** in play, treat as a '**B**' Action Table result.

Good Weather: If the Weather is Good, perform an Air Strike targeting a German TF in range of a British or French airbase (select the target that will give the British the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike, select a British TF with a **CA** in it, or if no **CA**s in play, an **unidentified** TF. If more than one candidate to choose, select the TF **nearest** a German TF. If none in play, create a new **unidentified** TF in Portsmouth. In any case, the selected TF performs a Trajectory action to the **nearest** German TF, then a Naval Search action (if the German TF is a Station, it performs an Engage action instead).

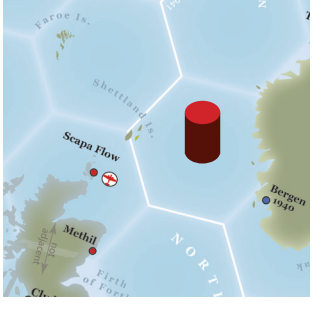

4+ CAs? If there are four or more British **CA**s in play, and there is no target for an Air Strike, treat this as BOTH an '**A**' and an '**F**' result. The French TF will be the Active TF and the British TF the Coordinating TF.

Time Lapse: Remove segments **farthest** from the German TF.

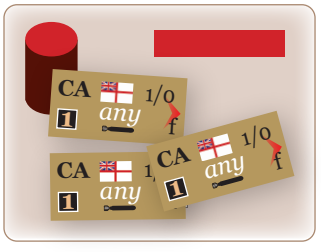

B

BLOCKADE

Create a new British TF. Place three **CA**s in it. Place the TF Station in the hex shown here. Then roll again on the Action Table.

If this is the second (or subsequent) time this result has been garnered on the Action Table, and a British TF Station is in the hex shown here, ignore this result and treat as an '**X**' British Action Table result.

C

COMPLETION ACTION

Remove **Damaged** British ships. If this empties a TF, remove it. Then select a British TF.

Selection: Select a British TF with a **Convoy** (if more than one, select the **shortest** Trajectory). If no Convoy in play, treat as a '**Convoy**' British Action Table result instead.

Action: Selected TF attempts to Complete in Clyde/Liverpool or Portsmouth, whichever is closer. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers**, if possible). If prevented from performing Completion due to Intel markers or Trajectory length, the British Pass instead, after the Trajectory action (if any).

Time Lapse: Remove the selected TF's segments **farthest** from the destination port.

After successful Completion action: IC

convoy

CONVOY

Remove **Damaged** British ships. If this empties a TF, remove it.

Completion? If there is a British TF with a **Convoy** in play, roll a die and apply the result:

1-2	treat as an '**A**' British Action Table result
3-5	treat as a '**C**' British Action Table result
6	treat as an '**F**' British Action Table result

No Convoy? If there is no TF with a Convoy already in play, create a new TF and place a **Convoy** in it. Also place a **CL** in it (choose any). Then, roll a die to determine where to place the new TF:

EVEN	Africa
ODD	Halifax

Then, the new TF performs a Trajectory action to Portsmouth or Clyde/Liverpool, whichever is closer. Then, IC

© 2022 GMT Games, LLC

F

FRENCH ACTION

End? If three British Convoys have successfully Completed, **Fuel Limits** are now in effect (see p.8).

Select TF: The French TF is selected.

Action: The French TF performs actions intended to **Bring to Battle** the German TF **nearest** a British **Convoy**. Choose a target hex **nearest** the Convoy. If no Convoy is in play, create a new TF in Gibraltar (place the Station in the port box and place a Convoy in the TF's box on the Task Force Display). If no German TF can be targeted, treat as a '**C**' British Action Table result instead.

Time Lapse: Remove segments **farthest** from the target hex.

X

DECISIVE ACTION

End? If two British Convoys have successfully Completed, **Fuel Limits** are now in effect (see p.8).

Select TF: Select a British TF with a **BC** in it (not French BCs). If none in play, select an **unidentified** TF, and if none in play, create an **unidentified** TF in Scapa Flow or Gibraltar, whichever is **nearest** a German TF.

Action: The selected TF performs actions intended to **Bring to Battle** the **nearest** German TF. If no German TF can be targeted for a Naval Search or Engage action,treat as a '**C**' British Action Table result instead.

Time Lapse: Remove segments **farthest** from the target hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the BL1 Debriefing Table for the outcome.

Mission objectives...

Destroyed British Convoys?	VP
none	**-1**
1	3
2+	6

Each Completed British Convoy
-2

Each German ship?	VP
sunk	**-5**
damaged	-3

One or more German TFs Completed in South America?
3

British casualties...

Each British BC, CA & CL suffered:	VP
no Hits	**0**
Damaged (including removed ships)	1
Sunk	2

Identify British TF

no modifiers

1d6 →	1-2	3	4	5	6
	BC CA CL	**BC CA**	**CA CA**	**CA CL**	**DD**

DD is destroyed when it suffers 2 Hits

Murmansk?

Before Debriefing, if a German TF Completed in Murmansk, roll a die and apply the result:

1d6 ↓	result
0 or less	The German ships are confiscated by the Soviet Union. You lose 3 VP.
1-2	This sparks an international incident. You lose 1 VP.
3-6	The ships quietly refuel and make their way safely to Kiel.

Modifier: **-1** if 2 or more **Convoys** are destroyed

Fuel Limits

When invoked by the British Action Table, the only actions you (the Germans) are permitted are **Completion**, **Pass**, and **Trajectory**.

BL1 Debriefing Table

VP	OUTCOME
6 +	***Raiders Triumphant!*** Grossadmiral Raeder is pleased with the reports. Thus far, the British are unable to contend with his raiders. He has permission to sortie more into the Atlantic.
3-5	***Success.*** Grossadmiral Raeder is pleased with the reports, but if a German ship was Damaged or sunk, he has no choice but to curtail more sorties. He can't afford losses.
1-2	***Encouraging.*** Raeder is encouraged by the reports, but if a German ship fought a Battle with anything but a Convoy, he is admonished by the Führer. However, if a British ship was sunk (not a Convoy), increase this Outcome one row (to "Success").
0 to -2	***What went wrong?*** No more German ships will be released for raids in the Atlantic. If a German PB was sunk, Raeder's days are numbered.
-3 or less	***Failure!*** Grossadmiral Raeder is relieved of command.

© 2022 GMT Games, LLC

BL2: Contain and Destroy

British player

September, 1939. After twenty years of peace, war is upon the sea once again. Admiralty is committed to bottling the Kriegsmarine in the North Sea. Britain's merchant shipping is scattered, vulnerable to attack, but German merchant ships are also vulnerable.

Objective

Score Hits on German Convoys. Protect British Convoys. Sink Germain raiders. Do not spark an international incident.

Set-Up

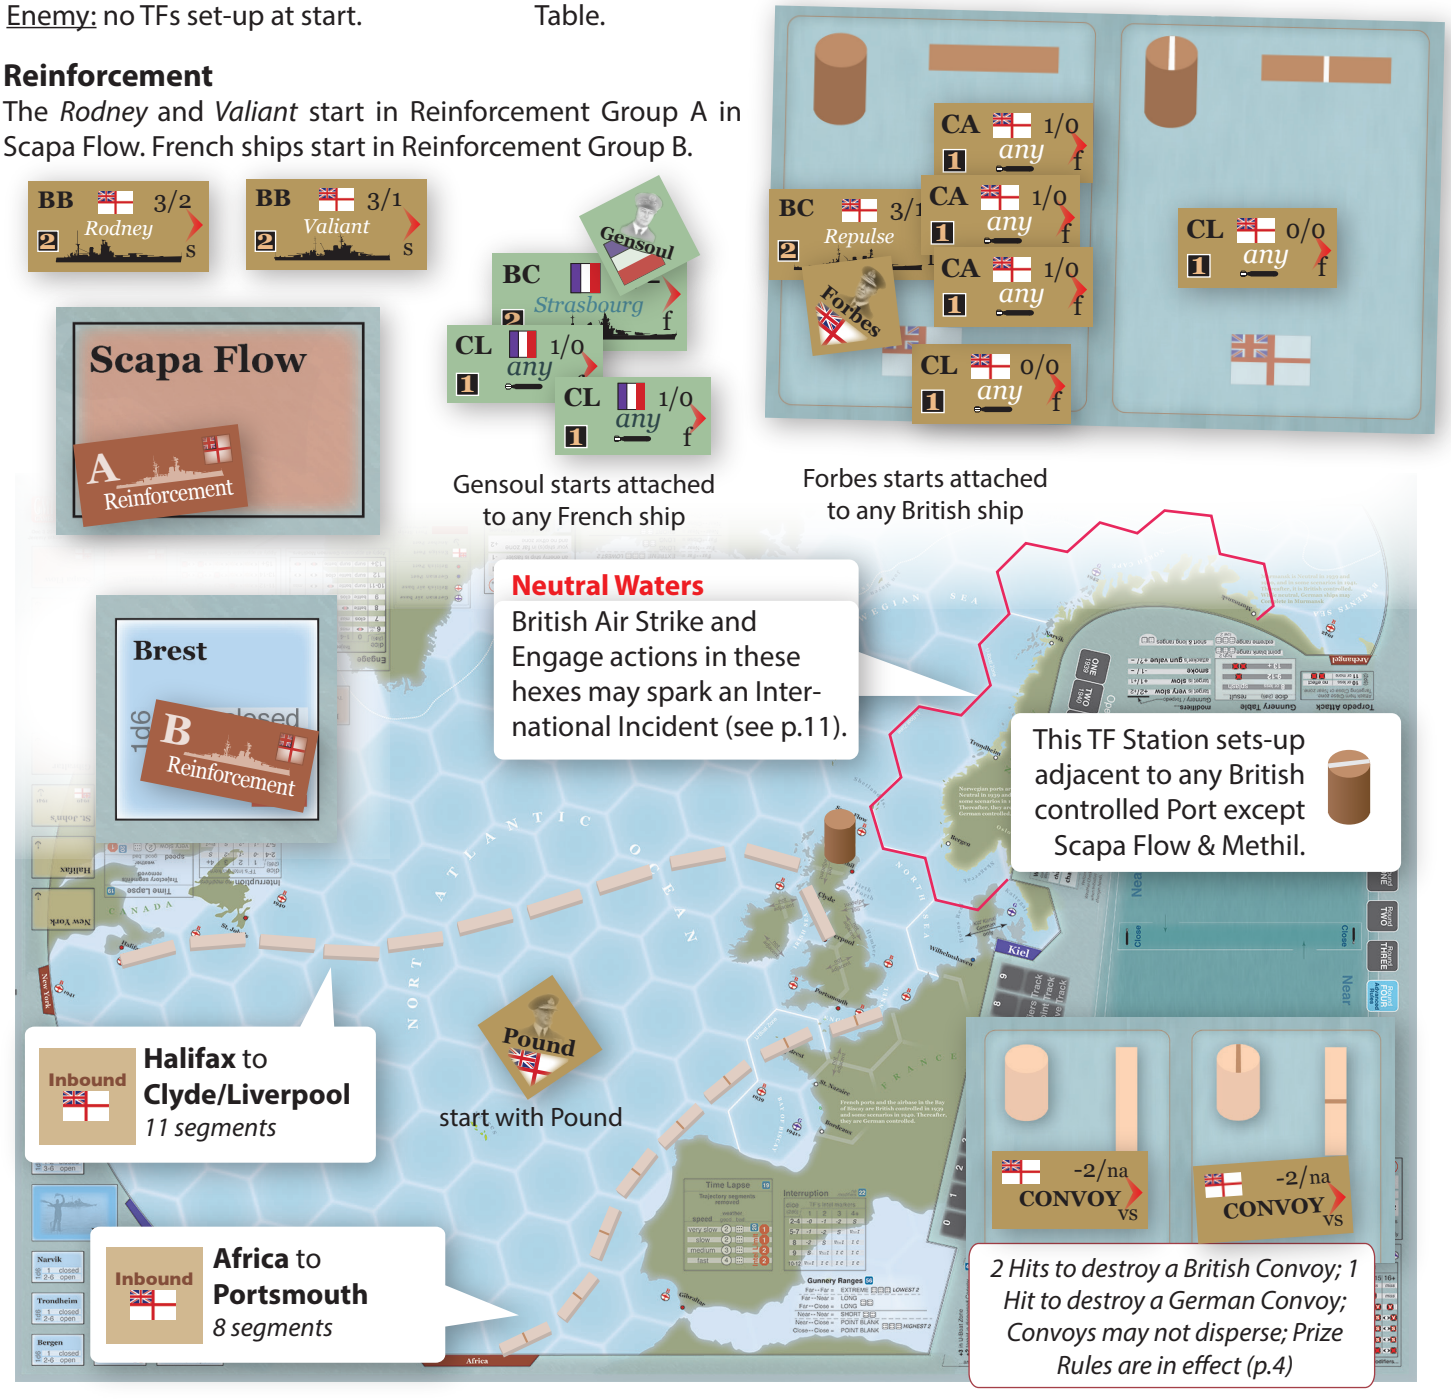

Weather: Good
Initiative: British (the player)
Map: Operations Map (game board)
Enemy: no TFs set-up at start.

The End

The scenario ends when two Convoys have Completed (British and/or German). It also ends when 4 ships are sunk (a destroyed Convoy counts as a 'ship' for this purpose). It may also end as a result of the German Action Table.

Reinforcement

The *Rodney* and *Valiant* start in Reinforcement Group A in Scapa Flow. French ships start in Reinforcement Group B.

© 2022 GMT Games, LLC

German Actions

When the Germans have the Initiative, use the German Action Tables to determine their actions. Start by using the "Early" table. Use the "Late" table after a Battle has occurred or a Convoy destroyed, or after an Air Strike action has been performed by either side.

German Action Tables

Early

Number of successful British Completion actions	1d6 → 0-1	2	3	4	5	6
0	A	X	convoy	convoy	T	C
1	A	X	X	X	convoy	C
2+	E	E	A	X	X	C

Late

	1d6 → 0	1	2	3	4	5	6
Good (W)	E	A	A	X	X	C	C
Bad (W BAD)	E	E	T	X	X	C	C

Modifier: **-1** if a German ship in play is Damaged or one was sunk, or a Convoy was destroyed

Legend of Action Table Results:

A

AIR STRIKE

Remove all Damaged German ships. If this empties a TF, remove it. Removed ships count for VP (see. p.11).

Bad Weather: If the Weather is Bad, treat as a '**T**' result.

Good Weather: If the Weather is Good, perform an Air Strike targeting a British TF in range of a German Airbase (select the target that will give the Germans the most favorable Air Support modifier).

No target? If the Weather is Good but there is no target for an Air Strike, roll a die and apply the result:

1-2	Create a new German TF in South America and place a Convoy in it; then, it performs a Trajectory action to the Azores and then to the Faroe Is. (next to Scapa Flow); then roll again on the German Action Table result;
3-6	Treat as an '**X**' German Action Table result.

C

COMPLETION ACTION

Selection: Select a German TF with a **Convoy**. If no Convoy in play, select a TF with a Damaged ship. If none, select the TF with the **shortest** Trajectory.

No German TF: If there are no German TFs in play, treat this as an '**A**' result.

Action: Selected TF attempts to Complete in **Kiel**. If the TF contains an undamaged **PB**, it attempts to Complete in South America instead. The selected TF may need to perform a Trajectory action first (most **direct** route), and will avoid enemy ports and airbases (but not enemy Stations). If trajectory length or Intel attachment prevents Completion, Pass instead.

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: IC

convoy

CONVOY

Selection: Select a German TF with a **Convoy** in it. If none in play, create a new TF in **Narvik** and place a Convoy in it.

Action: Selected TF attempts to Complete in Kiel. The TF may need to perform a Trajectory action in order to do the Completion action (in which case, perform the Trajectory action first (most **direct** route) and then the Completion action. If Completion is prevented by Intel attachment or Trajectory length, the TF performs a Pass action instead.

Time Lapse: Remove segments **farthest** from Kiel.

After successful Completion action: IC

E

END?

Bad Weather: If a German Convoy is in play, that Convoy automatically Completes and the scenario ends. Also, if 2 or more ships (including Convoys) are destroyed, the scenario ends. Otherwise, apply the Good Weather result.

Good Weather: If the Weather is Good and there is no British Convoy in play, the scenario ends. Refer to Debriefing. If a British Convoy is in play, create a new German TF with a **BC** and place the TF in Wilhelmshaven. It attempts to **bring to Battle** the **nearest** British TF with a Convoy. It will avoid British controlled ports and airbases. It will avoid, if possible, Air Strike range.

BC already? If there is a German BC in play already, add a second BC to its TF and treat as an '**X**' German Action Table result with this as the selected TF. If there are two BCs already in the TF, remove one (if one is Damaged, remove it). If the '**E**' German Action Table result is garnered a third or subsequent time and the Weather is Good, treat as an '**X**' German Action Table result.

© 2022 GMT Games, LLC

T

TRAJECTORY ACTION

Select TF: Select an **unidentified** TF. If none in play, create a new **unidentified** TF in **Murmansk**.

Action: The selected TF performs a Trajectory action (**most direct rout while avoiding Intel triggers**; if not enough segments to reach, stretch the Trajectory as far as it will go). Roll a die to determine where:

1d6 ↓	Trajectory's end	next action
1-3	South America	Completion (S. America)
4-5	Kiel	Completion (Kiel)
6	Azores	Pass

After the Trajectory action, apply the "next action" indicated by the table: The selected TF performs either a Completion or Pass action; if Completion is impossible due to trajectory length or Intel attachment, the Germans Pass instead.

Time Lapse: Remove segments **nearest** Murmansk.

International Incident

Each time the British performs an Engage or Air Strike action targeting a TF in Neutral Waters (see p. 9), roll a die and apply the result indicated in the table (do this after resolving the Engage/Battle or Air Strike):

1d6 ↓	result
1	Place German airbase marker in Trondheim.
2-3	**Political Backlash**: Norway is irate (**-2** VP)
4-6	no adverse effect

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the BL2 Debriefing Table for the outcome.

Mission objectives... "Removed" is not "destroyed."

Each British Convoy:	VP
Completed	**2**
destroyed	-5

Each German ship?	VP
sunk	**5**
damaged *includes removed*	1

Each **Political Backlash**
-2 VP

Each German Convoy	VP
Completed	**-2**
destroyed	3

British casualties...

Each British **BC**, **CA** & **CL** suffered:	VP
no Hits	**0**
Damaged	-1
Sunk	-3

X

DECISIVE ACTION

Select TF: Select a German TF with a **BC** in it. If none in play, select a TF that does not have a Convoy in it. If no German TFs qualify, create a new **unidentified** TF in:

roll 1d6 ⟶ **1-4** = Kiel, **5** = Narvik, **6** = S. America

Action: If the selected TF has a **Damaged** ship, treat as a '**C**' German Action Table result instead (with the Damaged ship's TF as the selected TF). If none of its ships are Damaged, the selected TF performs actions intended to **Bring to Battle** a British TF with a **Convoy**. The selected TF will target the **nearest** hex while **avoiding intel triggers** if possible. If no Convoy is in play, treat as an 'E' result instead.

Time Lapse: Remove segments **farthest** from the target hex.

Identify German TF

no modifiers

1d6 ⟶	1-2	3	4	5-6
	PB	**CA**	**AC**	**Convoy**

If the unidentified TF is attempting to **Bring on Battle**, replace '**Convoy**' with a **PB** and a **CA**.

If an AC or two PBs or two CAs are already in play, or were in play, and another is garnered by this table, replace with a **BC**. A maximum of 2 BCs may be in play (if instructed to bring a third into play, replace with a CL).

BL2 Debriefing Table

VP	OUTCOME
9 +	***Britannia Triumphant!*** The First Lord of the Admiralty, Winston Churchill, is ecstatic. He urges the Prime Minister to authorize the mining of Norway's Inner Leads.
4-8	***Success.*** Britain maintains the upper hand on the high seas.
2-3	***Bloody?*** If British Convoy Hits exceed one, this is a discouraging result. If there was Political Backlash, Churchill's scheme to mine Germany's iron ore shipping routes will be shelved.
1 to **-2**	***What went wrong?*** If more German Convoys than British Convoys were destroyed, increase this Outcome one row (to Bloody?). Otherwise, this war has started poorly for Admiralty, and Churchill is keen to replace Admiral Forbes.
-3 or less	***Crisis!*** Admiral Forbes is cashiered as naval assets are stripped from Asia and the Pacific to halt this developing crisis.

© 2022 GMT Games, LLC

BL3: Raiders of the North Sea

German player

February, 1940. Grand Admiral Raeder is keen to interfere with British merchant traffic to and from Norway. He is also keen to engage vulnerable British ships in battle, or lure them under Luftwaffe dominated skies where they can be attacked from the air.

Objective

Hit British Convoys hard, and if the opportunity presents itself, take down a British cruiser, or better yet, a battleship, aircraft carrier, or battlecruiser. Under no circumstances, however, are you to lose a German vessel to the North Sea.

Set-Up

Weather: Bad
Initiative: German (the player)
Map: North Sea Inset Map
Enemy: An unidentified British TF and a British Submarine marker begin in play as indicated by the illustration.

2 Hits to destroy a British Convoy or DD; Convoys may not disperse

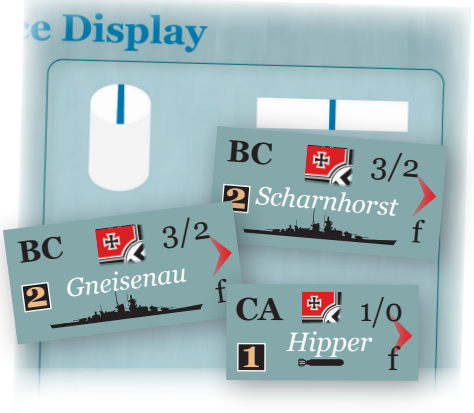

Special Rule: Do not transfer TFs to Port Boxes; TFs must remain on map unless Completed.

start with Marschall (attach to any ship)

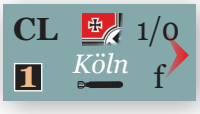

start with Raeder

Reinforcements

Before starting the scenario, place two CLs in Reinforcement Group A. Place the Reinforcement Group marker in either the Wilhelmshaven or Kiel port box.

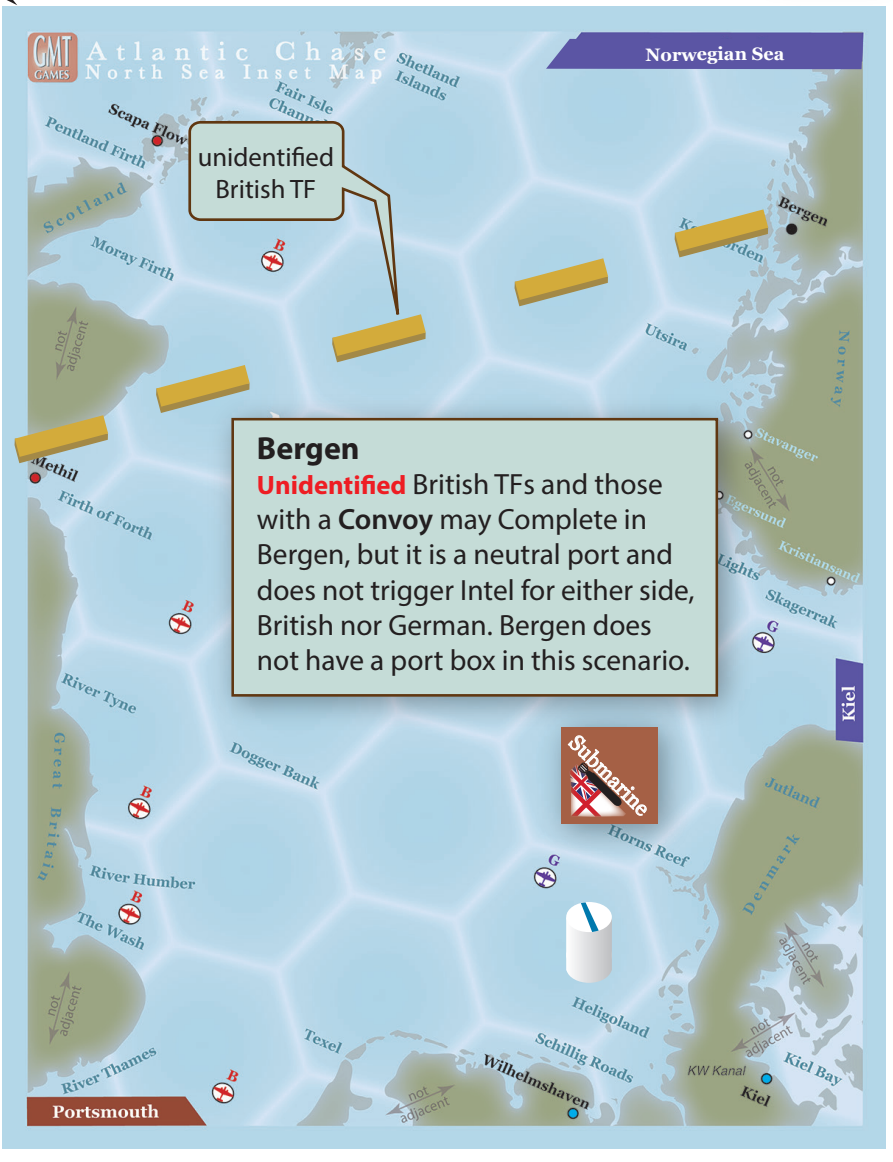

The End

The scenario ends when the Germans have no Task Forces in play, or, when two **Convoys** and/or Unidentified TFs have Completed or been destroyed.

B-Dienst

When the Germans have Initiative, or during set-up, you may attach an Intel marker to a British Trajectory segment. You may do this at any time, but only once during the scenario.

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Tables to determine their actions. Start by using the "Early" table. Use the "Late" table after a Battle has occurred or was triggered (by a Battle, Closing In, or Skirmish result), or after an Air Strike action has been performed by either side (but not a Stealth Attack).

British Action Tables

Early

Number of successful British Completion actions	1d6 → 1	2	3	4	5	6
0	A	A	convoy	convoy	C	C
1	A	A	A	convoy	C	C
2+	E	E	A	convoy	convoy	C

Late

	1d6 → 0	1	2	3	4	5	6
Good (W)	E	E	A	X	C	C	C
Bad (W BAD)	E	E	X	X	X	C	C

Modifier: **-1** a British ship in play is Damaged or was sunk

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: Remove Damaged British ships. Then treat as an '**X**' result if there is a British TF in play with a **CA** in it (it is the selected TF). If no **CA** in play, instead create a TF in Portsmouth with 2 **CA**s. It performs a Trajectory action to Scapa Flow (most direct route). Then, IC

Good Weather: If the Weather is Good, perform an Air Strike targeting a German TF in range of a British air base (select the target that will give the British the most favorable Air Support modifier). If no target is in range, perform a Stealth Recon action targeting the **nearest** German TF (**nearest** to the Submarine force; if the Submarine is not in play, place in the Heligoland hex). If the Submarine is already **in** a hex with a German TF, and that TF is an eligible target, it performs a Stealth Attack instead with a +4 modifier.

Time Lapse: Remove segments **nearest** Wilhelmshaven.

E

END?

Bad Weather: If the Weather is Bad, remove all Damaged British ships, then IC. If none to remove, remove a TF with a British Convoy (it counts as a Completed Convoy), then IC. If none to remove, the scenario ends instead. Refer to Debriefing.

Good Weather: If the Weather is Good, the scenario ends. Refer to Debriefing. *Your ships are recalled by a nervous Fuhrer.*

C

COMPLETION ACTION to...where?

Selection: Select a British TF with a Convoy (f more than one, select the **shortest** Trajectory). If no Convoy in play, select an **unidentified** TF. If none, select any British TF.

No British TF: If there are no British TFs in play, treat this as an '**A**' result.

Action: Selected TF attempts to Complete in a port. If using the Early table, it attempts to Complete in Methil. If the Late table, in Scapa Flow. The selected TF may need to perform a Trajectory action first (most **direct** route), and will avoid enemy ports and airbases (but not enemy Stations). If trajectory length or Intel attachment prevents Completion, Pass instead.

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: IC

convoy

CONVOY.

Selection: Select a British TF with a Convoy in it (proceed to "Action"). If none in play, roll a die: if 1-4 create a new TF in Bergen and place a Convoy in it; if 5-6 create it in Methil instead. Then IC.

Action: Selected TF attempts to Complete in Methil (if the TF was created in Methil, it attempts to Complete in Bergen instead). The TF may need to perform a Trajectory action in order to do the Completion action (in which case, perform the Trajectory action first (most **direct** route), **avoiding Intel triggers**, and then the Completion action). If it has an Intel marker attached, preventing the Completion action, it performs a Pass action instead to remove the Intel marker.

Time Lapse: Remove segments **farthest** from its Completion port.

After successful Completion action: IC

© 2022 GMT Games, LLC

DECISIVE ACTION.

Selection: First, remove all Damaged British ships. Then, select a British TF with a **BC** in it (if more than one to choose, select the **shortest** Trajectory). If no BCs in play, select a British TF with a **BB** in it. If none, select an **unidentified** TF, and if none, create a new **unidentified** TF in Scapa Flow.

Action: Roll a die and find the result on the Decisive Action Table:

X

Decisive Action Table

1d6 →	1-2	3	4	5	6
Selected TF:					
BC/BB	**a.**	**b.**	**c.**	**d.**	**d.**
Unidentified or **CA**	**e.**	**f.**	**g.**	**h.**	**i.**

Legend of Results...

a. The selected TF performs actions designed to bring the **nearest** German TF to Battle (**Bring to Battle**).

b. Same as **a.**, but in addition, a British TF with one or more **CA**s performs a Trajectory action in order to serve as a Coordinating TF. If no British TF with a **CA** is in play, create a new unidentified TF in Portsmouth (it performs a Trajectory action designed to allow this new TF to serve as a CTF).

c. The selected TF performs actions designed to **Bring to Battle** the **nearest** German TF to Scapa Flow.

d. Same as **c.**, but in addition, a British TF with one or more **CA**s performs a Trajectory action in order to serve as a Coordinating TF. If no British TF with a **CA** is in play, create a new unidentified TF in Portsmouth (it performs a Trajectory action designed to allow this new TF to serve as a CTF).

e. The selected TF performs a Trajectory action to the **nearest** German TF, **avoiding Intel triggers** (if possible), and preferably in Air Strike range of a British airbase. Then, the British perform an Air Strike on the German target **nearest** the British TF (if possible, the British TF will serve as CTF). If Bad Weather or no German target is in range, treat as **f.** instead.

X cont.

f. The selected TF performs actions designed to **Bring to Battle** the **nearest** German TF to a British TF with a **Convoy**. If no Convoy is in play, place a Convoy in the TF and treat as '**convoy**' Action Table result.

g. The selected TF performs a Trajectory action to the **nearest** German TF (if a German TF has an Intel marker, it targets that hex; if it is in a hex with a German air base or port, apply **h** instead)). Then, place the British **Submarine force** in the target hex and attach an Intel marker to the German TF (unless it is a Station). The Submarine force immediately performs a Stealth attack. If no attack, apply '**h**' instead.

h. The selected TF performs actions designed to **Bring to Battle** the **nearest** German TF to Wilhelmshaven.

i. Place the Submarine force in a hex with a German TF (select the **nearest** hex to Bergen). Do this even if the hex has a German airbase or port. If the German TF is a Trajectory, attach an Intel marker (if the German TF is a Station, attach a Contact marker instead). Then, the selected TF performs actions designed to **Bring to Battle** the German TF in the Submarine's hex.

Time Lapse: Remove segments **nearest** to Scapa Flow.

Identify British TF

1d6 →	1	2-3	4	5	6
Early	**BC** **BC** **CA**	**CA** **CA**	**CL** Convoy	**DD**	Convoy
Late	**BC** **BB** **BB** **CL**	**BB** **BB** **CA** **CA**	**BC** **CV** **CA**	**CA** **CA** **CA**	Convoy **CL**

A **BB** result must be either the *Nelson* or *Rodney*. If already in play, or if they were in play, select any slow **BB**. If the British TF is instructed by the Action Table result to **Bring on Battle**, replace 'Convoy' with a **BB**. **DD** (DD Squadron) is sunk by two Hits.

© 2022 GMT Games, LLC

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the BL3 Debriefing Table for the outcome.

Mission objectives...

British Convoy engaged in Battle?	VP
yes	**1**
no	-1

German TF the target of an Air Strike	VP
yes	**-1**
no	0

British TF with a Convoy Completed	VP
yes	**-1** each successful Completion
no	0

apply these once only, not each Battle or Airstrike

Kriegsmarine assets...

VP are cumulative (e.g., if the *Scharnhorst* suffers two Hits, Damaging it, you lose 3 VP)

2 destroyed	5

Each British **BB**, **BC**, **CV** suffered:	VP
no Hits	**0**
Damaged	1
Sunk	3

Each British **CA**, **CL** suffered:	VP
no Hits	**0**
Damaged	1
Sunk	2

BL3 Debriefing Table

VP	OUTCOME
6 +	***Victory at Sea!*** If no German ship was Hit, this is a stunning victory. The Fuhrer's confidence in the Kriegsmarine escalates and Grossadmiral Raeder is free to assign more assets to raids in the North Sea. Meanwhile, at 10 Downing Street in London, Prime Minister Chamberlain must come to terms with the fact that his military options are dwindling. If a German ship was Hit, a spy indicates that Admiralty is instructed to sketch a plan of bold action intended to achieve a decisive battle. "The fangs of the Kriegsmarine must be removed."
4-5	***Victorious Raiders.*** If a Convoy suffered one or more Hits, Grossadmiral Raeder has successfully demonstrated that the Kriegsmarine's surface assets are critical to the successful disruption of Britain's supply chain. He sketches a plan to release assets into the North Sea, through the blockade, and into the North Atlantic to hunt for convoys. If a Battle took place against a British BB, BC, or CA and no German ship suffered Hits, the Fuhrer is ecstatic that Britain's aging fleet is no match for Germany's modern vessels. Marschall is awarded the Knight's Cross.
2-3	***Battle at Sea.*** If a German ship was sunk, the Fuhrer's disappointment is palpable. Grossadmiral Raeder's plans to slip assets through the blockade and into the Atlantic will meet a poor reception at the Reichstag. If none were sunk but one or more Damaged, the Kriegsmarine's pool of assets are greatly diminished, which will limit its capabilities for the next few months. If none were sunk or Damaged, the result is received by Hitler as encouraging, but as he looks ahead to crucial campaigns in the West, he orders Raeder to cease all operations involving cruisers or anything larger.
0 to 1	***What went wrong?*** If one or more Hits were scored on Convoys, Grossadmiral Raeder is encouraged even if the Fuhrer is disappointed. If a German ship was sunk, or two or more were Damaged, Hitler is enraged and Grossadmiral Raeder will be relieved of command. If a British BC or BB was sunk, however, Raeder is able to show that operations were not a complete loss, and he manages to remain at his post (for now).
-1 or less	***Defeat!*** If a German BC was sunk, this was a disaster. If not, the defeat was embarrassing, but the Kriegsmarine remains intact as Grossadmiral Raeder spars with the Royal Navy. The Fuhrer is concerned, however, and is considering the pool of successors if Raeder continues to demonstrate impaired judgment. If two British Convoys were destroyed, this was a Pyrrhic victory. Britain's vulnerability is exposed and morale there declines. And yet, the Kriegsmarine is gutted. There can be no invasion of Norway.

© 2022 GMT Games, LLC

‘N’ Scenarios: Norway

This batch of six scenarios explores the operations in April, May, and June 1940. Britain continues to make commerce with Norway, as does Germany, except Britain is keen to turn off the valve of Germany’s iron ore supply. As far as Britain is concerned, that commerce can be bottled up with the blockade it has established on the North Sea.

At the start of the war in late 1939, Scandinavia was embroiled in the contest despite its neutrality. Britain considered sending a squadron into the Baltic Sea to assist Poland, but Germany’s air assets were deemed too much a threat for such direct action. Germany’s war industry relied on Swedish ore, which was shipped out of the nearest port. That port was in Narvik, and the sea route ran along Norway’s coast, making it a target for the Royal Navy. Admiral Donitz who commanded Germany’s U-Boat fleet, along with Grand Admiral Raeder, strenuously lobbied for access to Norwegian ports and fjords as a safe harbor for the Kriegsmarine, allowing that naval force to break Britain’s blockade of the North Sea. Both governments, therefore, looked at Norway as a potential and inevitable battleground.

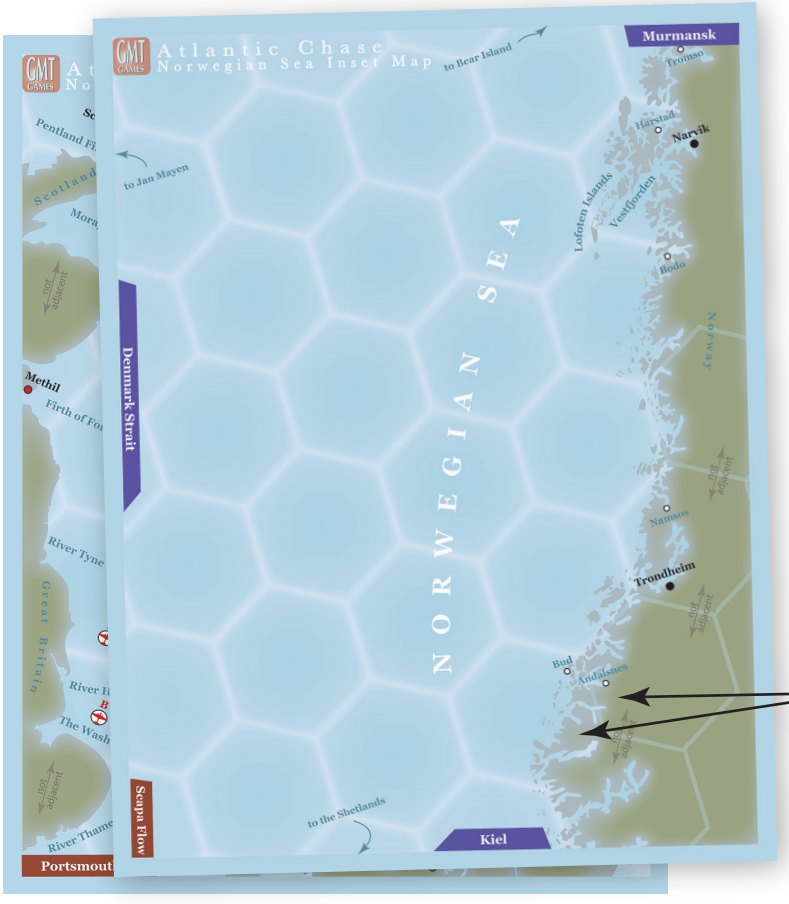

Neutral Norway

Norway is neutral. A Trajectory segment placed in a space with a Norwegian port, such as Narvik, does not trigger Intel (that is, an Intel marker is not attached to the segment). Also, Norwegian ports are not connected to port boxes (that is, the Bergen, Trondheim, and Narvik port boxes are out of play in these scenarios).

Norwegian Completion Actions

Each of these scenarios allows for Completion actions in Norway. This represents troops and supplies unloading in a Norwegian port or landing point, or perhaps minelayers setting mines. The player is only allowed a Completion action in a Norway hex when a **Convoy** or **DD Squadron** is in the TF. When such a Completion action succeeds in Norway, do not remove the TF or its ships. Instead, perform Time Lapse (remove segments from either end, just like any Time Lapse).

Enemy Completion in Norway: When the imaginary player successfully Completes in Norway, remove the TF and its ships.

A **Convoy** may share a TF with other ships, but not another Convoy. If a **DD Squadron** carries troops or supplies, it may not share a TF with a Convoy. A successful Completion action means troops or supplies or mines disembarked.

Reminder: A Convoy can suffer Hits, it can be destroyed, but it can’t be ‘Damaged.’

Norwegian Reaction

The Norwegians may not take kindly to being invaded or the mining of their coastal waters. When you perform a successful Completion action in a Norwegian Port or point of interest, roll a die and check the result on the Norwegian Reaction Table (specific to each scenario). The imaginary player is not required to do this (Reaction is incorporated into the Action Tables).

POINTS OF INTEREST

These points have no effect on game play, except to orient the player. For example, in Scenario N1, the player must strive to place mines in the hexes with Bud and Andalsnes.

© 2022 GMT Games, LLC

N1:Operation Wilfred

British player

Early April 1940. Admiralty intends to rob the Germans of untroubled access to Norway's "inner leads," laying mines in key places along the convoy route from Narvik to Germany. There is some concern, however, that Norway may retaliate or move towards Germany politically, or that Germany will use this operation as an excuse to launch an invasion.

Objective

Establish mines in Vestfjorden, Bud, and Andalsnes. Do not lose British ships in the effort, nor Damage any. And, above all, do not allow a German Task Force to enter the Denmark Strait (where it might attack convoys in the Atlantic).

Set-Up

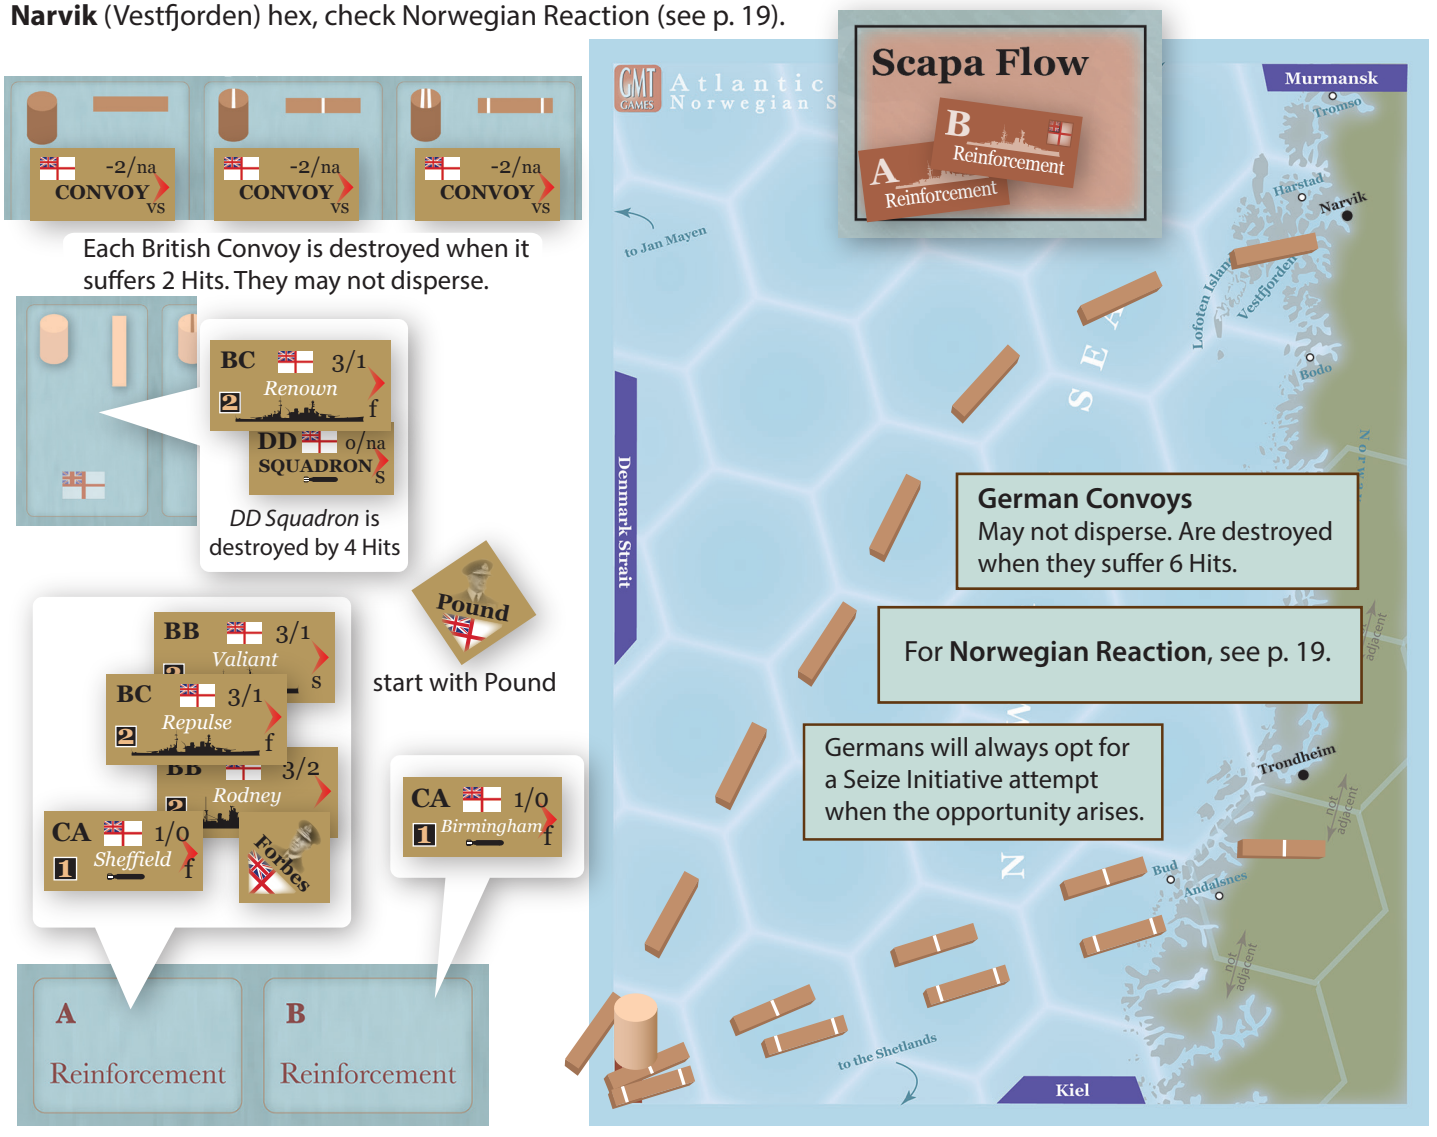

Weather: Bad
Initiative: British (the player)
Map: Norwegian Sea Inset Map;
Enemy: No German TFs at start

The End

The scenario ends when the British have no Convoys in play (they have Completed in Scapa Flow or been destroyed).

Special Instructions

Mines: Up to 3 Mines stealth force markers may be placed (one in the Narvik/Vestfjorden hex, one in the Bud hex, and one in the Andalsnes hex). To place a Mines marker, a TF with a **Convoy** must successfully perform a Completion action in the target hex (see p. 16, "Norwegian Completion Actions"). If successful, place the Mines marker and perform Time Lapse (once placed, it is a Stealth force). Then, if the Mines was placed in the **Narvik** (Vestfjorden) hex, check Norwegian Reaction (see p. 19).

© 2022 GMT Games, LLC

German Actions

When the Germans have the Initiative, use the German Action Tables to determine their actions. Start by using the "Early" table. Use the "Late" table after a Battle has occurred (caused by Battle, Closing In, Skirmish results), or after an '**I**' result on the action table.

German Action Tables

Early

Number of Mines on map?	1d6 → 1	2	3	4	5	6
0	**M**	**T**	**N**	**D**	**C**	**C**
1	**I**	**M**	**T**	**N**	**C**	**C**
2+	**I**	**I**	**M**	**T**	**N**	**C**

Late

	1d6 → 1	2	3	4	5	6
Good (W)	**D**	**X**	**X**	**C**	**C**	**C**
Bad (W BAD)	**D**	**D**	**X**	**X**	**C**	**C**

Legend of Action Table Results:

C

COMPLETION ACTION to...where?
Selection: Select a German TF. If more than one, select the TF with a Damaged ship or Convoy, and if none, select the **shortest** Trajectory. If no TF in play, apply an '**M**' result instead.

Action: Selected TF attempts to Complete in a port. Roll another die to determine the destination port (use the **Port Table** on this page; do so even if you already did so before for the selected TF - its destination can change). The selected TF may need to perform a Trajectory action first (most **direct** route), and will avoid enemy ports and airbases (but not enemy Stations). If trajectory length or Intel attachment prevents Completion, Pass instead.

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: *IC*

D

COMPLETION ACTION to DENMARK STRAIT.
Selection: Select the German TF **nearest** a Denmark St. port hex. The selected TF may not have a **Convoy** or Damaged ship. If no eligible TF may be selected, create a new TF and **PB** in it and place it in Kiel (it is the selected TF).

Action: Selected TF attempts to Complete in **nearest** Denmark Strait port hex. The TF may need to perform a Trajectory action (**most direct route**). If Completion is prevented by Trajectory length or Intel attachment, it performs a Pass action instead.

Time Lapse: Remove segments **farthest** from the Denmark Strait port hex.

After successful Completion action: *IC*

I

INTERCEPTION.
Selection: Select a German TF. If more than one is in play, select the **nearest** to Narvik. If none in play, create a new German TF **in** Kiel. If **unidentified** or new, roll a die to determine the ships in the TF:

New German TF
no modifiers

1d6 → 1	2	3	4	5	6
BC BC	**BC BC**	**BC CA**	**BC**	**PB CL**	**CA**

If two **BC**s are already in play, treat a '**BC**' result as a '**CL**' result instead.

Action: Selected TF attempts to **bring a British TF to Battle**. Target an enemy Station (but not one in Scapa Flow). If none, target a Trajectory **nearest** to Trondheim).

Time Lapse: Remove segments nearest to Kiel.

If no TF to target, the scenario ends. Proceed to Debriefing.

Port Table
no modifiers

1d6 → 1	2	3-4	5-6
Murmansk	Kiel	Trondheim	Narvik

If Damaged or a Convoy, do not roll a die: its destination port is Kiel.

© 2022 GMT Games, LLC

M

TRAJECTORY ACTION to MURMANSK.

In Murmansk? If an **unidentified** TF or a TF with a **Convoy** is **in** Murmansk, treat as '**N**' instead. If a TF with an undamaged **BC** (and no Convoy) is **in** Murmansk, treat as a '**D**' instead.

Selection: Select a German TF. If more than one to choose, select an **unidentified** TF, or if none, one with a **Convoy**. If no TF in play, create and select an **unidentified** TF in Kiel.

Action: Selected TF performs a Completion action **in** Murmansk. It may first perform a Trajectory action using the most **direct** route. If an Intel marker or length of Trajectory prevents a Completion action, it performs a Pass action instead.

Time Lapse: Remove segments **nearest** to Kiel.

After successful Completion action: **IC**

Note: This TF may be a tanker or troop ship (Convoy) intended to invade Norway or support the invasion, or, it could be a raider intending to turn west to attack British merchant shipping, or, it may be looking for your ships and spoiling for a fight.

N

TRAJECTORY ACTION to NARVIK.

Selection: Select a German TF. If more than one to choose, select an unidentified TF, or if none, one with a Convoy. If none, create a new TF (unidentified) in Kiel.

Action: Selected TF performs a Completion action **in** Narvik. If necessary, it first performs a Trajectory action using the most **direct** route. If an Intel marker or length of Trajectory prevents a Completion action, it performs a Pass action instead.

Time Lapse: Remove segments **farthest** from Narvik.

After successful Completion action: **IC**

T

TRAJECTORY ACTION to TRONDHEIM.

Selection: Select an **unidentified** German TF (if more than one to choose, select the **nearest** to Trondheim). If none, select a German TF with a Convoy. If none, create a new **unidentified** TF in Kiel.

Action: Selected TF performs a Completion action **in** Trondheim. If necessary, it first performs a Trajectory action using the most **direct** route. If an Intel marker or length of Trajectory prevents a Completion action, it performs a Pass action instead.

Time Lapse: Remove segments **farthest** from Trondheim.

After successful Completion action: If the selected TF is unidentified, remove the TF; if identified, it immediately performs a Trajectory action to Kiel, and then a Completion action in Kiel. Then, **IC**

X

BRING ON BATTLE.

Selection: Remove Damaged ships from all German TFs. Then, select a German TF with a **BC**, **PB**, or **CA** in it (if more than one choice is available, select a BC before a PB, a PB before a CA). If none or if the selected TF has a Convoy in it, create and select a new TF in Kiel. Use this table to identify its ships now:

X – Identify German TF

no modifiers

1d6 →	1	2	3	4	5	6
	BC **BC**	**BC** **BC**	**BC** **BC**	**BC** **PB**	**BC** **CA**	**PB** **CA**

If two **BC**s are already in play, treat a '**BC**' result as a '**CL**' result instead.

Action: Selected TF performs actions designed to **bring on Battle** targeting a British TF **nearest** a port. To determine which port, roll a die and refer to the Port Table on page 18 (target hex should be closest to that port).

Time Lapse: Remove segments **nearest** to Kiel.

Identify German TF

no modifiers

1d6 →	1	2-3	4	5	6
	BC **BC**	**BC** **BC** Convoy	**CL** Convoy	**DD** Convoy	Convoy

If two **BC**s are already in play, treat a '**BC**' result as a '**CL**' result instead. If a **DD** is already in play, replace with a **CL**.

Note: Do not use this table during an '**I**' or an '**X**' result on the German Action Table. An '**I**' or an '**X**' result will identify German ships using the table specific to that action.

Norwegian Reaction: Narvik

When a British Convoy performs a Completion action **in** a hex with Narvik, check for a reaction by rolling a die and referring to the table below. The reaction will not affect game play, but will influence the Debriefing Table.

Norwegian Reaction

1d6 →	1-2	3-6 or higher
	Angry reaction	**No reaction**

Modifier: **+1** if British **BB** is in the Narvik hex.

© 2022 GMT Games, LLC

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the N1 Debriefing Table for the outcome.

Mission Accomplished? If you scored 5 or more VP, and installed mines in three hexes, well done. If you managed to Damage or sink a German BC or PB, regardless of mines or VP, you should be commended. In either case, check the **N1 Debriefing Table** for the rest of the story.

N1 Debriefing Table

VP	OUTCOME if no angry reaction
8 +	***Operation Wilfred was successful.*** If a German ship was sunk or a Hit scored on a German Convoy, the German invasion of Norway is interrupted and Operation R4 is set into motion. The German invasion of France is delayed.
1-7	If mines in Vestfjorden, the operation was successful enough. If a BC completed in Denmark Strait, Churchill confers with Pound, seeking a replacement for Forbes.
-4 to **0**	The situation seems unstable. Churchill planned to install troops in Narvik, but he calls off Operation R4. Admiral Forbes is obviously ready for retirement.
-5 or less	***Escaped Raider!*** If a German TF completed in the Denmark Strait, Admiral Forbes must despatch Home Fleet assets to chase it. Convoys from North America, Sierra Leone, and the Mediterranean are instructed to return to port until the German raiders are dealt with. *This is a political disaster.* And now, reports indicate German activity on the Belgian border.

VP	OUTCOME if angry Norwegian reaction
6 +	***Operation Wilfred was successful.*** Forbes is pleased, but Churchill is baffled by Norway's response. He orders Operation R4 to proceed (if a German TF Completed in Norway, however, British defeat is likely).
1-5	If mines in Vestfjorden, the operation was successful enough. If British BB or BC was sunk, however, Operation R4 is called off. The German invasion of Norway was perhaps interfered with (if a German Convoy suffered a Hit), but Churchill is frustrated by Forbes' ineptitude.
0 or less	***What went wrong?*** If a British BB or BC was sunk, it was not only a catastrophe, Norway has officially appealed to Germany for protection against Britain. If none were sunk, the Norwegians are slow to contest the German invasion of their country.

© 2022 GMT Games, LLC

N2: Operation Weser (north)

German player

April 1940. Grand Admiral Raeder has been working to convince the Fuhrer that Norwegian ports are necessary if the Kriegsmarine will effectively interfere with Britain's commerce. Now that Britain has demonstrated a contempt for Norwegian neutrality by boarding merchant vessels in Norwegian waters, it seems clear that Norway will become a battleground and Raeder may indeed get what he has wanted. If Germany is to gain the advantage in this new arena, haste is essential. Operation Weser, the invasion of Norway by air and sea, must commence immediately.

Objective

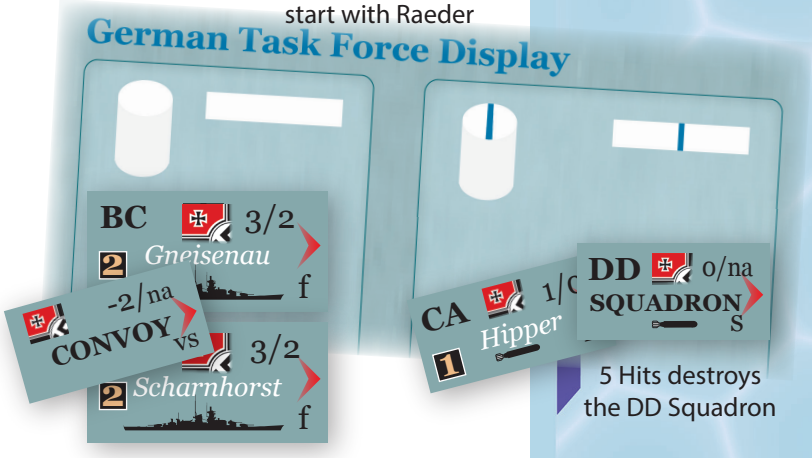

The **Convoy** carries troops and supplies and the **DD Squadron** also carries troops. They must be delivered to Norway, and then all ships must withdraw safely to the south (to Kiel). The **Convoy** must deliver troops to Narvik while the **DD Squadron** must deliver to Trondheim (see p. 16, "Norwegian Completion Actions"). Do not allow any ship to be Damaged or sunk, those assets are precious. This war is only just starting.

Set-Up

Weather: Bad
Initiative: German (the player); set the Initiative Tally marker on the '**2**' space of the track;
Map: Norwegian Sea Inset Map
Enemy: No British TFs at start

start with Raeder

5 Hits destroys the DD Squadron

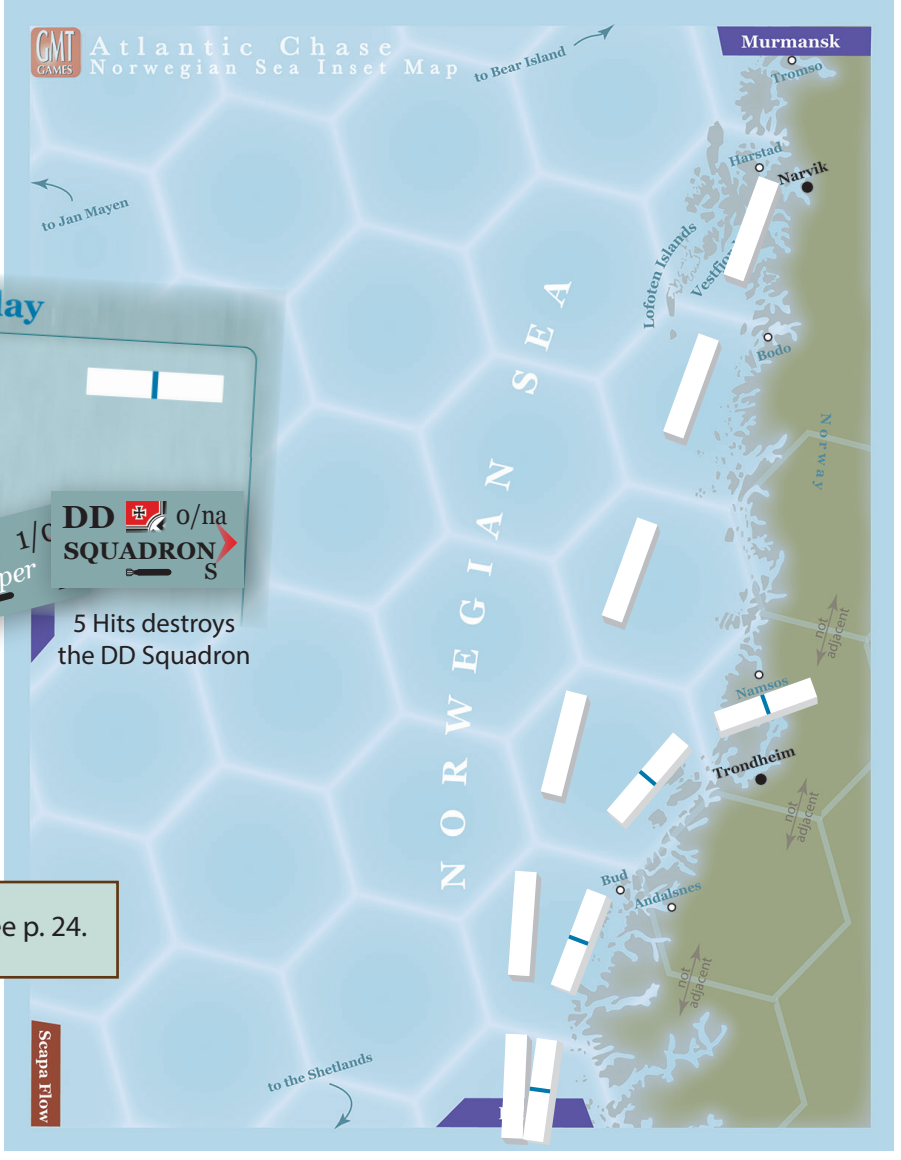

The German Convoy is destroyed when it suffers 4 Hits. It can't disperse.

For **Norwegian Reaction**, see p. 24.

British Convoys
May not disperse. Are destroyed when they suffer 2 Hits.

The End

The scenario ends when the Germans have no Task Forces in play.

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Tables to determine their actions. Start by using the "Early" table. Use the "Late" table after an Aggressive Norwegian Reaction, or after a Battle has occurred (triggered by Battle, Closing In, Skirmish results), or after a Stealth attack.

British Action Tables

Early

	1d6 →	1	2	3	4	5	6
Good	W	AA	Bd	N	N	mines	mines
Bad	W BAD	AA	Bd	N	mines	mines	P

Modifiers (Late table only):

+**2** each Damaged British ship in play (not Convoy or DD)
+**1** each sunk British ship or Convoy with 2+ Hits
-**1** each Mines stealth force in play
-**1** each Aggressive Norwegian Reaction

Late

Number of successful German Completion actions	1d6 →	1 or less	2	3	4	5	6+
none		R4	R4	P	P	C	C
1		R4	X	N	T	P	C
2		X	X	N	T	P	C
3+		X	X	X	N	T	C

Legend of Action Table Results:

AA

TRAJECTORY ACTION to ANDALSNES?
Selection: Select a British TF in Andalsnes. If none, select British TF with the **longest** Trajectory. If no British TF in play, create a new **unidentified** TF in Scapa Flow.
Action: If a German TF is **in** the same hex as the selected British TF (in any hex), the TF attempts to **bring to Battle** that German TF (if the selected TF has a **Convoy**, replace the **Convoy** with a **BC**; *the Convoy turned back to port or was never really there despite intelligence to the contrary*). If no German TF is in its hex, the selected TF instead performs a Completion action in Andalsnes (it may need to perform a Trajectory action first, most **direct** route). If the Completion action is prevented by Trajectory length or Intel attachment, Pass instead.
Time Lapse: Remove segments **farthest** from Andalsnes.

Bd

TRAJECTORY ACTION to BUD.
Selection: Select a British TF in Bud. If none, select British TF with the **longest** Trajectory. If no British TF in play, create a new **unidentified** TF in Scapa Flow.
Action: If a German TF is **in** the same hex as the selected British TF (in any hex), the TF attempts to **bring to Battle** that German TF (if the selected TF has a **Convoy**, replace the **Convoy** with a **BC**;). If no German TF is in its hex, the selected TF instead performs a Completion action in Bud (it may need to perform a Trajectory action first, most **direct** route). If the Completion action is prevented by Trajectory length or Intel attachment, Pass instead.
Time Lapse: Remove segments **farthest** from Bud.

C

COMPLETION ACTION to SCAPA FLOW.
Selection: Select the British TF with a Damaged ship, and if none, select the **longest** Trajectory. If no British TF is in play, Pass action instead.
Action: Selected TF performs a Completion action to Scapa Flow. If not **in** Scapa Flow, it performs a Trajectory action first **avoiding Intel triggers** (if possible), using the most **direct** route. If prevented from attempting a Completion action due to Intel markers or Trajectory length, it performs a Pass action instead.
Time Lapse: Remove segments **farthest** from Scapa Flow.
After Completion action: *IC*

mines

BRITISH LAY MINES.
Selection: Select a hex on the map by rolling a die:

1d6 →	1	2-3	4-5	6
	Bud	Andalsnes	Trondheim	Narvik

Action: If the selected hex does not have a British Mines stealth force in it, place one (this is not Recon; do not attach Intel markers). Then *IC* If it already has a Mines force in the hex, attach a **Contact** marker to the **nearest** German TF, then *IC* . If two or more are 'nearest,' attach a Contact marker to all 'nearest' German TFs. If one already has a Contact marker (attached to any segment), apply an '**X**' British Action Table result using that German TF as the target (it targets the nearest segment/Station with a Contact marker).

© 2022 GMT Games, LLC

N

COMPLETION ACTION in NARVIK.
Selection: Select a British TF in Narvik. If none, select British TF with the **longest** Trajectory. If no British TF in play, create a new **unidentified** TF in Scapa Flow.

Action: If a German TF is **in** the same hex as the selected British TF (in any hex), the TF attempts to **bring to Battle** that German TF (if the selected TF has a **Convoy**, replace the **Convoy** with a **BC**; *the Convoy turned back to port or was never really there despite intelligence to the contrary*). If no German TF is in its hex, the selected TF instead performs a Completion action in Narvik (it may need to perform a Trajectory action first, most **direct** route). If the Completion action is prevented by Trajectory length or Intel attachment, Pass instead.

Time Lapse: Remove segments **farthest** from Narvik.

P

PASS.
Actions: The British perform a Pass action.

Time Lapse: Remove segments **farthest** from Scapa Flow. If no British TF in play, do not perform Time Lapse.

R4

OPERATION R4.
B-Dienst warns that the British may launch an operation intended to capture Norway.

Selection: Create two new British TFs **in** Scapa Flow:
TF1 – 4 **CA**s (any);
TF2 – 2 **BB**s (*Nelson* and *Rodney*) and 1 **CA** (any).

Actions: Each new TF performs a Trajectory action (**most direct routes**) (**TF1** to Trondheim, and **TF2** to Narvik).

Then: If a German TF has an Intel marker attached, **TF1** or **TF2**, whichever is **nearest**, performs another Trajectory action to the **nearest** Intel marker and then performs a Signals action targeting that marker. If the British maintain Initiative after the Signals action, that TF attempts to **bring to battle** the target of the Signals action.

No German Intel marker? Roll a die: If the number rolled is EVEN, select **TF2**; if ODD, select **TF1**. The selected TF attempts to **bring to battle** the German TF **nearest** to Narvik.

Time Lapse: Remove segments **nearest** to Scapa Flow.

R4 again? If **R4** has already been garnered on the Action Table and it is garnered again, treat as '**X**' instead.

T

COMPLETION ACTION in TRONDHEIM.
Selection: Select a British TF with a **Convoy**. If none, select an **unidentified** British TF. If none, select the British TF **nearest** to Trondheim (and then apply an '**X**' result instead, using that TF as the selected TF). If no British TF is in play, apply an '**N**' result instead.

Action: The selected TF attempts a Completion action in Trondheim (it may need to perform a Trajectory action first). If prevented by Trajectory length or Intel attachment, it Passes instead and the selected TF performs Time Lapse.

Time Lapse: Remove segments **farthest** from Trondheim.

After Completion action: *IC*

X

BRING TO BATTLE.
Selection: Select a British TF with a **BB** in it (if more than one to choose, select the **shortest** Trajectory). If none, create a new TF in Scapa Flow (it is selected). Roll a die to determine the ships in the new TF:

New British TF

1d6 →	1-2	3	4	5	6
	BC **BB** **BB**	**BB** **BB** **CA**	**BB** **CA** **CA**	**CA** **CA** **CA**	**CA** **CL**

If the result includes a **BB**, select only slow ships (not *Nelson* or *Rodney*).

Action: Selected TF performs actions designed to **bring on a Battle** targeting a German TF with a Contact marker. If none have Contact markers, it targets the TF **nearest** to Narvik.

Time Lapse: Remove segments **farthest** from Scapa Flow.

Unidentified British Ships

When you need to identify British ships (and the action result was not '**X**'), use this table:

Identify British TF

1d6 →	1	2	3-4	5	6
Early	**BC** **CA**	**CA** **CA**	**CL** Convoy	**DD** Convoy	Convoy
Late	**BC** **BB**	**BB** **CA**	**CA** **CA**	**CA**	Convoy

If the British TF is instructed by the Action Table result to bring on Battle, replace 'Convoy' with a **BB**. A **BB** result must be slow and may not be the *Nelson* or *Rodney*.

© 2022 GMT Games, LLC

Norwegian Reaction: German Completion Actions

When a German Convoy or DD performs a successful Completion action **in** a hex with Narvik or Trondheim, check for a reaction by rolling a die and referring to the Norwegian Reaction table on the right.

Legend of results...

–	No reaction.
Hit	Convoy or DD suffers a Hit. This is an Aggressive Reaction.
Two Hits	Convoy or DD suffers two Hits. You may redirect one of the Hits to another German ship in the hex (its TF must be a Station). This is an Aggressive Reaction.
AR	Norwegian forces, perhaps supported by British troops, put up a fight but are overwhelmed. This is an Aggressive Reaction.
!	The Completion action is cancelled. The German Convoy or DD suffers two Hits and it must Complete in Kiel. This is an Aggressive Reaction. British have Initiative.

Norwegian Reaction

1d6 →		0 or 1	2	3	4	5+
British Mines in hex?	YES	!	Hit Hit	AR	–	–
	NO	!	Hit	Hit	AR	–

Modifiers:

+1 if there are two or more British Mines stealth forces on the map.

+1 if one or more German **BC** or **CA** is **in** the hex.

-1 if one or more British TFs are **in** the hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the N2 Debriefing Table for the outcome.

Mission objectives...

Convoy completed in Narvik?	VP
yes	**5**
no	-1

DD completed in Trondheim?	VP
yes	**5**
no	-2

Each Hit on a German...	VP
Convoy	**-2**
DD	-3

Kriegsmarine assets...

Each German ship?	VP
sunk	**-5**
damaged	-3

not Convoy or DD Squadron

British...

British Complete in Narvik AND Trondheim
-8

British Convoys suffered:		VP
total Hits of all Convoys	**no Hits**	**0**
	1-2 Hits	2
	3+ Hits	3

Each British BB, BC, CA & CL suffered:	VP
no Hits	**0**
Damaged	1
Sunk	2

N2 Debriefing Table

VP	OUTCOME
11 +	***Operation Weser was successful.*** The British are reeling as German forces occupy Norway establishing strongholds and airbases as far north as Tromso. Swedish ore is now secure, and the invasion of France and the Low Countries can proceed on schedule.
8 -10	***Victory assured.*** If there was an Angry Reaction, or if a British TF Completed in Narvik, shift the Outcome one row down (to Contest).There is little the British can do in the face of overwhelming air superiority along the Norwegian coast. However, if the DD Squadron did not complete in Trondheim, the Battle for Norway remains undecided.
3 -7	***Contest.*** Unless the DD Squadron completed in Trondheim, the operation is a failure. If a German ship was sunk, the operation is called off and German troops are airlifted home.
0 - 2	***Failure.*** If the Convoy or DD Squadron completed in Norway, it is possible the operation will still prove successful. If either took a Hit, success is unlikely. If a German ship was sunk, Admiral Raeder's days are numbered.
-1 or less	***Catastrophe?*** Prime Minister Chamberlain announces that British forces are securing Norway against German invasion. If two or more German ships are damaged or sunk, the Kriegsmarine no longer has the power to deter the British and it will be up to the Luftwaffe to save the day. Admiral Raeder is relieved of command.

© 2022 GMT Games, LLC

N3: Operation Weser (south)

German player

April 1940. Grand Admiral Raeder sends task forces carrying troops and supplies to Bergen and Kristiansand in Norway, hoping to pre-empt a British invasion or cooperation between Norway and Britain. It is feared the Royal Navy will contest this move, but it is hoped speed and surprise will carry the day.
Note: the *Blucher's* debacle before Oslo is not depicted here.

Objective

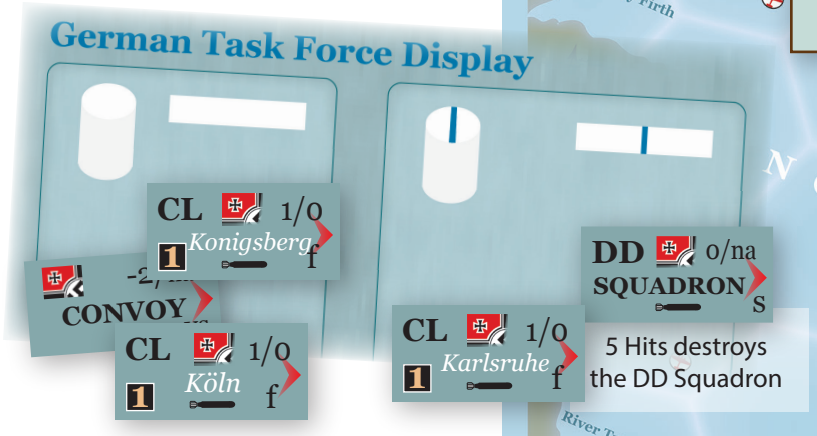

The Convoy carries troops and supplies and the DD Squadron also carries troops. They must be delivered to Norway, before withdrawing safely to Germany (to Kiel or Wilhelmshaven). The Convoy must complete in Bergen while the DD Squadron must complete in Kristiansand, and all ships must complete in Wilhelmshaven or Kiel. Do not allow any to be damaged or sunk. The Kriegsmarine can ill afford losses.

Set-Up

Weather: Bad
Initiative: German (the player); set the Initiative Tally marker on the '**2**' space of the track;
Map: North Sea Inset Map
Enemy: No British TFs at start

start with Raeder

5 Hits destroys the DD Squadron

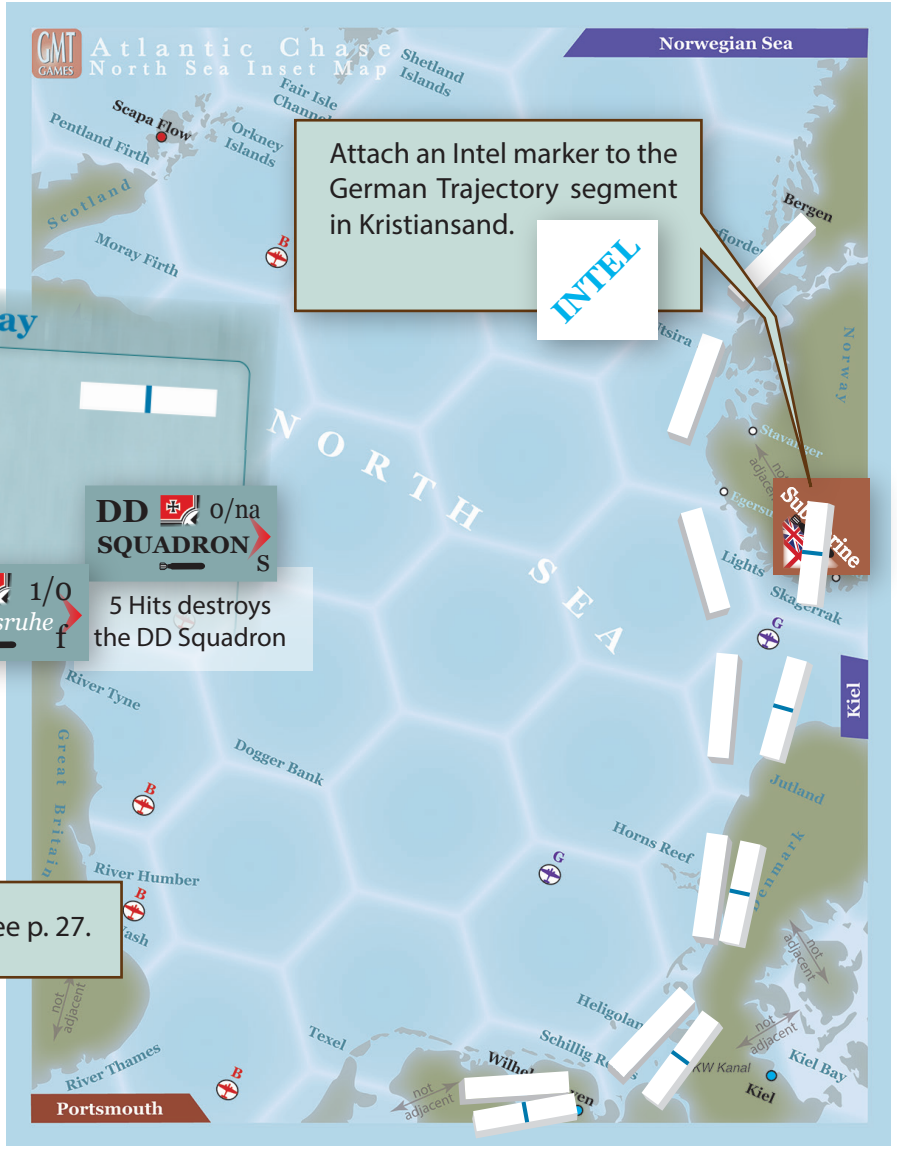

The German Convoy is destroyed when it suffers 4 Hits. It can't disperse.

For **Norwegian Reaction**, see p. 27.

British Convoys
May not disperse. Are destroyed when they suffer 2 Hits.

The End

The scenario ends when the Germans have no Task Forces in play.

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Table to determine their actions.

Modifiers (British Action Table):
+**2** each British ship in play that is Damaged
+**1** each sunk British ship or destroyed Convoy
-**1** each Aggressive Norwegian Reaction

British Action Table

Number of successful German Completion actions	1d6 → 1 *or less*	2	3	4	5	6+
none	B	B	SA	SR	👁	C
1	X	B	B	SA	SR	C
2	X	X	B	SA	SA	C
3+	X	X	X	SA	SA	C

Legend of Action Table Results:

B

TRAJECTORY ACTION to BERGEN.
Selection: Select a British TF **in** Bergen. If none, select the **longest** Trajectory. If no TF is in play, create a new **unidentified** TF in Methil.
Action: First, the selected TF performs a Trajectory action to Bergen (if already in Bergen, skip to step 2). Then (step 2), if a German TF is **in** the same hex as the selected British TF (in any hex, not just Bergen), the TF attempts to **bring to Battle** that German TF (if the selected TF has a **Convoy** or damaged ship, replace Convoy/damaged ship with a **CA**; *the Convoy turned back to port, or was never really there despite intelligence to the contrary*). If no German TF is in its hex, the selected TF's action depends on what is in the British TF: if a Convoy or unidentified, it attempts a Completion action in Bergen (if prevented by Trajectory length or Intel attachment, it Passes instead). If it contains any other ship type, it Passes.
Time Lapse: Remove segments **farthest** from Bergen.

C

COMPLETION ACTION to SCAPA FLOW.
Selection: Select a British TF with a Damaged ship. If none, select the **longest** Trajectory. If no British TF is in play, perform an Air Strike action (if Bad Weather or no German TF in range, and the German Convoy and DD Squadron delivered troops to Norway, the scenario ends; otherwise, the British Pass).
Action: Selected TF performs a Completion action to Scapa Flow (it may need to perform a Trajectory action first, using the most **direct** route **avoiding Intel triggers** (if possible).
Time Lapse: Remove segments **farthest** from Scapa Flow.
After Completion action: *IC*

👁

CONTACT.
Each German TF **in** Bergen and Kristiansand gets a Contact marker attached (attach to station or segment in the port hex). Then: *IC*
If a German TF already has a Contact marker attached: *IC*

SA

STEALTH ATTACK.
Selection: Select the British Submarine stealth force. If not in play, treat as '**SR**' result instead.
Action: Submarine performs a Stealth attack, and gets a **+3** modifier on the Stealth Attack Table. If it does not have a target in its hex (no German TF Station, or none with an Intel or Contact marker), treat as '**SR**' result instead. British use Coordination if there is a British TF in the target hex. After the attack and the Submarine marker is removed from play, it is eligible to return to play when '**SA**' or '**SR**' is the Action Table result.

SR

STEALTH RECON.
Selection: Select the British Submarine stealth force. It does not matter where it is.
Action: Place the Submarine stealth force **in** a hex with a German TF (if a Trajectory, attach an Intel marker to the segment, if it does not already have one). If more than one option for placement, choose the hex **nearest** Bergen. If the Sub force is already in Bergen, treat as CONTACT 👁 instead.

X

BRING ON BATTLE.
Selection: Select a British TF with a BB in it. If none, create a new TF in Scapa Flow (place 2 **BB**s, 1**BC**, and 2**CA**s in it).
Action: First, remove all Damaged British ships from TFs (if this empties a TF, remove that TF from play). Then, the selected TF performs actions designed to **bring on a Battle** targeting a German TF **nearest** to the Submarine force (if the Submarine force is not on the map, **nearest** to Bergen instead).If multiple targets, select the one that will give the British the most advantageous modifier.
Time Lapse: Remove segments **nearest** to Scapa Flow.

© 2022 GMT Games, LLC

Unidentified British Ships

When you need to identify British ships (and the action result was not '**X**'), use this table:

If the British TF is instructed by the Action Table result to bring on Battle, replace 'Convoy' with a **BB**. A **BB** must be slow (not the *Rodney* or *Nelson*).

Identify British TF

1d6 →	1	2	4	5	5-6
	BC CA	**CA CA**	**CA** Convoy	**CL** Convoy	Convoy

Norwegian Reaction: German Completion Actions

When a German Convoy or DD performs a successful Completion action **in** a hex with Bergen or Kristiansand, check for a reaction by rolling a die and referring to the Norwegian Reaction table on the right.

Legend of results...

–	No reaction (no additional game effect).
Hit	Convoy or DD suffers a Hit. This is an Aggressive Reaction.
Two Hits	Convoy or DD suffers two Hits. You may redirect one of the Hits to another German ship in the hex (its TF must be a Station). This is an Aggressive Reaction.
!	The Completion action is cancelled. The German Convoy or DD suffers two Hits and it must Complete in Kiel or Wilhelmshaven. This is an Aggressive Reaction. British have Initiative.

Norwegian Reaction

British TF in hex?	1d6 → 1	2	3	4	5+
YES	!	Two Hits	Hit	–	–
NO	!	Hit	Hit	Hit	–

Modifiers:

+1 if one or more German **CL** is **in** the hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the N3 Debriefing Table for the outcome.

Mission objectives...

Convoy completed in Bergen	VP
yes	**5**
no	-3

DD completed in Kristiansand?	VP
yes	**5**
no	-2

Each Hit on a German...	VP
Convoy	**-2**
DD	-3

Kriegsmarine assets...

Each German ship?	VP
sunk	**-4**
damaged	-2

Each British Task Force Completed in Bergen?	VP
yes	**-4**
no	0

British casualties...

British Convoys suffered:		VP
total Hits of all Convoys	**no Hits**	**0**
	1-2 Hits	2
	3+ Hits	3

Each British BB, BC, CA & CL suffered:	VP
no Hits	**0**
Damaged	1
Sunk	2

N3 Debriefing Table

VP	OUTCOME
10 or more	***Blitzkrieg!*** Norway will soon be secure. Despite superiority of force, the British seem helpless.
5-9	If no German ship was damaged or sunk, the operation in the south went according to plan. Hits to the Convoy or DD Squadron are costly, delaying the inevitable German victory. Thanks to overwhelming air superiority, however, German ground forces capture Bergen and push north. If the Convoy suffered a Hit, reinforcements will be needed. If there was no Aggressive Reaction, and you earned more than 5 VP, upgrade the Outcome one row to *Blitzkrieg!*
4 or less	Operation Weser now hinges on successes at Oslo and the north. If neither Convoy nor DD Squadron completed in Norway without suffering Hits, Bergen may eventually fall. If a German ship was sunk, however, or if an '**X**' result was garnered on the Action Table and 2 or more Hits were suffered by the Convoy, the Battle for Norway is in doubt.

© 2022 GMT Games, LLC

N4: Operation Weser (north & south)

German player

April, 1940. The Kriegsmarine is ordered to facilitate the occupation of Norway. In the face of superior enemy assets, its surface fleet must risk ferrying the Wehrmacht to multiple ports along the coast. Surprise is crucial, and speed is essential.

Objective

Two Convoys and one DD Squadron must perform Completion actions in Bergen, Trondheim, and Narvik. All ships must ultimately perform Completion actions in Wilhelmshaven or Kiel. Do not allow German ships to be damaged or sunk.

Set-Up

Weather: Bad
Initiative: British
Map: Operations Map
Enemy: Three TFs at start.

The End

The scenario ends when the Germans have no Task Forces in play (or possibly by Action Table result '**X**')

Set-Up Alternative

If you prefer, you may organize German at-start ships in task forces as you like. They all start as stations in Wilhelmshaven. Germans start with Initiative, but set the Initiative Tally marker at '2'.

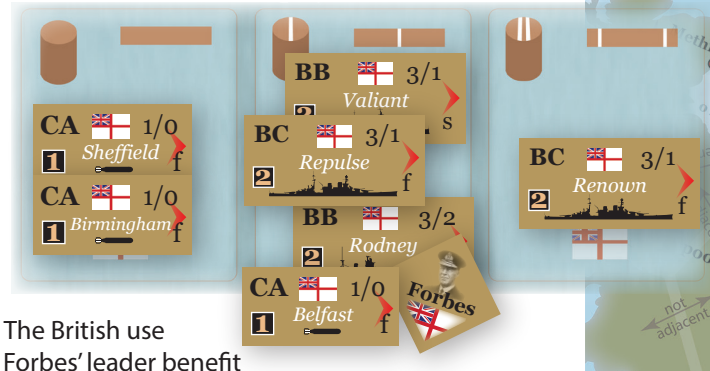

Urgency *(British SI opportunities)*

When the British have the opportunity to make a Seize Initiative attempt, they always make the attempt and do not elect to take the Evasive maneuvers marker.

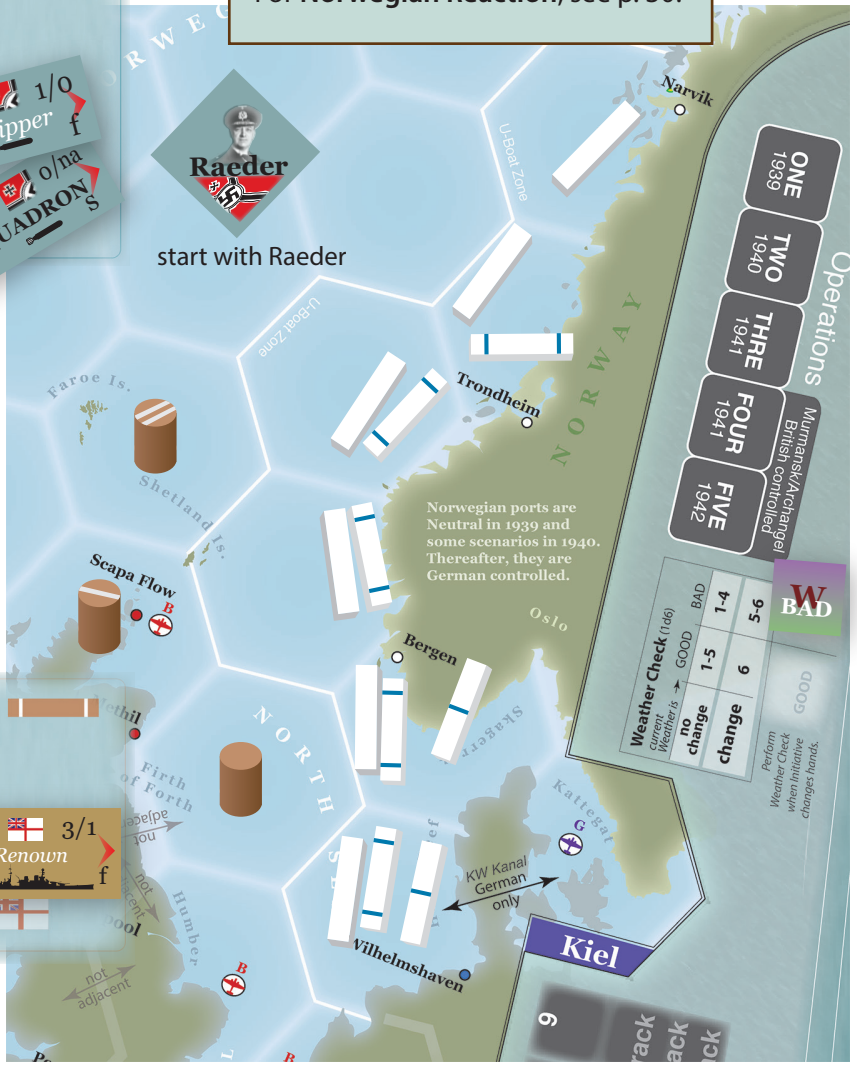

German **Convoys** and the **DD Squadron** are destroyed when they suffer 4 Hits. They can't disperse.

British Convoys
May not disperse. Are destroyed when they suffer 3 Hits.

The British use Forbes' leader benefit only during an **Engage** action.

For **Norwegian Reaction**, see p. 30.

© 2022 GMT Games, LLC

British Actions

When the British have Initiative, use the British Action Table to determine their actions.

Modifiers (British Action Table):
+**2** each damaged British ship
(count only those currently in play)
+**1** each sunk British ship
-**1** each Aggressive Norwegian Reaction

British Action Table

Number of successful German Completion actions	1d6 → 1 *or less*	2	3	4	5	6+
none	**R4**	convoy	mines	mines	mines	mines
1	**R4**	**X**	convoy	mines	mines	**C**
2	**R4**	**X**	**X**	**SA**	mines	**C**
3+	**X**	**X**	**X**	**SA**	**C**	**C**

Legend of Action Table Results:

C

COMPLETION ACTION to...?
Selection: Select a British TF with a Convoy. If none, select a TF with a Damaged ship. If none, perform an Air Strike action instead (if Bad Weather or no German TF in range, select the British TF with the **longest** Trajectory).

Action: Selected TF performs a Completion action. It may first need to perform a Trajectory action **avoiding Intel triggers** (if possible), using the most **direct** route.

Completion Where? The port where the selected TF attempts to complete depends on the nature of the TF, as follows: If the TF contains a Convoy it completes in Methil; all other TFs attempt to complete in Scapa Flow.

Time Lapse: Remove segments **farthest** from the port where it is attempting to complete.

After Completion action: IC

convoy

CONVOY
Selection: Select the British TF with a Convoy in it. If the R4 Action Table result was garnered previously, treat this as '**R4**' instead. If there is no British TF with a Convoy, create a new TF (Station) **in** Bergen (place a Convoy in it).

Action: Selected TF performs a Completion action in Methil. It may first need to perform a Trajectory action **avoiding Intel triggers** (if possible), using the most **direct** route. If prevented by Intel or Trajectory length, it Passes instead (it performs Time Lapse).

Time Lapse: Remove segments **farthest** from Methil.

After Completion action: IC

mines

BRITISH LAY MINES OR ESTABLISH AN AIR BASE.
Selection: Select a hex on the map (roll a die):

1d6 →	1	2-3	4-6
	Bergen	Trondheim	Narvik

Action: If the selected hex does not have a British Mines stealth force in it, place one (attach Intel markers to German TF segments in the hex). Then IC .
If it already has a Mines force, that force performs a Stealth Attack action against a German TF **in** its hex. If there is no German TF **in** its hex, or if it is unable to perform the action, place a British **air base** marker in the hex, then IC . If an air base marker (British or German) is already in the hex, place a **Contact** marker on the target instead (that is, attach it to a German Station or segment **in** the selected hex or **nearest** to that hex; if more than one German TF is 'nearest,' attach a Contact marker to all nearest TFs). Then IC

Air Base marker: Remove the marker when a German Convoy or DD Squadron successfully completes in the hex.

SA

STEALTH ATTACK.
First SA result: British perform Stealth Recon – place a Submarine in Bergen's hex (attach Intel markers to all German Trajectory segments in that hex).

Second SA result...and beyond:
Selection: Select the British Submarine stealth force. If not in play, select the British air base (or TF with CV) **nearest** a German TF.

Action: Submarine performs a Stealth attack (if the British maintain Initiative afterwards, they perform a Signals action targeting the **nearest** German Intel marker to Bergen). If no target, the British perform an All Pass. If no Submarine force is in play, the air base performs an Air Strike. If bad weather or no eligible target, the British perform an All Pass.

© 2022 GMT Games, LLC

R4

OPERATION R4.
The British launch an operation intended to capture Norway. The effect of this result depends on whether R4 has been garnered before.

First R4 Result...
Selection: Create two new task forces:
TF4: in Clyde/Liverpool (**Convoy** and 1 **CA**).
TF5: in Scapa Flow (*Furious* (**CV**), French **CL**, and a British **CA**).
If a German **DD Squadron** has not yet completed in Trondheim, create a third new British TF in Methil (**TF6** – **Convoy**).

Actions: TF4 and TF5 perform Trajectory actions to Narvik. TF6 (if in play) performs a Trajectory action to Trondheim. They take the most **direct** route while **avoiding Intel triggers** if possible.
Then: TF6 performs a Completion action in Trondheim, then *IC*. If not in play, or if not eligible due to Trajectory length or Intel attachment, TF4 performs a Completion action in Narvik (if not eligible, the British Pass instead and TF4 performs Time Lapse removing segments **farthest** from Narvik). Then *IC*

Second R4 Result...and beyond
Selection: Select a British TF with a Convoy. If more than one, choose a TF in Narvik. If no Convoy in play, select a TF with a **CV**. If none, treat as an '**X**' Action Table result instead.

Action: If a **Convoy**, the selected TF performs a Completion action in Narvik. If a British TF already successfully completed in Narvik, it will attempt to complete in Scapa Flow instead. If the selected TF has a **CV** in it, perform an Air Strike action (if Bad Weather, it performs a Completion action in Scapa Flow). The selected TF will take the most direct rout, regardless of Intel triggers.

Time Lapse: Remove segments **nearest** to Scapa Flow.

X

BRING ON BATTLE.
If **R4** result was garnered previously, roll a die: if EVEN, treat as an **R4** result, if ODD treat as an **X** result.

Selection: Select the British TF with Forbes. If Forbes is killed or has used his leader benefit, or is not in play, select the *Renown's* TF, or the TF with the largest combined Gun Values). If no British TF, create a new TF in Scapa Flow with 2 slow **BB**s (it is selected).

Action: First, remove all Damaged British ships (if this empties a TF, remove that TF from play). Then, selected TF performs actions designed to **bring to Battle** the German TF **nearest** to Narvik (if the target is a Trajectory, it targets its **nearest** segment, not necessarily the nearest to Narvik). **If no target, the scenario ends.**

Time Lapse: Remove segments **farthest** from the target hex (that is, the hex where the British are trying to bring on a battle).

Norwegian Reaction: German Completion Actions

When a German Convoy or DD performs a successful Completion action **in** a hex with Bergen, Trondheim, or Narvik, check for a reaction by rolling a die and referring to the Norwegian Reaction table below.

Norwegian Reaction

British TF **in** hex?	1d6 → 1 or less	2	3-4	5-6	7-8
YES	!	!	Hit Hit	Hit	–
NO	!	Hit	Hit	–	Initiative

Modifiers:
+1 if a German Convoy or DD already Completed in Norway;
+1 if one or more German **BC**, **CA**, or **CL** is **in** the hex;
-1 if a British Air Base marker is in Norway (**-2** instead if it is in the Completion hex);
-1 if one or more British TF **Station** is in the hex..

Legend of results...

–	No additional effect. This is not an Aggressive Reaction.
Hit	Convoy or DD suffers a Hit. This is an Aggressive Reaction.
Two Hits	Convoy or DD suffers two Hits. You may redirect one of the Hits to another German ship in the hex. This is an Aggressive Reaction.
!	The Completion action is **cancelled**. The German Convoy or DD suffers two Hits and it may only Complete in Kiel or Wilhelmshaven. This is an Aggressive Reaction. British have Initiative.
	Unless one is already in Norway, place a German Air Base marker in the hex. Remove all British Air Base markers from Norway (if any). Henceforth, no British Air Base markers may be placed in Norway. This is not an Aggressive Reaction.

Historical Note:
Admiralty concocted several schemes involving Norway: Wilfred, Hammer, and R4. Wilfred was intended to push German merchant traffic off the coast where British cruisers could intercept. Hammer was Churchill's plan to send the Home Fleet into the Skagerrak, or the Inner Leads near Bergen, to smash the Kriegsmarine. R4 was a contingency plan to invade Norway should it appear that the Germans were acting aggressively or that the Norwegians were in league with the Germans. None of these operations were conceived with the knowledge that Germany had actually initiated its invasion.

Damaged	**0**
Sunk	1

N4 Debriefing Table

VP	OUTCOME
15 +	***Operation Weser was successful.*** As the Wehrmacht launches its attack on Belgium, the Netherlands, and France, Britain is in a state of shock. Chamberlain is no longer Prime Minister and there are calls for Winston Churchill to replace him, but it was Churchill's ineptitude that led to the fall of Norway. A bitter and frantic political battle ensues in Parliament. Meanwhile, the French government urges its ally to send reinforcements across the Channel.
11-14	***Operation Weser was successful.*** If there is a British air base in Norway, reduce this outcome one row (to "The Battle for Norway us undecided"). If a Convoy or DD Squadron completed in either Bergen or Trondheim, the Germans now command the skies over Norway. German troops may not have secured every critical port, but it is only a matter of time. If a German BC was damaged or sunk, the Kriegsmarine will be unable to launch aggressive new operations for some time.
6-10	***The Battle for Norway is undecided.*** If German Convoys and the DD Squadron completed in Norway, the Germans have the upper hand. The invasion of France and the Low Countries may be delayed, in order to allow the Luftwaffe to continue to support the battle in Scandinavia. If only two Convoys completed, Trondheim has proven to be a tough stronghold, but its fate is clear. If a German Convoy did not complete in Narvik, the British may be able to hold out but only if there is a British air base there.
0-5	***What went wrong?*** If more German ships are damaged or sunk than British ships, Admiral Raeder's job may be in jeopardy. If both German Convoys failed to complete in Norway, Raeder is replaced. If a British Convoy completed in Narvik or Trondheim, the invasion of France is delayed. If three or more German ships are damaged or sunk, AND only one Convoy or DD Squadron completed in Norway, the invasion of France is called off until German forces on the ground are rescued by airlift.
-1 or less	***Disaster!*** If one Convoy and the DD Squadron completed successfully in Norway, the battle may still be won. If the British do not have an air base in Norway AND more British ships were damaged or sunk than German ships, AND neither German BC was sunk, Norway eventually falls to the Germans. Admiral Raeder is soon cashiered, however, and the invasion of France is postponed until July or August, or until the spring of 1941.

© 2022 GMT Games, LLC

N5: Better Late than Never

British player

As April gives way to May in 1940, the British come to realize the Germans invaded Norway. Caught flat-footed, Admiralty orders an aggressive response. Churchill wants to smash the German fleet that snuck German troops into Norwegian ports, and he also wants to establish a solid bridgehead in Narvik. That will serve as a base for future harassing attacks in Norway and check German schemes on Swedish territory. It may also prove an effective distraction from the main front sure to develop in Belgium and France. And yet, Admiralty must guard against the Kriegsmarine slipping into the North Atlantic. Britain's lifelines must be protected, and Britain herself guarded.

Objective

Complete Convoys in Narvik and Trondheim. Do not lose vital naval assets. Do not allow German raiders to slip into the Atlantic via the Denmark Strait.

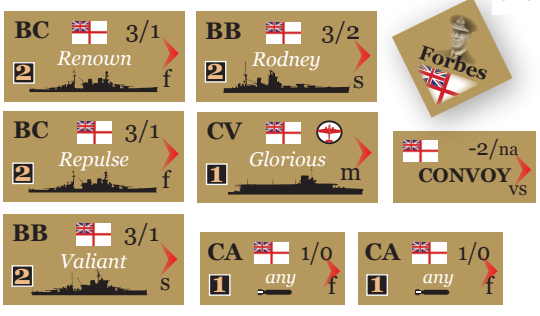

Set-Up

Weather: Bad
Initiative: British (the player)
Map: Norwegian Sea Inset Map

Task Forces: Organize these ships into two or more task forces (all TFs start in Scapa Flow). A Convoy may share a TF with only one other ship, a CA or a CL.

Reinforcement: Organize these ships into one or more Reinforcement Groups and place the Reinforcement Group markers in the Scapa Flow port box. When you bring in a Reinforcement Group (via a Reorganize action), keep track of the Reinforcement Points (RP) of the ships in the Reinforcement Group. RP will influence the Outcome (on page 35). The more ships you bring into play via reinforcement, the more strain you place on the Royal Navy elsewhere. ***Each ship = 1 RP***

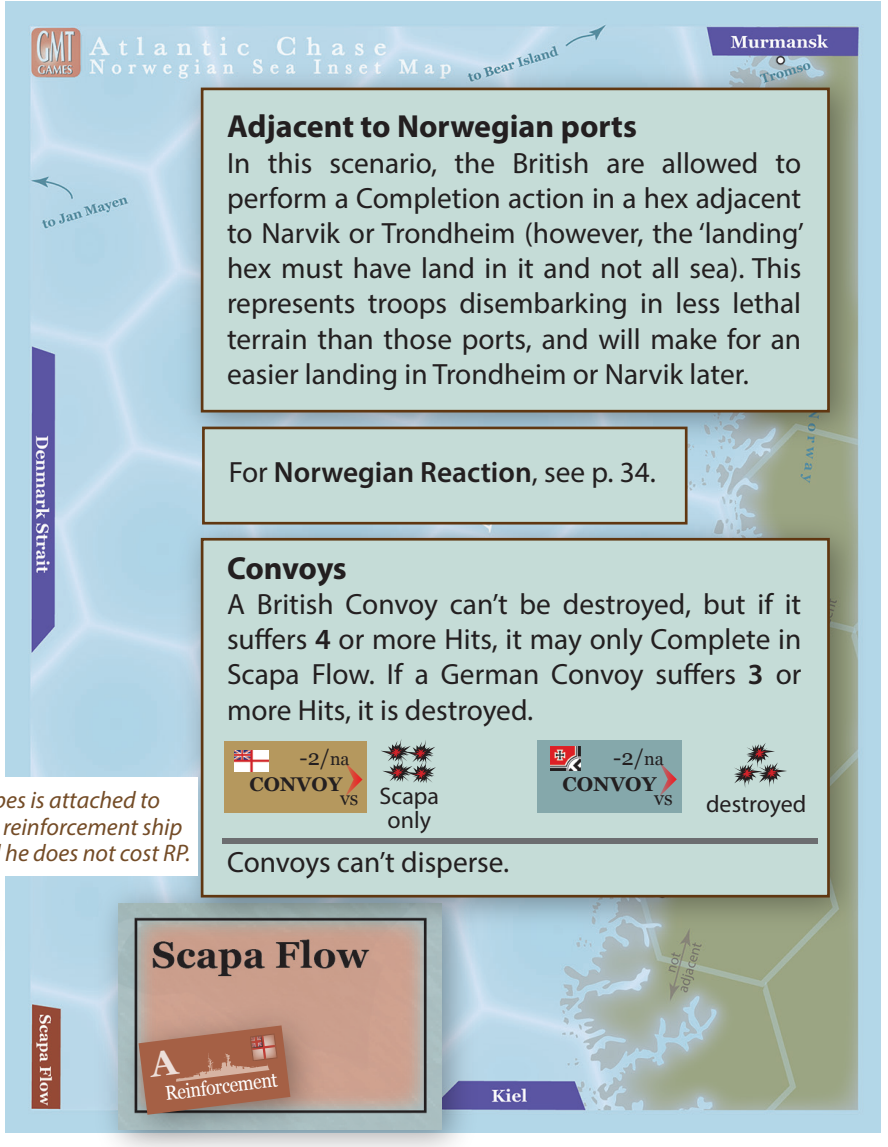

Forbes is attached to any reinforcement ship and he does not cost RP.

The End

The scenario ends when the British have no Task Forces in play.

The Enemy

No German TFs are in play at the start of this scenario. When they have a chance to Seize Initiative or take an Evasive Maneuvers marker, the Germans always elect to Seize Initiative.

© 2022 GMT Games, LLC

German Actions

When the Germans have the Initiative, use the German Action Table to determine their actions.

Modifiers (German Action Table):
+**2** each Damaged German ship in play;
+**1** each sunk German ship or destroyed Convoy or DD;
-**1** each German air base on map.

German Action Table

Number of successful British Completion actions in Norway	1d6 → 1 *or less*	2	3	4	5	6+
none	convoy	convoy	A	A	C	C
1	X	convoy	A	A	C	C
2+	X	X	A	A	convoy	C

Legend of Action Table Results:

A

AIR STRIKE.
Bad Weather? Place a German **Airbase** marker in Trondheim. If one is already there, place one in Narvik. If a German airbase is already in Narvik, place a **Contact** marker on one British TF in Air Strike range. Then, IC. *However, if a British Airbase marker is in the placement hex, remove the British marker and do not place a German marker there.*

Good Weather? If there is at least one German Airbase marker on the map, proceed to "Target" below. If no Airbase marker is on the map, place a German Air Base marker in Trondheim. Then, IC.

Target: Select a British TF in range of a German air base (if more than one target, choose the **shortest** Trajectory). If none in range, treat this as an '**X**' result instead.

Action: Perform an Air Strike targeting the selected British TF. If the Germans still have Initiative afterwards, roll again on the British Action Table.

C

COMPLETION ACTION.
Selection: Select a German TF with a Convoy. If none, select one with a Damaged ship. If none, select one with the longest Trajectory. If more than one to choose from, select the longest Trajectory. If no German TFs are in play, treat as a '**Convoy**' result instead.

Convoy: If the selected TF has a Convoy, it attempts to complete in Narvik (if successful, remove the TF and its ships). However, if a British Convoy already performed a successful Completion action in Narvik, the German Convoy attempts to complete in Trondheim instead. The TF may need to perform a Trajectory action first, and it will do so using the most **direct** rout and **avoiding Intel triggers** if possible. If a Completion action is prevented by Trajectory length or Intel markers, it performs a Pass instead.

Other Ships: If the selected TF does not have a Convoy, it attempts to complete in Kiel. The TF may need to perform a Trajectory action first, and it will do so using the most **direct** rout **avoiding Intel triggers** if possible.

Time Lapse: Remove segments **farthest** from the completion port.

After Completion: IC

convoy

CONVOY.
Selection: Select a German TF with a **Convoy** in it. If none in play, create a new TF in Kiel with a **Convoy** and a **DD Squadron** (3 Hits destroys the Convoy and 1 Hit destroys the DD Squadron). If a DD Squadron is already in play, place only the Convoy in the TF.
Action: The selected TF will attempt to perform a Completion action in a Norwegian port. To determine which port, roll a die:

1d6 →	0-3	4-6
	Trondheim	Narvik

Modifier: **-1** if British performed a successful Completion action in or adjacent to Trondheim.

The TF may first need to perform a Trajectory action, and will do so using the most **direct** route and **avoiding Intel triggers** if possible. If unable to perform a Completion action (due to Trajectory length or Intel marker), the TF will perform a Pass action instead.

Time Lapse: Remove segments **farthest** from its completion port.

After Completion: IC

X

BRING ON BATTLE.
Selection: First, remove Damaged ships from all German TFs (if this empties a TF, remove that TF from play). Then, select a German TF that does not have a Convoy in it. If none, create a new **unidentified** TF in Kiel.

Action: If the selected TF has a **BC** or **PB** in it, roll a die: if EVEN, it performs a Trajectory action to the **nearest** Denmark Strait port hex (**most direct route**). Then, a Completion action. If ODD or no BC or PB, the selected TF performs actions designed to **bring on a Battle** targeting the **nearest** British TF with a **Convoy**. If none in play, it targets the **nearest** TF. If the only target is a Station in Scapa Flow (or has but one segment and it is in Scapa Flow), this action is cancelled and the scenario ends.

Time Lapse: Remove segments **nearest** to Kiel.

© 2022 GMT Games, LLC

Identify German TF

Number of successful British Completion actions in Norway	1d6 → 1	2	3	4	5	6
none	**BC** **BC**	**PB** **CA**	**CA**	Convoy	Convoy	Convoy
1	**BC** **BC**	**BC** **BC**	**PB** **CL**	**CL** **CL**	**CA**	Convoy
2+	**BC** **BC**	**BC** **BC**	**BC** **BC**	**CL** **CL**	Convoy	Convoy

If two **BC**s are already in play, or were in play, treat a '**BC**' result as a '**CL**' result instead. If a Convoy is the result during an '**X**' Action Table result, treat as a '**CA**' instead.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the N5 Debriefing Table for the outcome.

Mission objectives... *apply to each British Convoy*

Convoy completed in Narvik?	VP
yes	**5**
no	-1

Convoy completed in Trondheim?	VP
yes	**3**
no	-2

Convoy completed adjacent to Narvik?	VP
yes	**1**

each TF	**-4**

each German Convoy?	VP
Destroyed	**3**
Completed	-1

Norwegian Reaction: British Completion Actions

When a British Convoy performs a successful Completion action **in** a hex with Trondheim or Narvik, or a hex adjacent to either port, check for a reaction by rolling a die and referring to the Norwegian Reaction table:

Norwegian Reaction

in or **adjacent** to Narvik or Trondheim?	1d6 → 1 or less	2-3	4	5	6+
IN	!	Hit Hit	Two Hits G	G	–
ADJACENT	!	Hit	G	–	B

Modifiers:

- **+1** if one or more British **BB** or **BC** is **in** the Convoy's hex;
- **+1** if previous successful British Completion action in or adjacent to the Convoy's hex;
- **+1** if previous successful British Completion action in Trondheim;
- **-1** if a German Airbase marker is in Norway (**-2** instead if it is in the Completion hex);
- **-1** if two or more German Convoys successfully Completed in Narvik.

Legend of results...

–	No additional effect.
Hit	Convoy suffers a Hit.
Two Hits	Convoy suffers two Hits. You may redirect one of the Hits to another British ship in the hex (the ship must be in a TF Station).
!	The Completion action is cancelled (the Convoy's TF performs Time Lapse). The British Convoy suffers two Hits and it must Complete in another hex (in Norway or Scapa Flow). Germans have Initiative.
B	Place a British Airbase marker in the hex. However, if a German Airbase marker is in Norway, remove that marker instead (if more than one, remove the **nearest** to the Completion hex).
G	If a British Airbase marker is in Norway, remove that marker (if more than one, remove the **nearest** to the Completion hex). If no British Airbase is in Norway, place a German Airbase marker in Trondheim. If already there, place in Narvik; if already in Narvik, perform an immediate Air Strike on the nearest British TF in range (if Bad Weather, attach Contact markers to all British TFs in range of all German Airbases.).

© 2022 GMT Games, LLC

N5 Debriefing

In this scenario, tally the VP to find the row on the Debriefing Table. Then, within that row, tally the RP spent on reinforcements to find the specific Outcome within the row. If no reinforcements were brought into play, the RP spent were 0 (zero). In general, the higher your Outcome (the higher the row), the more successfully you performed.

N5 Debriefing Table

VP	RP	OUTCOME
15 +	0-2	***Narvik is secure.*** If there are no German air bases in Norway, Trondheim may soon be in British hands too and the German invasion of the Low Countries may be postponed. If there is an air base in Norway, Narvik will require reinforcement. Soon the French government will clamour for British air support, but can the RAF also concentrate there while defending Narvik?
	3 +	***Narvik is in British hands.*** The bridgehead in Norway is safe, and Swedish iron ore will have to find another route to Germany. Soon, the Luftwaffe will pound Narvik, or Trondheim first if not already in German control, and the new Prime Minister will have to make a decision: funnel troops and planes into the Scandinavian front and let France defend herself, or give up on Trondheim and make good on Britain's pledge to support France in France. If more than 5 RP were spent, naval assets will have to be diverted to other places, leaving Narvik vulnerable.
8-14	0-3	***Norway is a battleground.*** If a British Convoy completed in or adjacent to Narvik, the battle in the north rages. If one completed in or adjacent to Trondheim, British forces may have the upper hand. If there are no German air bases in Norway, the tide has turned in Britain's favor. In either case, the Home Fleet will eventually have to reinforce the Norwegian Front.
	4-6	***The battle for Norway rages on.*** If a British Convoy completed in Narvik or adjacent to that port, and a German Convoy did not complete there, Narvik is in Britain's hands. If a British Convoy completed in Trondheim, the center of Norway is becoming a cauldron as the Luftwaffe rushes German assets there. If a German Convoy completed anywhere in Norway, or if there is a German air base in Norway, the invasion of France will not take place until June.
	7 +	***Britain has the advantage.*** If one or more British Convoys completed in Narvik or Trondheim, the German invasion of Norway has stalled. If the Germans go through with their blitzkrieg operation in France and the Low Countries, Churchill must make a tough decision: Divert the Home Fleet and other assets in Norway for France, or gamble that his French ally can hold off the Nazi assault. If a German Convoy completed in Narvik, the decision is easy. Churchill orders the evacuation of British troops, in order to send them to France (hopefully there is still time to stop the Germans in Flanders).
1-7	0	***The Battle for Norway is a defeat.*** Although the Home Fleet remains strong, it failed to challenge the Kriegsmarine. The new Prime Minister, Winston Churchill, is exasperated as he ponders the next move. If a German air base is in Norway, he has no choice but to risk the Home Fleet in a rescue operation. If no German air bases are in Norway, the invasion of France has begun and he needs whatever troops he can find. The Home Fleet is needed close to home, in the North Sea, so merchant vessels and cruisers will have to continue to do the job.
	1-4	***Norway is lost.*** If more British Convoys Completed than German Convoys, Churchill reluctantly orders the Home Fleet into the Norwegian Sea to ferry British troops back to Britain. This will be an impressive rescue operation and the new Prime Minister will do his utmost to present it as a moral victory. If more German Convoys Completed than British, then Churchill may be forced to abandon Norway altogether. If there is a German air base in Norway, the invasion of France commences and Churchill has little choice but to shift the Home Fleet into a defensive position. British troops still in Norway must do their best to weather the storm.
	5+	***Bring them home.*** Churchill must admit the operation failed. Germany has finally invaded France and the battle there is going poorly. The Home Fleet is ordered to transfer every asset on the ground and in the air to France. If one or more British BCs, BBs, or the CV is sunk, Forbes is replaced by Admiral John Tovey.
0 or less	any	***Disaster!*** Winston Churchill may not become the new Prime Minister. If one or more British BCs or BBs were sunk, and no German ships were sunk or damaged, Churchill is considered too rash. The memory of Gallipoli colors this lackluster British adventure in Norway, and he won't make his way to 10 Downing Street until France falls, and maybe not even then.

© 2022 GMT Games, LLC

N6: The Dilemma of Operations

British player

April, 1940. Although a decisive clash with the Kriegsmarine has yet to transpire, the Home Fleet is itching for its Jutland. The real job is mundane and maybe even dull: shepherding convoys bringing supplies to Britain. It must also interfere with Germany's iron ore shipments emanating from Narvik. Thus far, the Norwegian government maintains its neutrality, its patience tested by British minelaying efforts as well as Germany's penchant for taking harbor along its coast. Although all eyes are on the Belgian border where the land war will surely commence, Admiralty waits for Germany to strike north instead. *Unlike previous scenarios, **N6** does not presume Germany has, or will, invade Norway.*

Objective

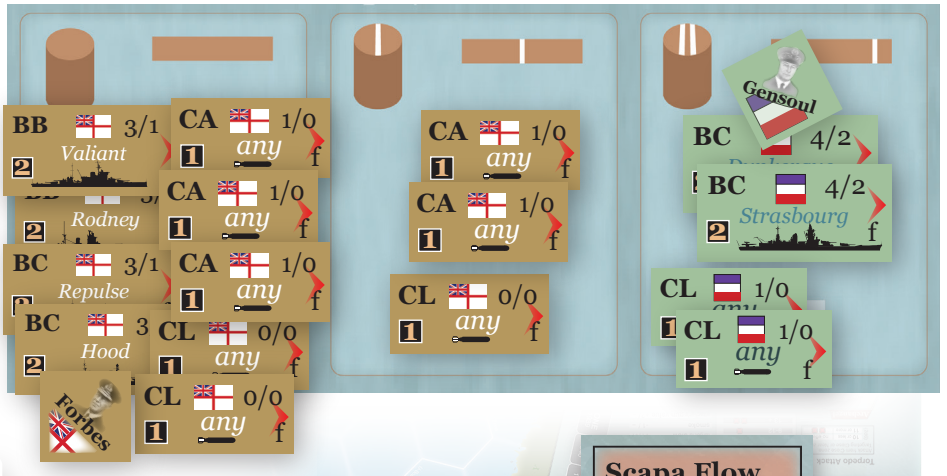

Complete Convoys while preventing German raiders from breaking into the Atlantic and intercepting British convoys. It is also imperative that you prevent Germany from invading Norway. Allowing the Kriegsmarine access to Norway's ports will prove devastating to future operations.

Set-Up

Weather: Good
Initiative: Germany (the enemy)
Map: Operations Map

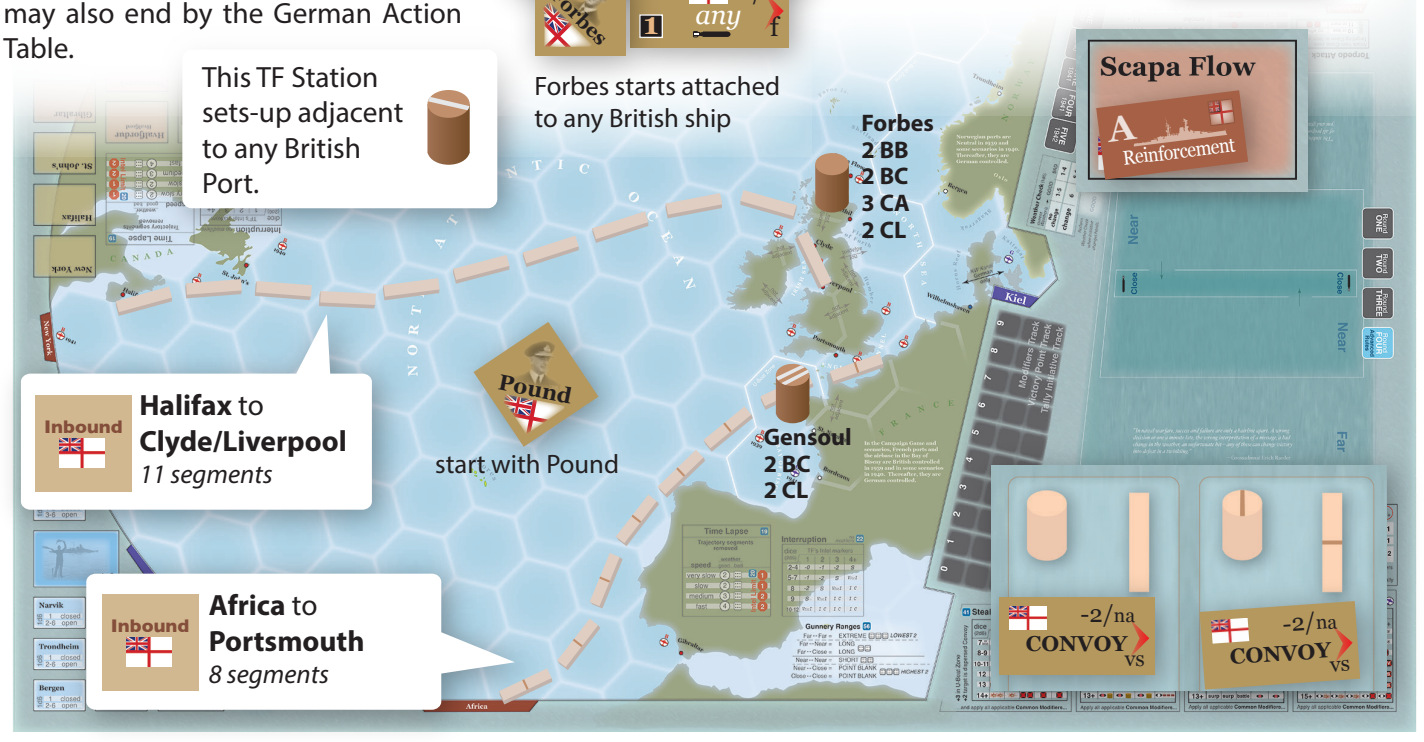

The End

The scenario ends when two British Convoys successfully Complete. However, if Norway is invaded (see p. 38), the scenario ends only after three British Convoys have Completed (the third is a reinforcement, and may only Complete in Norway or Scapa Flow). It may also end by the German Action Table.

Forbes starts attached to any British ship

This TF Station sets-up adjacent to any British Port.

Convoys

No Convoy may disperse. A **German Convoy** is destroyed if it suffers **4** or more Hits. If you run out of German Convoys, substitute with a DD Squadron OR AO Tanker (reference to "Convoy" apply to them). **British Convoys** can't be destroyed, and are not allowed in a TF with another ship. If one suffers **3** or more Hits, it may not Complete in Norway.

© 2022 GMT Games, LLC

Reinforcement

The *Furious* starts as Reinforcement Group A (Scapa Flow), but you may get an additional reinforcement as the scenario progresses. See "Invasion Norway" on p. 38.

German Actions

The Germans do not start with a Task Force in play. When they have the Initiative, use the German Action Table to determine their actions.

Modifiers (German Action Table):
+**1** each Damaged German ship in play;
-**1** each German Air Base marker in Norway.

German Action Table

German Convoy Completed in Norway?	1d6 → 1 or less	2	3	4	5	6+
YES	**X**	**X**	**T**	**A**	**A**	**C**
NO	**X**	**T**	**T**	**A**	**C**	**C**

Legend of Action Table Results:

A AIR STRIKE ACTION.
Good Weather: Select a German Airbase in range (2 hexes) of a British target (a British Station or segment). If more than one target, select the one **nearest** Bergen. If none in range, place a German Airbase marker in Bergen (if already there, place another in Trondheim; if already there too, treat as a '**T**' result instead).

Bad Weather: Treat as an '**X**' result instead.

After placing airbase marker: *IC*

C COMPLETION ACTION.
Selection: Select a German TF with a **Convoy**. If none, select the **longest** Trajectory. If no German TF is in play, treat as an '**A**' result (if Bad Weather, create a new TF in Wilhelmshaven instead and place a German **Convoy** and another ship in it (roll a die: 1-2 = **CA**; 3-4 = **CL**, 5-6 = two **CL**s; this TF is the selected TF for this Completion action).

Action: Selected TF performs a Completion action. It may first need to perform a Trajectory action **avoiding Intel triggers** (if possible), using the most **direct** route. If Completion is prevented by Intel markers or Trajectory length, the TF performs a Pass action.

Completion Where? The port where the selected TF attempts to complete depends on the nature of the TF, as follows: If the TF is **unidentified**, it attempts Completion in South America or Murmansk, whichever is closer. All others attempt to complete in Wilhelmshaven. However, If the TF contains a **Convoy,** roll a die and find the destination port in this table.

Time Lapse: Remove segments **farthest** from the port where it is attempting to complete.

After Completion action: Remove the TF from play. If the Completion port is in Norway, roll a die: if EVEN place a German Airbase marker in the hex (if it already has one, immediately apply an '**A**' action table result. If ODD, no additional effect. Then *IC*.

T TRAJECTORY ACTION.
If 2 German Convoys Completed in Norway, the scenario ends.
Selection: First, remove all Damaged German ships (you don't earn VP for them) (if this empties a TF, remove that TF from play). Then, select a German **Trajectory** (if more than one, select the one **nearest** Narvik). If none in play, select a German **Station** (if more than one, select the one **nearest** Wilhelmshaven). If no TF is in play, create and select a new **unidentified** German TF. Place the new TF in Wilhelmshaven.

Action: The selected TF performs a Trajectory action. Extend or create a new Trajectory. Roll a die and find the hex extended to in the appropriate column of the German Trajectory Table (if a Convoy, use the Convoy row):

German Trajectory Table

TF's current Trajectory length?	1d6 → 1	2	3	4	5	6
0-7 segments	Narvik		Jan Mayen		Azores	nearest Br. TF
8+ segments	Azores		South America		nearest Brit. Convoy	
Convoy	Bergen	nearest Norway port		Trondheim		Narvik

If the selected TF has a Convoy in it, use the bottom row, labeled "Convoy," regardless of Trajectory length.

'**T**' is continued on p. 38

© 2022 GMT Games, LLC

The selected TF takes the most **direct** route while avoiding British airbases and ports. If avoiding them is impossible, treat as a '**C**' German Action Table result instead using the already selected TF.

15 Segments already? If the selected TF already has 15 segments in its Trajectory, the Germans Pass instead (select this TF for Time Lapse and remove segments farthest from Wilhelmshaven).

After the Trajectory action: Roll a die and apply the result in the '**T – Second Action' table**:

T cont.

T – Second Action

1d6 →	1	2	3	4	5	6
Convoy in TF	a	a	a	a	b	c
no Convoy in TF	d	d	e	e	e	f

Legend of results...

a The TF performs a Completion action in the nearest Norwegian port. If prevented due to Intel attachment or Trajectory length, it Passes instead.

b If the Convoy has one or more Hits, it performs a Completion action in Kiel. If no Hits, it performs a Completion action in Narvik. The TF may need to perform a Trajectory action first. If the Completion is impossible due to Intel attachment or Trajectory length, it Passes instead.

c Same as '**b**' except it performs Completion in Kiel only if the Convoy has 2 or more Hits.

d If in a hex with a British TF, the selected TF attempts to **bring on battle** with it. If more than one target, select nearest to Narvik. If not in a hex with a British TF, roll again on the German Action Table.

e If the Selected TF's Trajectory length is **5** or less, place a German **Convoy** and **CL** in the TF, and apply a '**C**' German Action Table result with this TF as the selected TF. If the length is **6** or more, treat this as an '**X**' German Action Table result (this is automatically the selected TF).

f If the selected TF is **unidentified**, place a Convoy in it, then *IC*.
If identified, treat this as an '**X**' German Action Table result (this is automatically the selected TF).

INTERCEPT.
If 3 or more German ships have been sunk or destroyed, including Convoys, the scenario ends.
Selection: Select a German TF. It may not have a **Convoy** in it nor a Damaged ship (if the only TF has a Convoy or damaged ships, create an **unidentified** TF in Kiel). If more than one TF to choose, select the one **nearest** Narvik. If none in play (or none can be selected), create a new **unidentified** German TF in Kiel (it is the selected TF).

X

Action: The selected TF performs actions intended to **bring to Battle** a British TF.

Target TF: The selected TF will attempt to engage the **nearest** British **Convoy** (if more than one, select the one with the longest Trajectory. The selected German TF will avoid all Intel triggers. If there are no British **Convoys** in play or it is impossible to target the Convoy without triggering Intel, the selected German TF targets a British TF nearest Narvik (with or without a Convoy) (however, the selected German TF will not place a segment in a hex with a British port or air base). If all British TFs in play are in Port Boxes or none can be targeted, treat as an '**A**' German Action Table result instead.

Time Lapse: Remove segments **farthest** from the target hex.

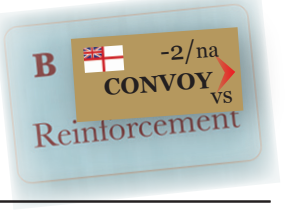

Identify German TF

1d6 →	1	2	3	4	5	6
Good W	BC BC	PB CA	PB	CA	Convoy	Convoy
Bad W BAD	BC BC	BC BC	PB CL	PB CL	CA	Convoy

If two **BC**s are already in play, treat a '**BC**' result as a '**CL**' result instead. If a Convoy is the result during an '**X**' Action Table result, treat as a '**CA**' instead.

Invasion Norway

If a German Air Base marker is placed in Norway, the Germans are invading that country. It affords you a new reinforcement: a Convoy. Place its Reinforcement Group marker (B) in Methil. It may only complete in Narvik. If the Completion action is successful, make a **Reaction Check** (p.39). If it suffers 3 or more Hits, it may only Complete in Methil.

© 2022 GMT Games, LLC

Norwegian Reaction:
British Completion Action in Norway

When a British Convoy performs a successful Completion action **in** a hex with Trondheim or Narvik, or a hex adjacent to either port, check for a reaction by rolling a die and referring to the Norwegian Reaction table below.

Reaction Table

1d6 →	1 or less	2	3	4	5+
	!	2 Hits	Air Base (G) + Hit	Air Base (G)	–

Modifiers:

+1 if one or more British **BB** or **BC** is **in** the Convoy's hex;

-1 if a German Air Base marker is in Norway (**-2** instead if it is in the Completion hex).

Legend of results (Reaction Table)...

Hit — Convoy suffers a Hit.

Two Hits — Convoy suffers two Hits. You may redirect one of the Hits to another British ship in the hex (the ship must be in a TF Station).

! — The Completion action is cancelled. The British Convoy suffers two Hits and it must Complete in Scapa Flow. Germans have Initiative.

G — Place a German Air Base marker in Trondheim. If already there, place in Narvik; if already in Narvik, perform an immediate Air Strike on the nearest British TF in range (if Weather is Bad, apply an '**X**' German Action Table result).

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the N6 Debriefing Table for the outcome.

Admiralty...

Each Completed British Convoy	VP
Clyde/Portsmouth	**3**
Narvik	5
Scapa Flow	1

Each Hit on a Convoy	VP
British	**-2**
Each sunk British ship	**-2**

The Germans...

German Air Base in Norway?	VP
yes	**-1**
no	2

each German Convoy or ship	VP
Sunk (ship)	**2**
Damaged (ship)	1
destroyed (Convoy)	3

N6 Debriefing

In this scenario, tally the VP to find the row on the Debriefing Table. In general, the higher your Outcome (the higher the row), the more successfully you performed.

N6 Debriefing Table

VP	OUTCOME
9 +	***Command of the Sea.*** The Home Fleet is capable of protecting convoys as they ferry supplies and material to Britain. If the British reinforcement Convoy completed in Norway, the German invasion has been contested (and if the VP score is **12** or more, the tide is likely to turn against the Germans. Their invasion of France is delayed).
6-8	***Victory at Sea.*** If two British Convoys completed, the Germans remain idle or ineffective. If three completed, the Germans have the upper hand both at sea and in Norway. If no German ships were sunk or if a German airbase is in Norway, Forbes will soon clear out his desk to make way for a more capable successor. (A *German* victory at sea.)
4-5	***Contested Sea.*** If a British Convoy was Hit, the Germans are learning that Britain's supply line is vulnerable. If a German ship was sunk, however, Admiral Raeder is reluctant to risk more assets on such a venture. If the British completed three Convoys, but none in Narvik, the Germans managed to secure Norway.
3 or less	***Lost at Sea.*** Prime Minister Chamberlain must inform the public that more merchant ships have been lost at sea. It becomes clear that the German surface fleet is capable of eluding the Home Fleet and striking where Britain is most vulnerable. Chamberlain must also inform his French allies that Britain's priority must be home defense. If three British Convoys completed, Winston Churchill's Norwegian Adventure reminds the public of his Gallipoli Debacle in the previous war. It is doubtful he will be moving into 10 Downing Street any time soon.

‘B’ Scenarios: Breakout

These scenarios explore the operations after the fall of Norway and France, and after the Battle of Britain. Britain struggles to hold its far-flung empire together while the Kriegsmarine risks its precious assets to disrupt Britain’s supply chain. It fights alone, but Germany will soon embroil itself in a war with its ally to the east. Although no one could know it then, Germany has precious little time left to bring Britain to her knees.

Historically, Germany’s chief weapon against Britain’s convoy was the U-Boat. During this period, it wreaked havoc, bedeviling Admiralty’s attempts to contain that menace. Winston Churchill, Prime Minister by then, was vexed by those underwater wolves. He also was frustrated by the “Folkewolf,” the long-range Condor bombers that served as the eyes of the Kriegsmarine and managed to literally fly circles around the British Isles during its depredations against merchant shipping. These were two lethal dangers, but there was a third. Churchill feared that Germany’s modern surface vessels would become another prong in the assault on Great Britain’s nautical lifeline. Had the Kriegsmarine’s surface raiders, its battlecruisers and new battleships, supported by cruisers, materialized as a force in 1941, Churchill believed it would tip Britain over a precarious edge. All three prongs of Germany’s attack would have been unanswerable. Fortunately for Britain, it faced that third prong only in dribs and drabs, and managed to contain each sortie with at least mixed results, ultimately fighting a war of nautical attrition Germany had no hope of lasting.

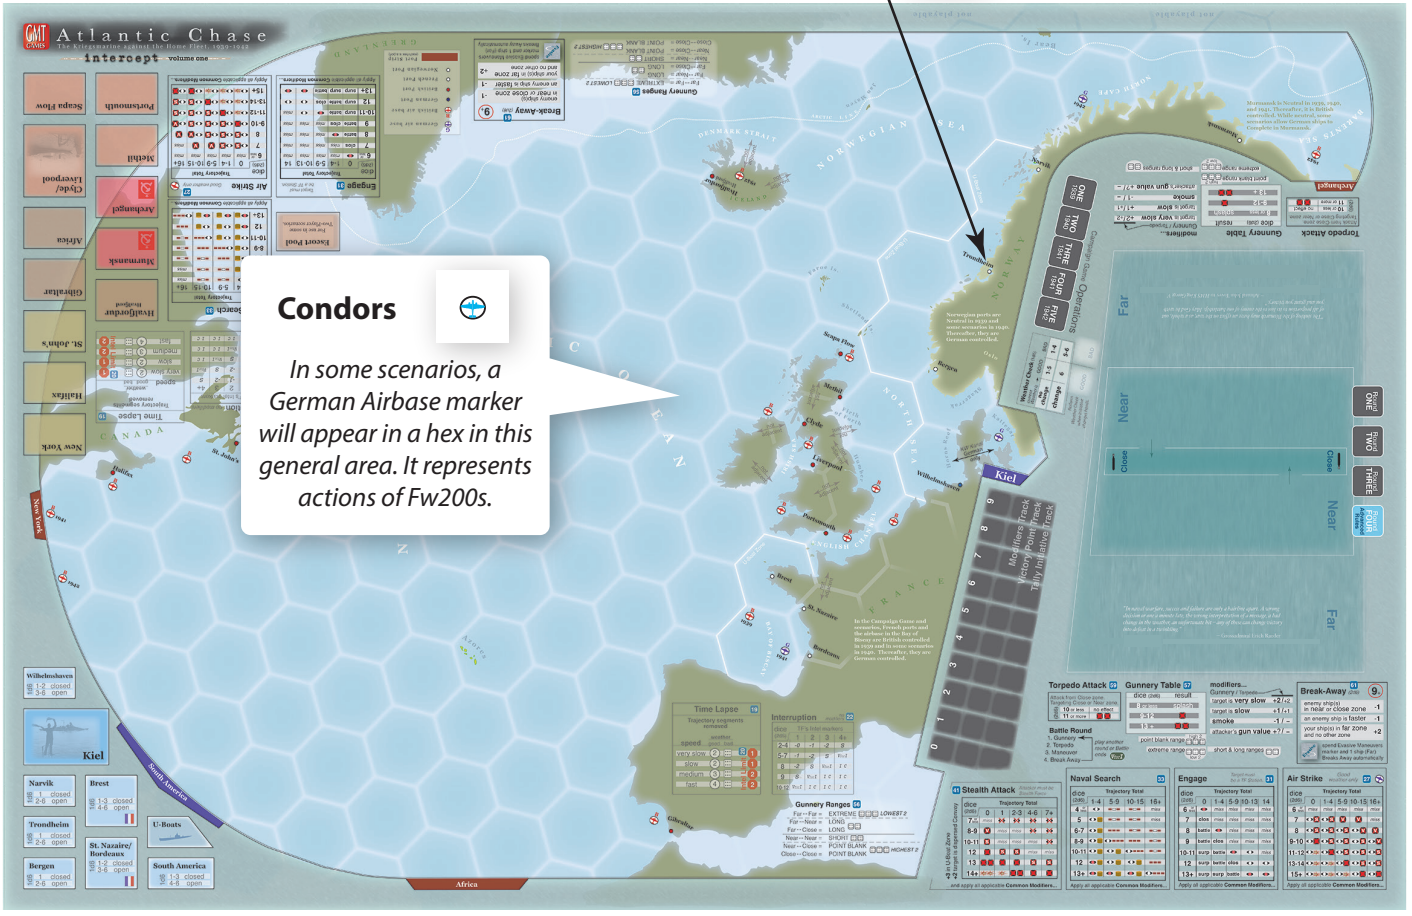

Norway and France

Norway is controlled by Germany. Its ports are German, hostile to Britain (they are Intel triggers for British TFs). France too has been overrun by Germany, and its ports and airbases are German (they are Intel triggers for British TFs). Norwegian and French ports are all friendly to Germany, and connected to port boxes for German Task Forces. In these scenarios, a German Airbase marker will start in Trondheim.

Operations Map

These scenarios use the Operations Map on the game board.

German Airbase in Trondheim

© 2022 GMT Games, LLC

B1: Operation Berlin

German player

March 1941. Grossadmiral Erich Raeder has finally ordered the Kriegsmarine's two modern battlecruisers to perform a forceful sortie into the North Atlantic. This is Germany's chance to cripple Great Britain.

Objective

Strike British Convoys hard, but do not lose a **BC** in battle. Return the battlecruisers to French ports.

Set-Up

Weather: Good
Initiative: German (the player)
Map: Operations Map (game board)
Enemy: British TFs start as indicated.
RV markers: Place 3 Rendezvous markers as shown.

Rendezvous Markers

These markers have no effect on play except when a German TF Station is in a hex with one of them. When you have Initiative, and a German TF is in a hex with a marker, make a Fueling Check (roll a die and apply the result on the **Fueling Table**, p. 42).

British Convoys

When performing an Engage action targeting a British Convoy, and it results in Battle, make an Escort Check (p. 44). Convoys may not be destroyed, and they disperse when they suffer 3+ Hits.

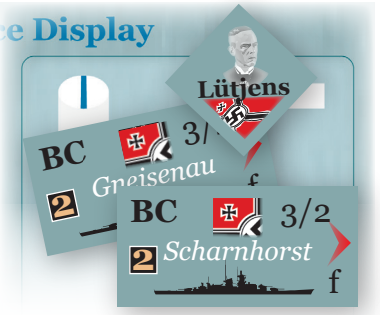

The End

The scenario ends when two or fewer Rendezvous markers remain and the Germans have no Task Forces in play. It may also end as a result of the British Action Table.

Reinforcement

The *Hipper* starts in Reinforcement Group A in Brest. If you bring the *Hipper* into play, VP will be deducted.

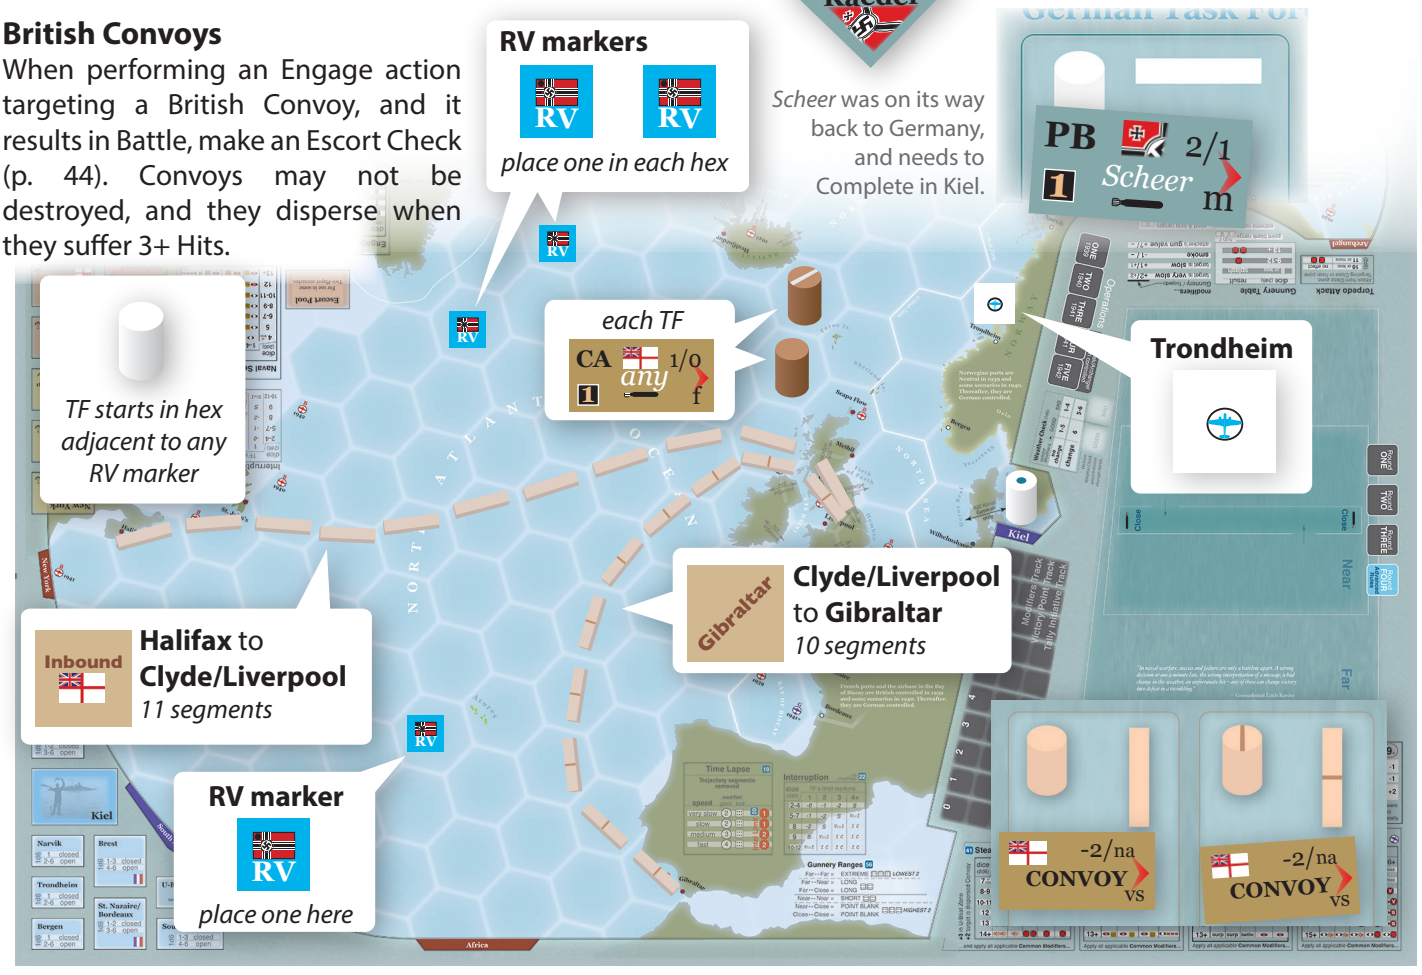

start with Raeder

start with Lutjens attached to *Gneisenau*

Scheer was on its way back to Germany, and needs to Complete in Kiel.

© 2022 GMT Games, LLC

Fueling Check

When you have Initiative, if a German TF is in the same hex as a Rendezvous marker and the TF is a Station, you must roll a die and apply the result on the Fueling Table. Unless noted otherwise by the Fueling Table result, you maintain Initiative after the check.

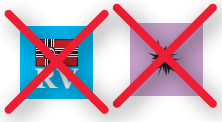

Clarification: A Fueling Check can't happen during a Pass action's Time Lapse.

Fueling Table

1d6 →	1	2	3	4	5	6
Good W	a.	b.	c.	d.	d.	e.
Bad W BAD	a.	c.	e.	f.	f.	g.

A Fueling Check represents the TF rendezvousing with another ship or U-Boat at a pre-arranged location and time. Operation Berlin *was a six week voyage facilitated by these encounters.*

Legend of Fueling Table Results:

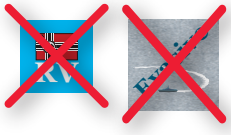

a. 

Remove the RV marker. Remove (repair) one Hit from one German ship in the TF.

New Objective: Proceed to Norway. Henceforth in this scenario, the only German port this TF may attempt Completion is Narvik. The TF is not permitted to perform Reorganize actions (Split or Merge), and it may not perform another Fueling Check. *The ship has been ordered to Narvik because the Fuhrer is convinced Norway will soon be invaded.*

British TF in hex? If a British TF is **in** the hex, an airplane is spotted. Attach a Contact marker to the German TF. Then, IC

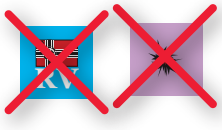

b. 

Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

News: The *Hipper* may enter play without VP penalty (that is, if you perform a Reorganize action and bring the *Hipper* into a new TF in Brest, you will not be penalized). *The Luftwaffe's increased assets in France has protected the Atlantic ports effectively and repairs on the cruiser are complete.*

British TF in hex? If a British TF is **in** the hex, and it is a **Station**, attach a Contact marker to the German TF.

c. 

Remove the RV marker. Remove (repair) one Hit from one German ship in the TF.

d. 

Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

New Objective: The only actions this TF is permitted is Trajectory, Completion, and Pass. The TF may only Complete in Wilhelmshaven, Kiel, or Brest. You may not attach an Evasive Maneuvers marker to this TF. *The ship has developed severe mechanical problems.*

British TF in hex? If a British TF is **in** the hex, VforI

e. 

Good Weather

Remove the RV marker. If Good Weather, also remove an Evasive Maneuvers marker from the German TF (if it has one).

British TF in hex? If Good Weather and a British TF is **in** or adjacent to the hex, attach a Contact marker to the German TF.

Good Weather

f. 

Remove the RV marker. There is no other effect.

g. Shift the RV marker to an adjacent hex (your choice).

British TF in hex? If a British TF is **in** the hex with your TF, VforI

move 1 hex

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of successful British Completion actions involving Convoys.

If a German TF is in a hex with a British Airbase, do not roll a die. Instead, the British perform an Air Strike action targeting that TF, and if Bad Weather, apply an '**X**' result instead.

British Action Table

Number of successful British Convoy Completion actions	1d6 → 1	2	3	4	5	6-7
0	**A**	**A**	**X**	**X**	**C**	**C**
1	**A**	**A**	**X**	convoy	**C**	**C**
2+	**E**	**E**	**A**	**X**	convoy	**C**

Modifier: **+1** if a British BB, BC, or CV in play is Damaged

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: If the Weather is Bad, remove all Damaged British ships (if this empties the TF remove it). Then, roll a die. If **EVEN**, treat as an '**X**' result; if **ODD**, treat as a '**Convoy**' result.

Good Weather: If the Weather is Good, perform an Air Strike targeting a German TF in range of a British Airbase or TF with a **CV** (select the target that will give the British the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike, select a TF with a **CV** in it. If none in play, roll a die: if **EVEN** select the **nearest** TF with a **CA** in it (nearest to a German TF) (if none in play, create a TF in Scapa Flow and place 4 **CA**s in it); if **ODD** create a new TF in Gibraltar (place a slow **BB**, 2 **CA**s, and **CV** in it). The selected TF performs actions intended to bring to battle the **nearest** German TF. The British TF will not enter a hex in German air support range, nor a German port (if no alternative, treat as a '**Convoy**' British Action Table result).

Time Lapse: Remove segments **farthest** from the German TF.

C

COMPLETION ACTION

Remove Damaged British ships (if this empties a TF, remove it).

Selection: Select a British TF with a **Convoy** (f more than one, select the **shortest** Trajectory). If no Convoy is in play, roll a die: if EVEN, treat as a '**Convoy**' British Action Table result; if ODD, treat as an '**A**' result.

Action: Selected TF attempts to Complete in Clyde/Liverpool or Gibraltar, depending on its destination. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers,** if possible; it will not enter a hex in German air support range). If prevented from performing Completion due to Intel markers or Trajectory length, the British Pass instead (the selected TF performs Time Lapse; remove Intel marker if possible).

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: IC

convoy

CONVOY.

Completion: If a British TF with a Convoy is in play, treat this result as '**C**'. If no Convoy is in play, roll a die: if **EVEN**, create a new TF in New York (it contains one Convoy); if **ODD**, create a new TF in Africa (it contains one Convoy).

Action: The new TF performs a Trajectory action to Clyde/Liverpool (its destination port) (most **direct route while avoiding Intel triggers**).

After Trajectory action: roll again on the British Action table.

E

END?

Bad Weather: If the Weather is Bad, remove a Rendezvous marker from the Operations Map. If none in play, the scenario ends.

Good Weather: If the Weather is Good, roll a die: if **1**, remove a Rendezvous marker from the Operations Map (if none in play, the scenario ends) then roll again on the British Action Table; **2-4**, treat as an '**X**' British Action Table result; if **5-6**, treas as an '**A**' result.

X

INTERCEPTION

End? If three British Convoys have successfully Completed, the scenario ends.

Select TF: Remove all Damaged British ships (if this empties a TF, remove it). Then, select a British TF with a **BB** or **BC** in it (if more than one, select the **nearest** to a German TF; the TF may not have a Convoy in it). If none in play, select an **unidentified** TF (if none in play, create one in Scapa Flow).

Action: The selected TF performs actions intended to **Bring to Battle** the **nearest** German TF, avoiding German ports and airbases, and unless Bad Weather, German air support range. If no eligible target, treat as a '**Convoy**' British Action Table result.

Time Lapse: Remove segments **farthest** from the target hex

© 2022 GMT Games, LLC

Unidentified British Ships

When an unidentified British Task Force's ships must be transferred to the Battle Board, roll a die to identify its ships. Also do this if an Air Strike scores a Hit on a British Task Force (, , or). If a **BB** is selected, it should be **slow**.

Identify British Ships

1d6 →	1-2	3	4	5	6
	BB **BC** **CA**	**BC** **CA** **CA**	**BC** **CA** **CL**	**CV** **CA** **CA**	**CL** **CL** **CL**

If the result is **BB**, select the *Nelson* or the *Rodney*, if not already in play.

Escort Check

Each time a British Convoy is shifted to the Battle Board as the result of an Engage action, roll a die and apply the result in this table. After Battle, the escort remains in the TF, unless removed later as indicated by this table.

1d6 →	1 or less	2	3-4	5	6
	Add a slow **BB** to the TF.	Add a **CA** to the TF.	No escort. Remove all but the Convoy.	Add a **DD** to the TF (requires 3 Hits to sink). Remove at conclusion of Battle.	Remove a **BB** from the Convoy's TF (if any).

Modifier: **-1** if 3-4 Hits already scored on Convoys; **-2** if 5 or more Hits already scored on Convoys

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the B1 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:	VP
no Hits	**0**
1-4 Hits	3
5-9 Hits	6
10+ Hits	10

Each German ship?	VP
sunk	**-5**
damaged	-3

PB in Kiel or Wilhelmshaven?	VP
yes	**1**
no	-3

Hipper entered play?	VP
yes	**-3**
no	0

If a Fueling Check garnered a **b.** result, the VP for this is zero.

Each **BC** in a French port?	VP
yes	**1 each**
no	-1 each

If a Fueling Check garnered an **a.** result, Narvik instead.

British disposition...

Each British ship...?	VP			
	BB/BC	**CV**	**CA/CL**	**Convoy**
no Hits	**0**	**0**	**0**	**0**
Damaged (include removed ships)	**1**	0	0	–
Sunk	**2**	**1**	0	–
Completed	0	0	0	**-2**
Completed (dispersed)	–	–	–	**-1**

B1 Debriefing Table

VP	OUTCOME
9 +	***Excellent!*** Grossadmiral Raeder is ecstatic to report a perfectly executed operation. On the radio, the Fuhrer announces a great victory, insisting Churchill is losing the war.
6-8	***Operation success.*** If the **BC**s are in a French port, undamaged, Raeder is happy to report a successful operation. Once the *Bismarck* is operational, there will be a coordinated sortie. If one or more **BC**s are damaged, or not in a French port, that sortie will be postponed.
1-5	***Attrition.*** Grossadmiral Raeder is not encouraged by the reports. If **5** or fewer Hits were scored on Convoys, it is clear this strategy is untenable. If both **BC**s are undamaged, he argues that more assets are required to do the job. If one was Damaged or sunk, the Fuhrer refuses to release the *Bismarck*.
0 to **-5**	***What went wrong?*** No more German ships will be released for raids in the Atlantic. If a German **BC** was sunk, Raeder pens his resignation letter, hoping the Fuhrer will not make an example of him.
-6 or less	***Catastrophe!*** The Fuhrer is furious to hear Churchill on the radio: "The great contest on the high seas is being won by the Royal Navy..."

© 2022 GMT Games, LLC

B2: Battle of the Atlantic

British player

Spring 1941. Britain is alone and wages a far-flung war stretching her naval assets thin. The Kriegsmarine now has access to Norwegian and French ports, from which it will soon be able to sortie surface raiders targeting vulnerable convoys. The Battle of the Atlantic is approaching a critical phase.

"The Admiralty, with whom I lived in the closest amity and contact, shared these fears, all the more because it was their prime responsibility to guard our shores from invasion and to keep the life-lines open to the outer world. This had always been accepted by the Navy as their ultimate, sacred, inescapable duty. So we poised and pondered together on this problem. It did not take the form of flaring battles and glittering achievements. It manifested itself through statistics, diagrams, and curves unknown to the nation, incomprehensible to the public."

- Winston Churchill, Their Finest Hour

Objective

Your primary objective is to bring Convoys into port, unscathed. If the opportunity presents itself, sink enemy ships.

Set-Up

Weather: Good
Initiative: British (the player)
Map: Operations Map (game board)
Enemy: no German TFs at start.

Convoy restrictions

Convoys can't be destroyed but they may disperse 11. A Convoy may share its TF with only one other ship, and that ship may not be another Convoy.

The End

The scenario ends when three Convoys have successfully Completed in their destination ports.

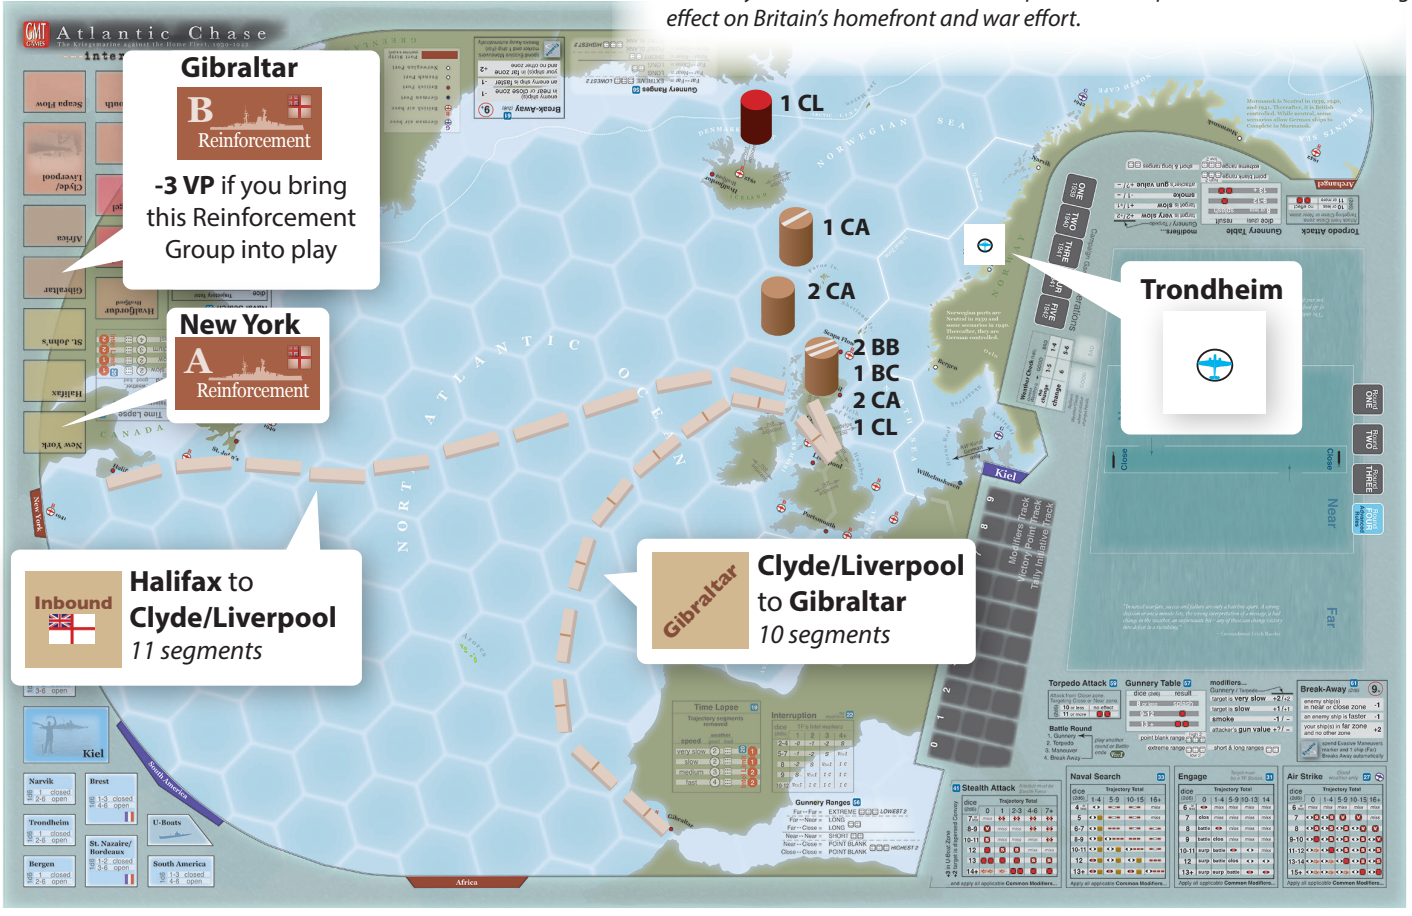

Rationing

When the Germans make a Weather Check, if the total number of Trajectory segments of TFs with Convoys in them is **3 or less**, the British lose **1 VP**.

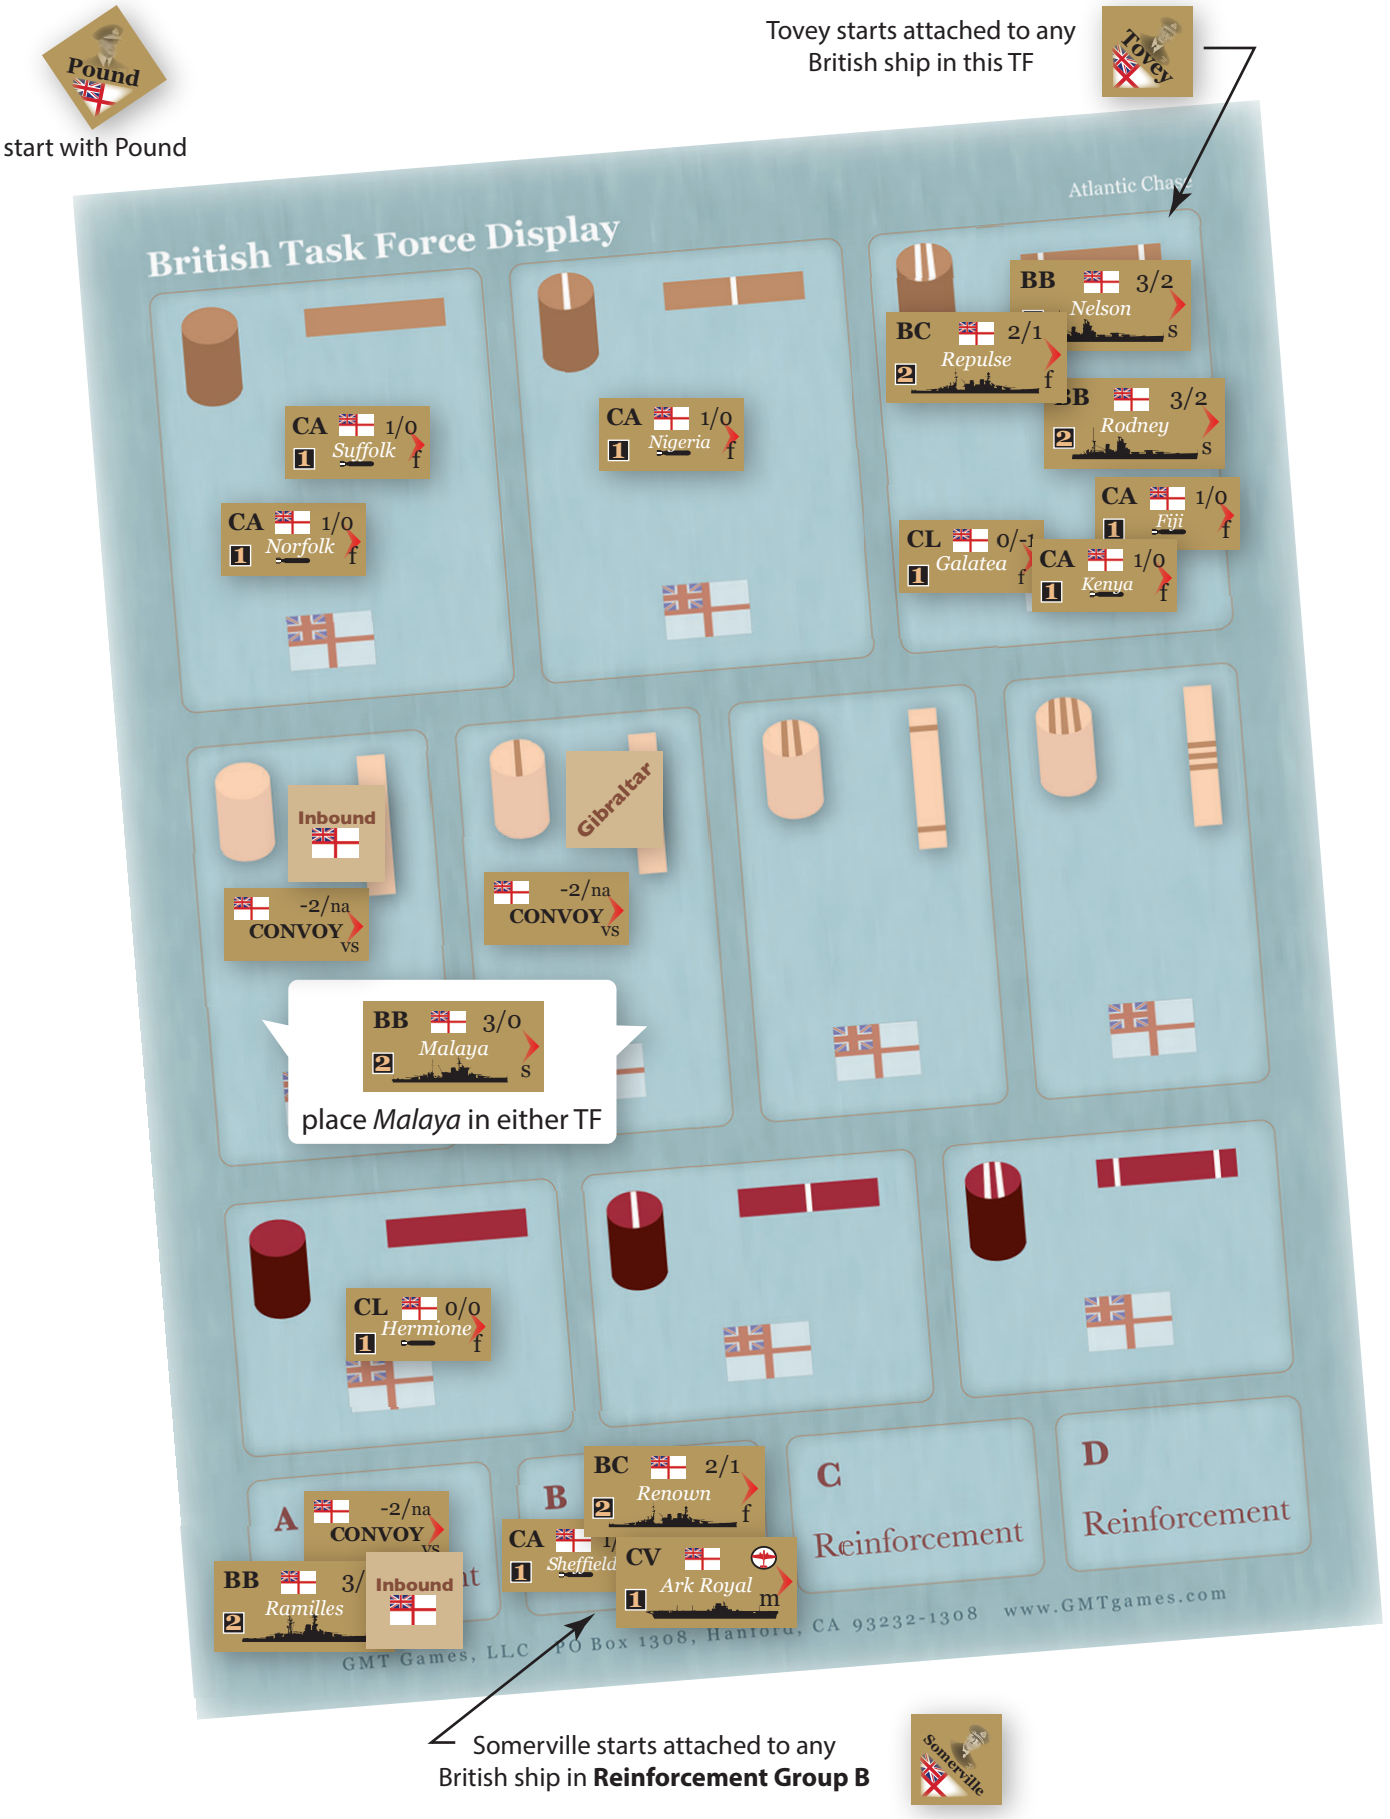

Example: Two TFs have Convoys and combined they have a total of two Trajectory segments. The British lose 1 VP.

Another Example: Only one TF has a Convoy and it is a Station. British Lose 1 VP.

Historical Note: Convoy traffic could be disrupted easily, even by the mere threat of enemy battlecruisers and battleships. That disruption could have a lasting effect on Britain's homefront and war effort.

© 2022 GMT Games, LLC

© 2022 GMT Games, LLC

German Actions

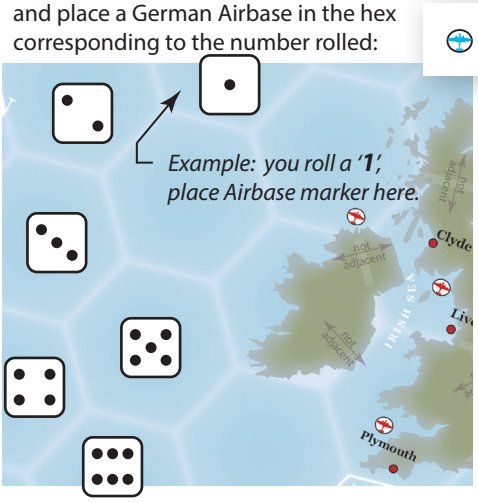

When the Germans have the Initiative, use the German Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of German Task Forces currently on the Operations Map.

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: If the Weather is Bad, roll a die and apply the result:

1d6	Bad Weather Result
1-2	Germans perform a **Signals action** targeting an Intel marker attached to a **Convoy**; if no Intel marker is attached to a Convoy, attach an Intel marker to a TF with a Convoy (select a segment in the middle of the **longest** Trajectory), then the Germans Pass; if no Convoy is in play or they are all Stations, the Germans Pass.
3-5	If a German Airbase marker is in **any** of the hexes shown below with a die, remove it and the Germans Pass; otherwise, roll another die and place a German Airbase in the hex corresponding to the number rolled:  After placing the Airbase marker, the Germans Pass.
6	Apply a '**C**' German Action Table result. If there are no German TFs in play, the Germans Pass instead.

Good Weather: If the Weather is Good, perform an Air Strike targeting a British TF in range of a German airbase (select the target that will give the German the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike action, roll a die and apply the result as though the Weather is Bad (Signals action, Intel attachment, or Airbase marker placement). Also, if there is an **unidentified** TF in play, roll a die to identify it (apply the result in the **Identify German TF** table on p. 48).

German Action Table

Number of German TFs currently in play (Stations and/or Trajectories)	1d6 → 1	2	3	4	5	6+
0	**A**	**A**	**X**CA	**X**PB	**X**u	**X**u
1	**X**CA	**A**	**X**PB	**X**BC	**X**BC	**X**u
2+	**C**	**X**CA	**X**PB	**X**BC	**X**BC	**X**BC

Modifier: **+1** if no **Convoy** has Completed

X

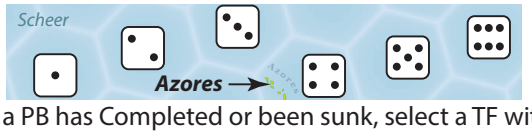

INTERCEPTION

A German TF performs actions intended to **Bring to Battle** a British TF with a **Convoy** in it (the **nearest** Convoy; if equally near choose the **longest**). It will avoid Intel triggers from ports and airbases (if that is impossible or there is no Convoy in play, treat as a '**C**' German Action Table result). If possible it will also avoid Intel triggers from Stations. If possible, it will also avoid enemy air support range. See below for which TF performs the actions. If the selected TF has a Damaged ship, cancel the action and apply a '**C**' German Action Table result instead, using the already selected TF.

XBC – Select a TF with a **BC** or **BB** in it. If there is no TF with a BB or BC in it, select an **unidentified** TF (if none in play, create one in Kiel and select it). Coordination? If there is another German TF already in play and it does not have a Damaged ship, it performs a Trajectory action to the target hex in order to provide a Coordination modifier (**direct route while avoiding intel triggers**; if Intel can't be avoided, it does not perform a Trajectory action).

XCA – Roll a die: if EVEN, apply an '**A**' German Action Table result instead; if ODD, select a TF with a **CA** in it. If no CA in play, create a new TF in Narvik and place a **CA** in it. However, if there are already three German TFs in play, apply a '**C**' German Action Table result instead.

XPB – If there are already three German TFs in play, apply a '**C**' German Action Table result instead. If two or fewer, select a TF with a **PB** in it. If a PB is not yet in play, roll a die and create a new TF (with a PB) in the hex indicated below:

If a PB has Completed or been sunk, select a TF with an AC or CL instead. If none, treat as an **X**BC result.

Xu – Select an **unidentified** TF. If none in play, create and select a new **unidentified** TF in Kiel.

© 2022 GMT Games, LLC

C

COMPLETION ACTION

Selection: Select a German TF with a **PB** in it. If none in play, select a TF with a Damaged ship. If none, select a TF with a **CA** in it (the CA must be alone in the TF). If none qualify, select the German TF **farthest** from a **Convoy**.

Action: Selected TF attempts to Complete in a port. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers,** if possible; also avoid enemy air support range, if possible). If prevented from performing Completion due to Intel markers or Trajectory length, the Germans Pass instead or after the Trajectory action (the selected TF performs Time Lapse; remove Intel marker if possible).

Which Port? If the selected TF has a **PB** in it, roll a die and apply the result in this table

If the TF has a **Damaged** ship, it attempts Completion in the **nearest** German controlled port. If not Damaged and not a PB, it attempts to Complete in Brest. If an **unidentified** TF, roll a die and apply the result in this table

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: **IC**

Identify German TF

1d6 →	1-3	4	5	6	*no modifiers*
	BC **BC**	**BC**★ **CA**	**BC**★	**AC**	

Each ship class has a limit which can't be exceeded. A ship in play (in a TF) and ships that were in play (sunk or Completed) all count towards the limit. If the die roll calls for a ship in a class whose limit has already been reached, replace with a **CL**.

Maximum Class Limits: 2 **BC**, 1 **BB**, 2 **CA**, 4 **CL**, 1 **AC**.

★ Instead of replacing with a **CL**, replace with a **BB** instead.

PB Completion Port

1d6 →	1-2	3	4-6
	nearest German controlled port	Narvik	Kiel

here if Damaged

Unidentified TF Completion Port

1d6 →	1-2	3	4-5	6
	St. Nazaire	Trondheim	S. America	**Xu**

*Completion action cancelled: apply **Xu** result instead except target **nearest** British TF that is **not** a Convoy.*

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the B2 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:	VP
no Hits	**0**
1-2 Hits	-2
3-5 Hits	-5
6-9 Hits	-9
10+ Hits	-15

(total all Hits from all Convoys)

Rationing

-1 VP each instance (see p. 45)

Reinf. Group B entered play?	VP
yes	**-3**
no	0

Convoy Completed?	VP
yes (each)	**4**
no	0

If **dispersed**, a Completed Convoy earns only **2 VP**.

Did a German **BC/BB** Complete in France?	VP
yes	**-1 each**
no	0

Casualties...

Each ship suffered:	VP for British ships			VP for German ships	
	BB/BC	CV	CA/CL	BB/BC	other
no Hits →	**0**	**0**	**0**	**0**	**0**
Damaged →	-1	-2	-1	1	0
Sunk →	-3	-4	-2	4	2
still at sea at scenario end (and not Damaged) →				**-4**	**-1**

B2 Debriefing Table

VP	OUTCOME
10 +	***Steady on!*** Churchill is pleased with the result. If a German **BC** was sunk, he lingers over the battle in his letter to the American President.
6-9	***Bitter success.*** If a German **BC** was sunk, Churchill is encouraged. If **5** or more Hits were scored on Convoys, this seems a Pyrrhic victory, unless both German **BC**s were sunk (in which case, shift this Outcome up one row, to "Steady on!").
1-5	***Attrition.*** If **7** or more Hits were scored on Convoys, or a British **BB** or **BC** was sunk, Churchill is aghast at the report. If a **BC** was sunk, he writes a radio address as though this were a victory. If none were sunk or Damaged and both **BC**s are in Brest or still at sea, shift this Outcome one row down to "Loss."
0 to **-5**	***Loss.*** Churchill now worries that the *Bismarck* will soon make its appearance in the North Sea or Norway. More assets are diverted from Asia and the Pacific to secure the North Atlantic.
-6 or less	***Another Defeat.*** Added to the news from North Africa, this is terrible. If the *Bismarck* enters the fray, how will Britain hold on?

© 2022 GMT Games, LLC

B3: Operation Rhine

German player

May 1941. Grossadmiral Erich Raeder is given the green light to follow-up the success of Operation Berlin with new assets. His battlecruisers are in a sorry state, however, enduring air raids in French ports by the British. Most likely, he will have to rely exclusively on his newest battleship.

Objective

Strike British Convoys mercilessly, but do not lose a **BB** in battle. Return all ships to French ports.

Set-Up

Weather: Good
Initiative: German (the player)
Map: Operations Map (game board)
Enemy: British TFs start as indicated.
RV markers: Place 4 Rendezvous markers as shown.

Rendezvous Markers

These markers have no effect on play except when a German TF **Station** is in a hex with one of them. When you have Initiative, and a German TF is in a hex with a marker, make a Fueling Check (roll a die and apply the result on the **Fueling Table**).

The End

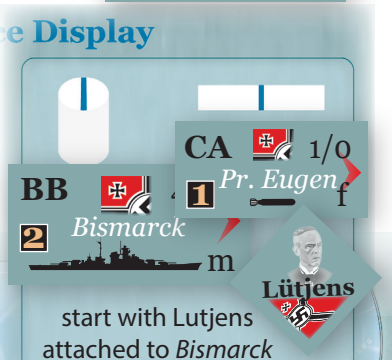

The scenario ends when three or fewer Rendezvous markers remain and the Germans have no Task Forces in play. It may also end as a result of the British Action Table.

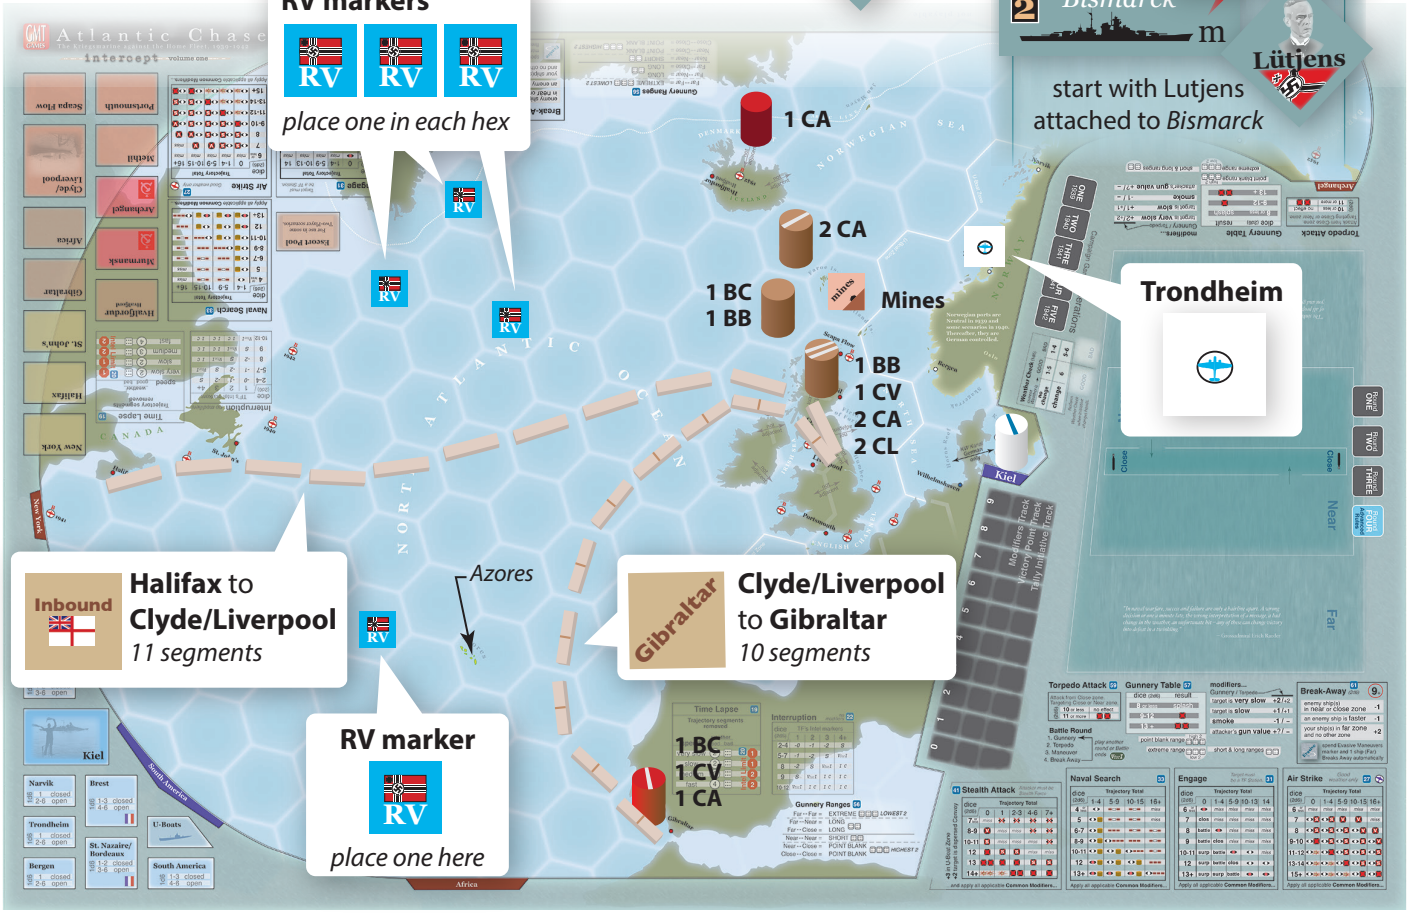

Reinforcement

Two **BC**s in Reinforcement Group A in Brest. You may not bring them into play unless **Fueling Table** result **b.** is garnered (and you will suffer a VP deduction if you actually bring them into play).

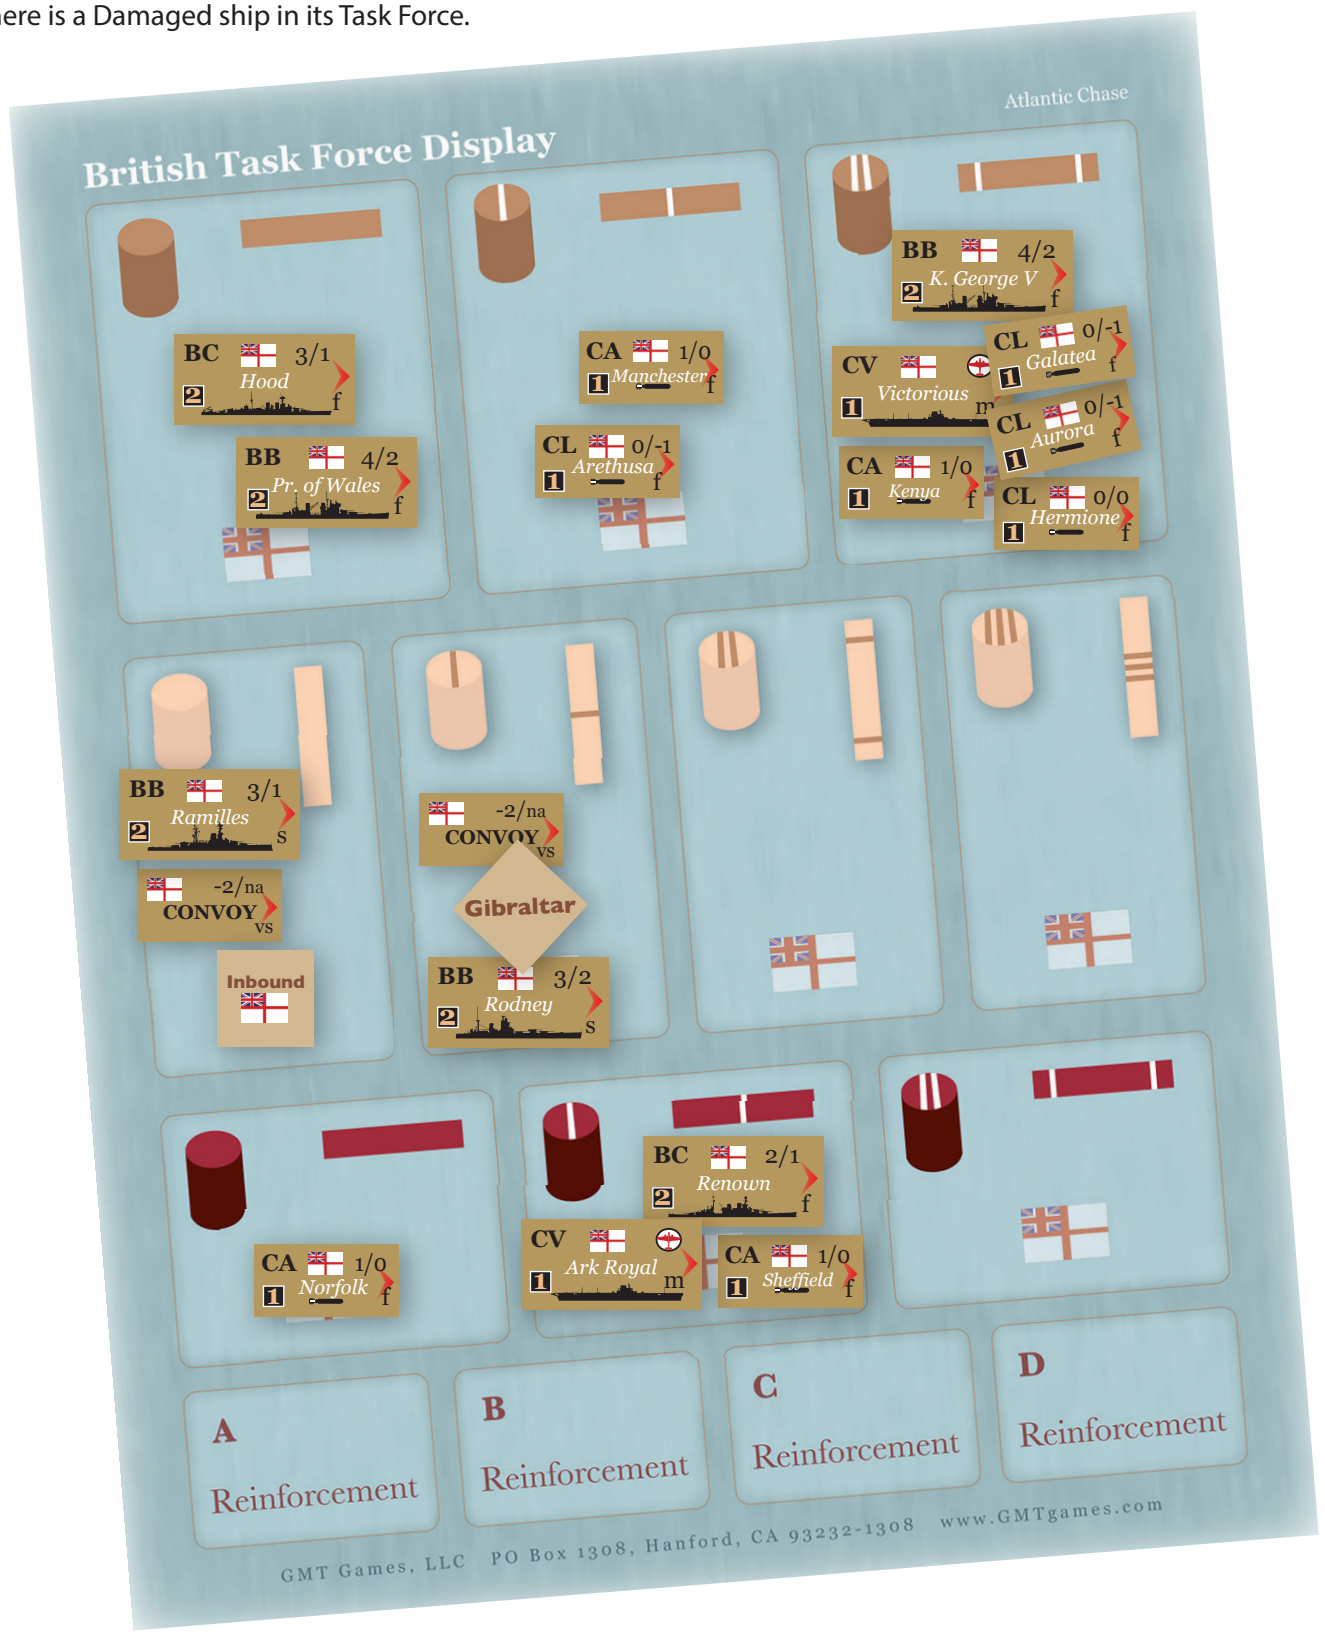

© 2022 GMT Games, LLC

Convoys

A Convoy can't be destroyed. It will disperse during the Maneuver step of a Battle Round, but only if one or more of these conditions are true:

- it has suffered 3+ Hits;
- it is alone on the Battle Board (no other British ship there);
- there is a Damaged ship in its Task Force.

© 2022 GMT Games, LLC

Fueling Check

When you have Initiative, if a German TF is in the same hex as a Rendezvous marker and the TF is a Station, you must roll a die and apply the result on the Fueling Table. Unless noted otherwise by the Fueling Table result, you maintain Initiative after the check. You are required to make at least one Fueling Check during the scenario, removing one RV marker, but you may perform additional Fueling Checks if you wish.

Clarification: A Fueling Check can't happen during a Pass action's Time Lapse.

Fueling Table

	1d6 →	1	2	3	4	5	6
Good	W	a.	b.	c.	d.	e.	f.
Bad	W BAD	a.	d.	e.	f.	g.	h.

Operation Rhine did not last long enough for the Bismarck *to refuel, but the* Prinz Eugen *refueled twice before mechanical problems forced her to France.*

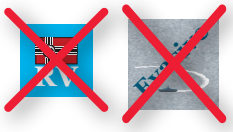

Legend of Fueling Table Results:

a. 

Remove the RV marker. If not already Damaged, remove (repair) one Hit from one German ship in the TF.

New Peril: Place a new **unidentified** British TF in the hex. Then, attach a Contact marker to the German TF. Then, V for I

b. 

Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

News: The two **BC**s in Brest may enter play (that is, you may perform a Reorganize action to attempt to bring them into a new TF in Brest; there is a VP penalty for doing so, however). *The Luftwaffe's increased assets in France has protected the Atlantic ports effectively and repairs on the ships are complete ahead of schedule.*

3 hexes from British Airbase? If a British Airbase is 3 hexes away or less, or if a British CV with a CV in it is 2 hexes away or less, attach a Contact marker to the German TF. Then, V for I

c. 

Remove the RV marker.

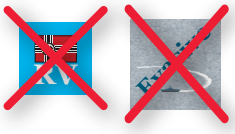

British TF in hex? If a British TF is **in** the hex, and it is a **Station**, attach a Contact marker to the German TF. If the TF already has a marker, IC.

d. 

Remove the RV marker. Then, make a choice: Either attach an Intel marker to a British Trajectory segment, or make the British perform a '**Convoy**' British Action Table result. If you choose neither option, apply an '**h**' result instead (do not remove the RV marker).

e. 

Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

New Objective: Select a ship in the Task Force. *It has developed mechanical problems and must return to port. If there are other ships in the TF, at least one must serve as escort.* The only actions this TF is permitted is Trajectory, Completion, and Pass. The TF may only Complete in Wilhelmshaven, Kiel, or Brest. You may not attach an Evasive Maneuvers marker to this TF. *During Debriefing, ignore VP. You 'win' if the ship returns to Kiel, and win marginally if it returns to Brest or Wilhelmshaven.*

British TF in hex? If a British TF is **in** the hex, V for I

f. 

Good Weather

Remove the RV marker. If Good Weather, also remove an Evasive Maneuvers marker from the German TF (if it has one).

British TF in hex? If Good Weather and a British TF is **in** the hex, attach a Contact marker to the German TF.

Good Weather

g. 

Remove the RV marker. There is no other effect.

h. Shift the RV marker to an adjacent hex (your choice).

British TF in hex? If a British TF is **in** the hex with your TF, V for I

move 1 hex

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of successful British Completion actions (count only Completion actions involving Convoys).

Legend of Action Table Results:

A

AIR STRIKE

Remove Damaged British ships. If this empties one or more TFs, remove them.

Bad Weather: If the Weather is Bad, roll a die: If EVEN, treat as an '**X**' British Action Table result; if ODD, treat as a '**Convoy**' British Action Table result.

Good Weather: If the Weather is Good, perform an Air Strike targeting a German TF in range of a British Airbase or TF with a **CV** (select the target that will give the British the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike, treat as an '**X**' British Action Table result. Don't use the **X - Selection Table**. Instead, roll a die and apply the result indicated here:

1-2 = select a TF **nearest** a German TF; this TF must have a **CA** in it and no other ship class;

3-4 = select a TF **nearest** a German TF; this TF must have a **CV** in it;

5-6 = select an **unidentified** TF (if none in play, create one in St. John's and select it).

C

COMPLETION ACTION

Selection: Select a British TF with a **Convoy** (if more than one, select the **shortest** Trajectory). If no Convoy in play, select a TF with a Damaged ship. If none in play, treat as a '**Convoy**' British Action Table result.

Action: Selected TF attempts to Complete in a port. If the selected TF is a Convoy, it attempts to Complete in Clyde/Liverpool or Gibraltar, whichever is its destination port. If a TF with a Damaged ship, the nearest British controlled port. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers** and German air support range, if possible). If prevented from performing Completion due to Intel markers or Trajectory length, the British Pass instead (the selected TF performs Time Lapse).

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: *IC*

British Action Table

Number of successful British Convoy Completion actions	1d6 → 1	2	3	4	5	6+
0	**A**	**A**	**X**	convoy	**C**	**C**
1	**A**	**X**	**X**	convoy	**C**	**C**
2+	**A**	**A**	**X**	**X**	convoy	**C**

Modifier: **+1** if at least one Convoy in play is dispersed

convoy

CONVOY.

Convoy in play? If a British TF with a **Convoy** is in play, roll a die: if EVEN, treat as an '**X**' British Action Table result; if ODD, treat this result as a '**C**' British Action Table result.

No Convoy? If no **Convoy** is in play, create a new TF in New York (it contains one Convoy).

Action: The new TF performs a Trajectory action to Clyde/Liverpool (most **direct route while avoiding Intel triggers** and German air support range, if possible). Clyde/Liverpool is this Convoy's destination port.

After Trajectory action: roll again on the British Action Table.

Identify British Ships

When an **unidentified** British TF is involved in a Battle and its ships must be transferred to the Battle Board, roll a die and use the result to determine its ships. If the TF is the target of a German Air Strike and the result is Hit or Damage, do the same (that is, use this table). If the result is a **BB**, select a slow BB.

Identify British Ships

1d6 → 1	2	3	4	5	6
BB CA CA	**BC CA CA**	**CV CA CA**	**CA CA CA**	**CA CA**	**CA**

Each ship class has a limit which can't be exceeded. A ship in play (in a TF) and ships that were in play (sunk or Completed) all count towards the limit. If the die roll calls for a ship in a class whose limit has already been reached, replace with a **CL**.

Maximum Class Limits: 3 **BC**, 7 **BB**, 10 **CA**, 6 **CL**, 3 **CV**.

© 2022 GMT Games, LLC

INTERCEPTION

X

End? If the *Bismarck* is sunk or Completed, or three **Convoys** have successfully Completed, the scenario ends. If it does not end, remove all **Damaged** British ships (if this empties a TF, remove the empty TF).

Select TF: If the scenario does not end, select a British TF. Do NOT select a TF that has a Convoy in it. To make the selection, roll a die and refer to the **X Selection Table**. (In the table, "nearest" means nearest to a German TF.) If the indicated TF is not in play (because no TF has a ship of the necessary class), select the **nearest** TF regardless of ship class (no Convoys).

Action: The selected TF perform actions intended to **Bring to Battle** a German TF (it will not enter a hex with a German controlled port or air base).

Which German target? If there is more than one German TF that can be targeted, roll a die:

1-4 = select the TF with a **BB** in it;
5-6 = select the **nearest** German TF.

Coordination? If a Convoy is in the target hex, it serves as Coordinating Task Force (CTF). If no Convoy in the hex and the star result is garnered (★), another TF must be designated as CTF (select the **nearest** to the target hex; this CTF may not have a Convoy in it). It will take the most **direct route while avoiding intel triggers** (if Intel can't be avoided, it does not perform a Trajectory action and there is no CTF).

Time Lapse: Remove segments **farthest** from the target hex.

X Selection Table

1d6 →	1	2	3	4	5	6
	a.	**a.★**	**b.★**	**b.**	**c.**	**d.**

a. **Nearest** Task Force with a **BC**;

b. **Nearest** Task Force with a **BB**;

c. **Nearest** Task Force with a **CV**;
If the **CV** is in Air Strike range and the Weather is Good, roll a die: if EVEN, it performs an Air Strike action instead; if ODD, it attempts to **Bring to Battle** the German TF;

d. **Nearest** Task Force with a **CA** and no BB, BC, or CV;

★ Indicates that if a Convoy is not already in the target hex, you must also select a second Task Force to serve as CTF. To determine which TF, roll a die:

1-3 **nearest** TF to the target hex;
4-5 TF with a **CA**, **nearest** to the target hex;
6 TF with a **BB**, **nearest** to the target hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the B3 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:		VP
total all Hits from all Convoys	**no Hits**	**0**
	1-4 Hits	3
	5-6 Hits	6
	7+ Hits	10

Each German ship?	VP
sunk	**-5**
damaged	-3

BB in a French port?	VP
yes	**1**
no	-1

BCs entered play?	VP
yes	**-2**
no	0

Each British ship...?	VP			
	BB/BC	**CV**	**CA/CL**	**Convoy**
no Hits	**0**	**0**	**0**	**0**
Damaged	1	0	0	0
Sunk	2	1	0	0
Completed	0	0	0	-3
Completed (dispersed)				-1

B3 Debriefing Table

VP	OUTCOME
10 +	***Gloating!*** The Fuhrer's voice on the radio is gleeful. "I gave Britain many chances to negotiate. So many chances..."
7-9	***Operation success.*** If the *Bismarck* is undamaged and not sunk, the operation was a success. If Damaged, Raeder is cautious and urges Luftwaffe assets to stabilize the situation in the air above the French ports.
4-6	***Attrition.*** If the *Bismarck* is in a French port, undamaged, this is the sort of attrition warfare Raeder is happy about. If neither **BC** was damaged or sunk, or never entered play, he sketches the next operation.
3 to **-2**	***What went wrong?*** If the *Bismarck* or one of the German **BC**s is sunk, this was a shocking defeat for the Fuhrer. If a British **BB** or **BC** was sunk, however, there is some redemption.
-3 or less	***Catastrophe!*** The Fuhrer is shocked. He informs Raeder that the *Tirpitz* will remain in the Baltic.

© 2022 GMT Games, LLC

B4: Decision at Sea

British player

May 1941. Intelligence indicates that the *Bismarck* is on the move and may attempt to sortie into the North Atlantic. It is accompanied by another ship, perhaps the T*irpitz* or maybe a cruiser. In either case, the danger to convoys is acute. German battlecruisers are in Brest as well, and the RAF is pounding that port doing its best to keep them there, but if they slip out of port in a concerted operation with the *Bismarck*, Admiralty may have its Jutland.

Objective

Your primary objective is to bring Convoys into their destination ports, unscathed. If the opportunity presents itself, sink enemy ships. If the *Bismarck* enters the fray, sink her.

Set-Up

Weather: Good
Initiative: British (the player)
Map: Operations Map (game board)
Enemy: no German TFs at start.

Convoy restrictions

Convoys can't be destroyed but they may disperse 11. A Convoy may share its TF with only one other ship, and that ship may not be another Convoy.

The End

The scenario ends when three Convoys have successfully Completed in their destination ports. It may also end as a result of the German Action Table.

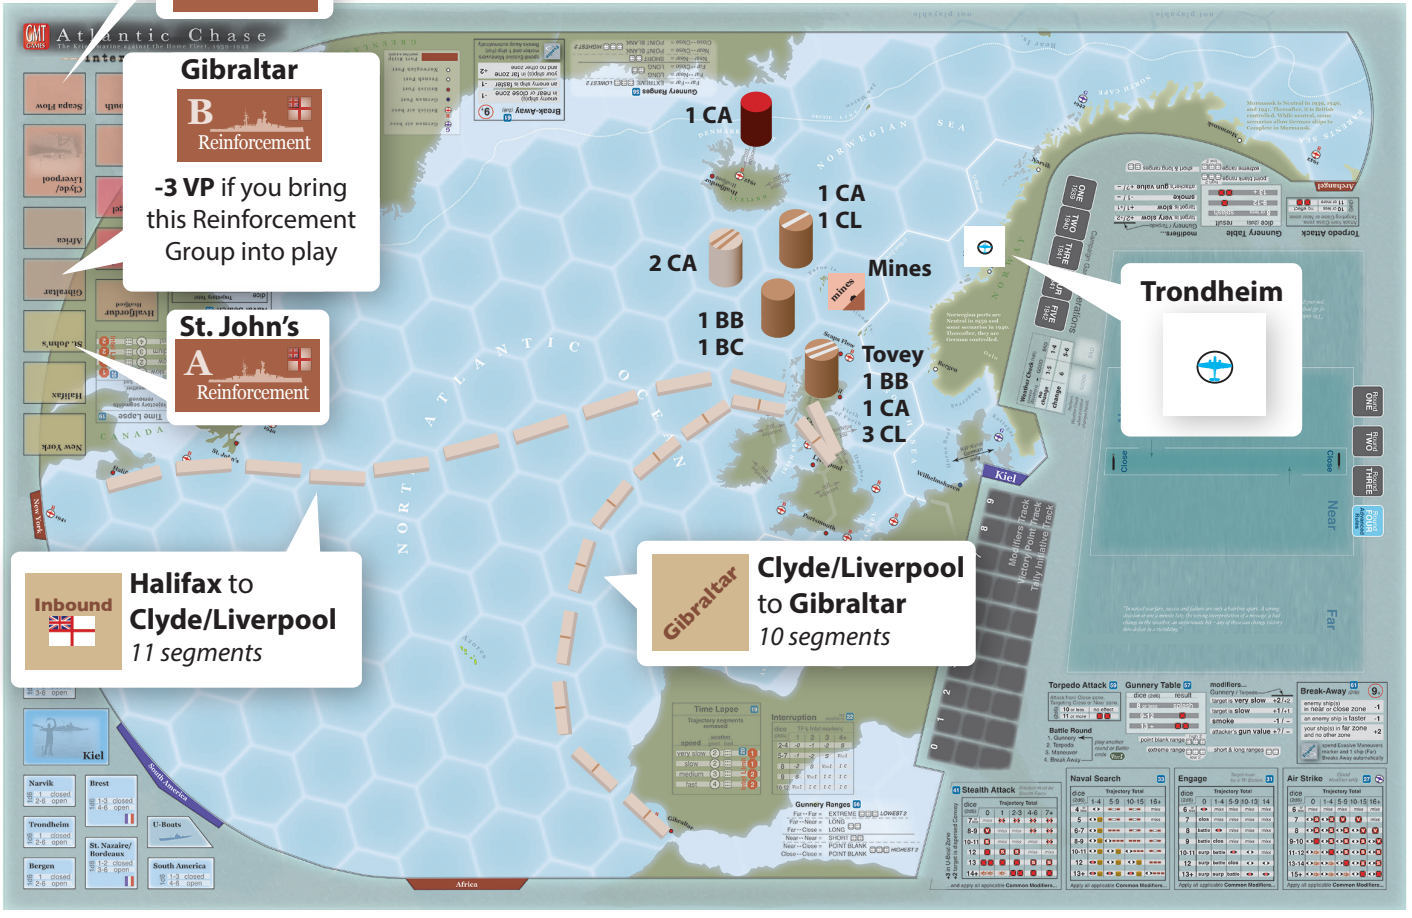

Rationing

When the Germans make a Weather Check, if the total number of Trajectory segments of TFs with Convoys in them is **3 or less**, the British lose **1 VP**.

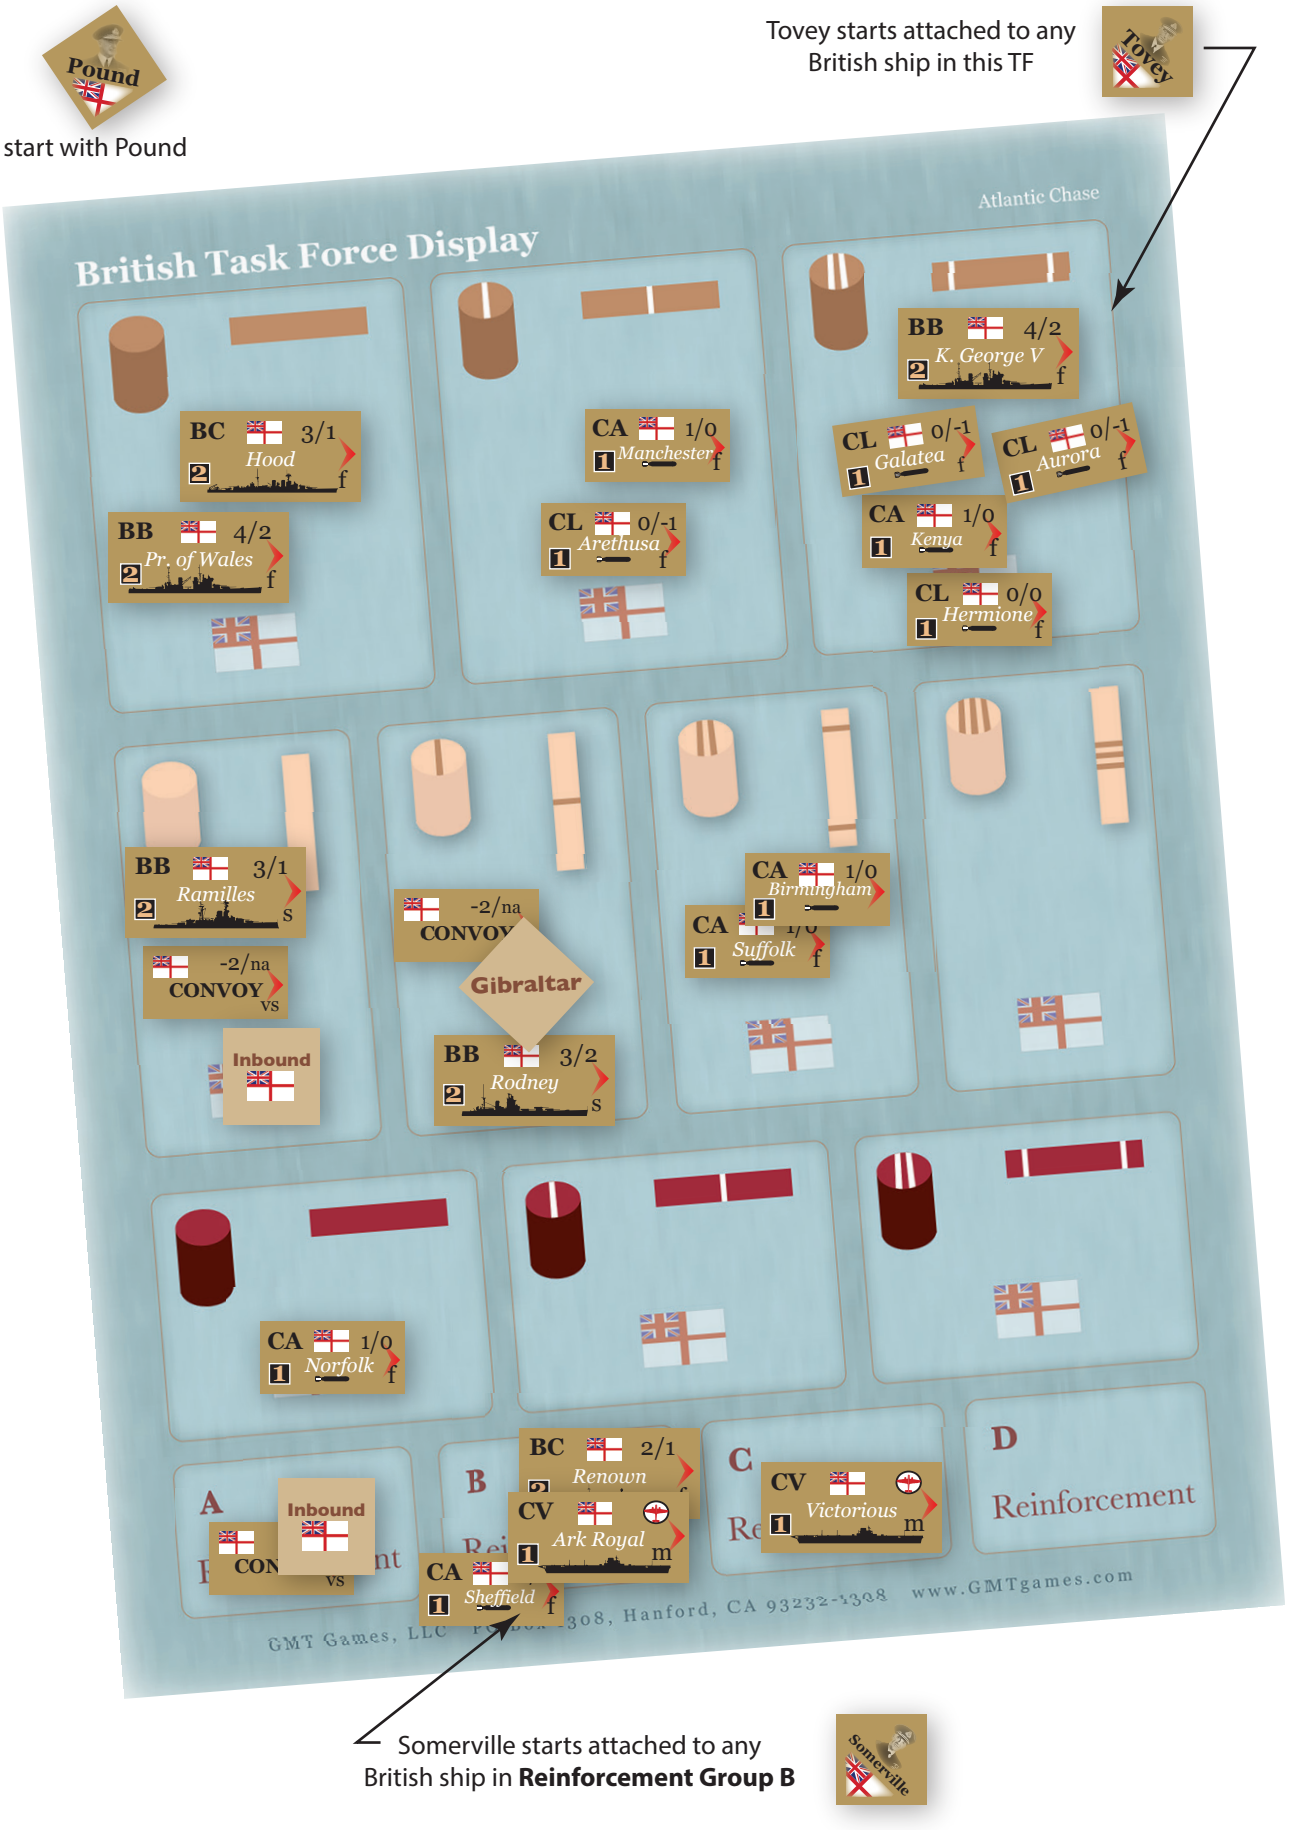

Example: Two TFs have Convoys and combined they have a total of two Trajectory segments. The British lose 1 VP.

Another Example: Only one TF has a Convoy and it is a Station. British Lose 1 VP.

Historical Note: Convoy traffic could be disrupted easily, even by the mere threat of enemy battlecruisers and battleships. That disruption could have a lasting effect on Britain's homefront and war effort.

© 2022 GMT Games, LLC

© 2022 GMT Games, LLC

German Actions

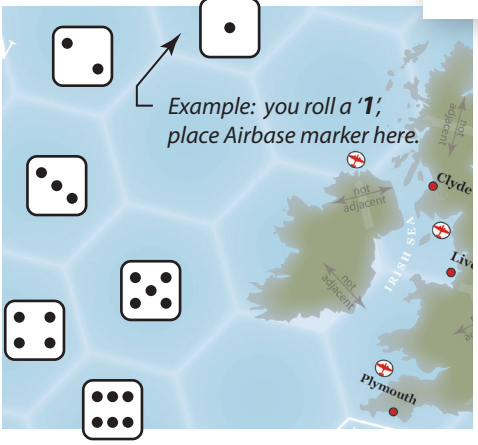

When the Germans have the Initiative, use the German Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of German Task Forces currently on the Operations Map.

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: If the Weather is Bad, roll a die and apply the result:

1d6	Bad Weather Result
1-2	Germans perform a **Signals action** targeting an Intel marker attached to a **Convoy**; if no Intel marker is attached to a Convoy, attach an Intel marker to a TF with a Convoy (select a segment in the middle of the **longest** Trajectory), then the Germans Pass; if no Convoy is in play or they are all Stations, the Germans Pass.
3-4	If a German Airbase marker is in **any** of the hexes shown below with a die, remove it and the Germans Pass; otherwise, roll another die and place a German Airbase in the hex corresponding to the number rolled:  After placing the Airbase marker, the Germans Pass.
5-6	Apply a '**C**' German Action Table result. If there are no German TFs in play, the Germans Pass instead.

Good Weather: If the Weather is Good, perform an Air Strike targeting a British TF in range of a German airbase (select the target that will give the German the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike action, apply an '**XBB**' German Action Table result. But first, roll a die: if EVEN, remove an **unidentified** TF from play. If ODD, if there is an **unidentified** TF in play, roll a die to identify it (apply the result in either the top or bottom the **Identify German TF** table on p. 57).

German Action Table

Number of German TFs currently in play (Stations and/or Trajectories)	1d6 → 1	2	3	4	5	6+
0	**A**	**A**	**XBC**	**Xu**	**XBB**	**XBB**
1	**XBC**	**A**	**A**	**Xa**	**Xu**	**XBB**
2+	**C**	**A**	**Xa**	**Xa**	**XBB**	**XBB**

Modifier: **+1** if no **Convoy** has Completed

X

INTERCEPTION

A German TF performs actions intended to **Bring to Battle** a British TF with a **Convoy** in it (the **nearest** Convoy; if equally near choose the **longest**). It will avoid Intel triggers from ports and airbases (if that is impossible or there is no Convoy in play, treat as a '**C**' German Action Table result). If possible it will also avoid Intel triggers from Stations. If possible, it will also avoid enemy air support range. See below for which TF performs the actions. If the selected TF has a Damaged ship, cancel the action and apply a '**C**' German Action Table result instead, using the already selected TF.

Coordination? Regardless of the TF selected, if there is a second German TF already in play, it performs a Trajectory action to the target hex in order to provide a Coordination modifier (**direct route while avoiding intel triggers**; if Intel can't be avoided, it does not perform a Trajectory action). The CTF may not have a Damaged ship in it.

Xa – If there are already three German TFs in play, apply a '**C**' German Action Table result instead. If two or fewer, select the German TF **nearest** a British TF.

XBB – Select a TF with a **BB** in it. If there is no TF with a BB in it, treat as an '**Xu**' German Action Table result.

XBC – Select a TF with a **BC** in it. If there is no TF with a BC in it, create and select a new German TF in Brest and roll a die: if EVEN, place 2 **BC**s in it; if ODD, place 1 **BC** and 1 **CA** in it.

Xu – Select an **unidentified** TF. If none in play, create and select a new **unidentified** TF. Create where? Roll a die:
1-2 = Narvik,
3-5 = Trondheim,
6 = Kiel.

© 2022 GMT Games, LLC

C

COMPLETION ACTION

Selection: Select a German TF with a Damaged ship. If none, select a TF with a **PB** in it. If none qualify, select the German TF **nearest** a German controlled port.

Action: Selected TF attempts to Complete in a port. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers,** if possible; also avoid enemy air support range, if possible). If prevented from performing Completion due to Intel markers or Trajectory length, the Germans Pass instead or after the Trajectory action (the selected TF performs Time Lapse; remove Intel marker if possible).

Which Port? If the TF has a **Damaged** ship, it attempts Completion in the **nearest** German controlled port. If not Damaged, it attempts to Complete in Brest.

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: **IC**

Identify German Ships

BB not yet in play

1d6 →	1-3	4-5	6
	BB CA	**BB**	**F.R.**

Identify German Ships

BB is or was in play

1d6 →	1	2-3	4	5-6
	BB	**CA**	**PB**	**F.R.**

Use the top table if a BB is not yet in play. Use the bottom table if a BB is in play. If a BB was sunk or it Completed, use the bottom table.

F.R.: False report. Remove the Task Force.

LIMIT: In this scenario, there can't be more ships of a class in excess of the limit indicated on the right ("Ship Limit"). This includes ships in play and those that were in play. If the result would exceed that limit, replace the excess ship with a **CL**.

Ship Limit	
BB	2
BC	2
CA	2
PB	2

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the B4 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:	VP
no Hits	**0**
1-2 Hits	-2
3-5 Hits	-5
6-9 Hits	-9
10+ Hits	-15

(total all Hits from all Convoys)

Rationing

-1 VP each instance (see p. 54)

Reinf. Group B entered play?	VP
yes	**-3**
no	0

Convoy Completed?	VP
yes (each)	**4**
no	0

If **dispersed**, a Completed Convoy earns only **2 VP**.

Did a German **BC/BB** Complete in France?	VP
yes	**-1 each**
no	0

Casualties...

Each ship suffered:	VP for British ships			VP for German ships	
	BB/BC	**CV**	**CA/CL**	**BB/BC**	**other**
no Hits →	**0**	**0**	**0**	**0**	**0**
Damaged →	-1	-2	-1	1	0
Sunk →	-3	-4	-2	4	2
still at sea at scenario end (and not Damaged) →				**-4**	**-1**

B4 Debriefing Table

VP	OUTCOME
12 +	***Victory at sea!*** If a German **BB** was sunk, Churchill is ecstatic.
8-11	***Tide has turned.*** Churchill can feel the fortunes of war turn in Britain's favor. If a German **BB** was sunk, he says as much in his radio address.
4-7	***Tide is turning.*** If Hits on Convoys were less than **4**, Churchill is encouraged. If a British **BB** or **BC** was sunk, this was a difficult pill for Churchill to swallow. If the *Bismarck* was sunk, it was worth it.
1-3	***Attrition.*** If **4** or more Hits were scored on Convoys, Churchill quietly reads the reports. If a German **BC** was sunk, or a **BB** Damaged, his radio address presents this as a victory. If not a single German ship was sunk, downgrade this Outcome one row, to "Missed opportunity."
0 to **-3**	***Missed Opportunity.*** If no British ship was sunk, Churchill is furious that the Home Fleet is too cautious. "What became of British audacity?" He leans on Pound to find another job for Tovey.
-4 or less	***Crushing Defeat.*** If the number of Damaged and sunk British ships is equal to or greater than the number of Hits scored on Convoys, 10 Downing Street may soon have a new resident.

© 2022 GMT Games, LLC

‘A’ Scenarios: Arctic Convoy

These scenarios explore the operations after Germany’s invasion of the Soviet Union. Great Britain and the United States ferry trucks, tanks, aircraft, rifles, ammunition, and provisions to their ally to the east while the remnants of the Kriegsmarine does its best to interfere with that traffic.

Historically, Germany was fighting a losing battle on multiple fronts. Its U-Boat fleet labored on, but its “happy time” had waned, while the long-range Fw200s had been dealt with by the RAF and Coastal Command. The surface raiders had been successfully hunted down by the Royal Navy, and even the mighty Bismarck’s *one voyage resulted in defeat. The French ports to the west, those lethal points of launch, proved vulnerable to air raids and even sea raids, inspiring assets to be transferred to the relative safety of Norway and Germany. From there, the Kriegsmarine’s dwindling surface fleet could be used as a weapon against the arctic convoys ferrying supplies to the Soviet Union’s northern ports. By the summer of 1942, all other theaters of Germany’s war paled in comparison to the massive appetite of its east front. With the bulk of the surface fleet in Norway, the Kriegsmarine’s main goal became the disruption of the arctic convoy route, if not its severing.*

Norway and France

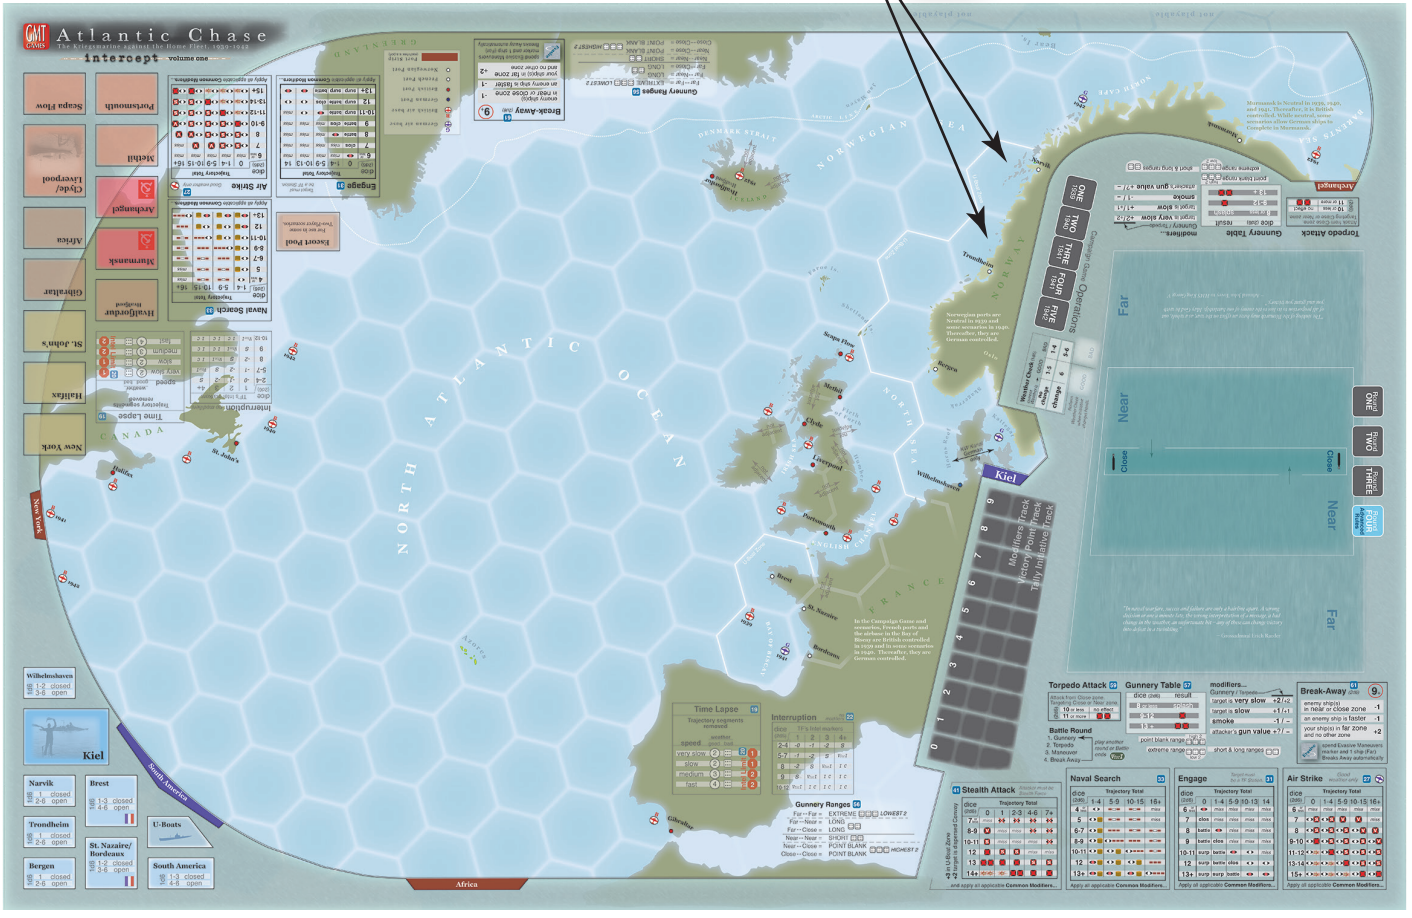

Norway is controlled by Germany. Its ports are German, hostile to Britain (they are Intel triggers). France too has been overrun by Germany, and its ports and airbases are German (they are Intel triggers). Norwegian and French ports are all friendly to Germany, and connected to Port Boxes for German Task Forces. In these scenarios, a German Airbase marker will start in Trondheim or Narvik.

Operations Map

These scenarios use the Operations Map on the game board.

Air Bases: It is 1942, so all air bases are in play.

German Airbase in Trondheim or Narvik

© 2022 GMT Games, LLC

A1: PQ Convoys

British player

Early Summer 1942. It is imperative that supply reach Murmansk. The Luftwaffe and Kriegsmarine have advantage of position along the arctic route, having shifted assets from France to Norway, but Admiralty has the advantage of numbers. Stakes are high.

Objective

Your objective is to bring Convoys into their destination port, unscathed. It is vital Convoys reach the Soviet Union, but other Convoys can't be neglected.

Set-Up

Weather: Good
Initiative: British (the player)
Map: Operations Map (game board)
Enemy: no German TFs at start, but a U-Boat force starts as shown.

Convoys

Convoys can't be destroyed but they may disperse 11. A Convoy may share its TF with only one other ship, and that ship may not be another Convoy.

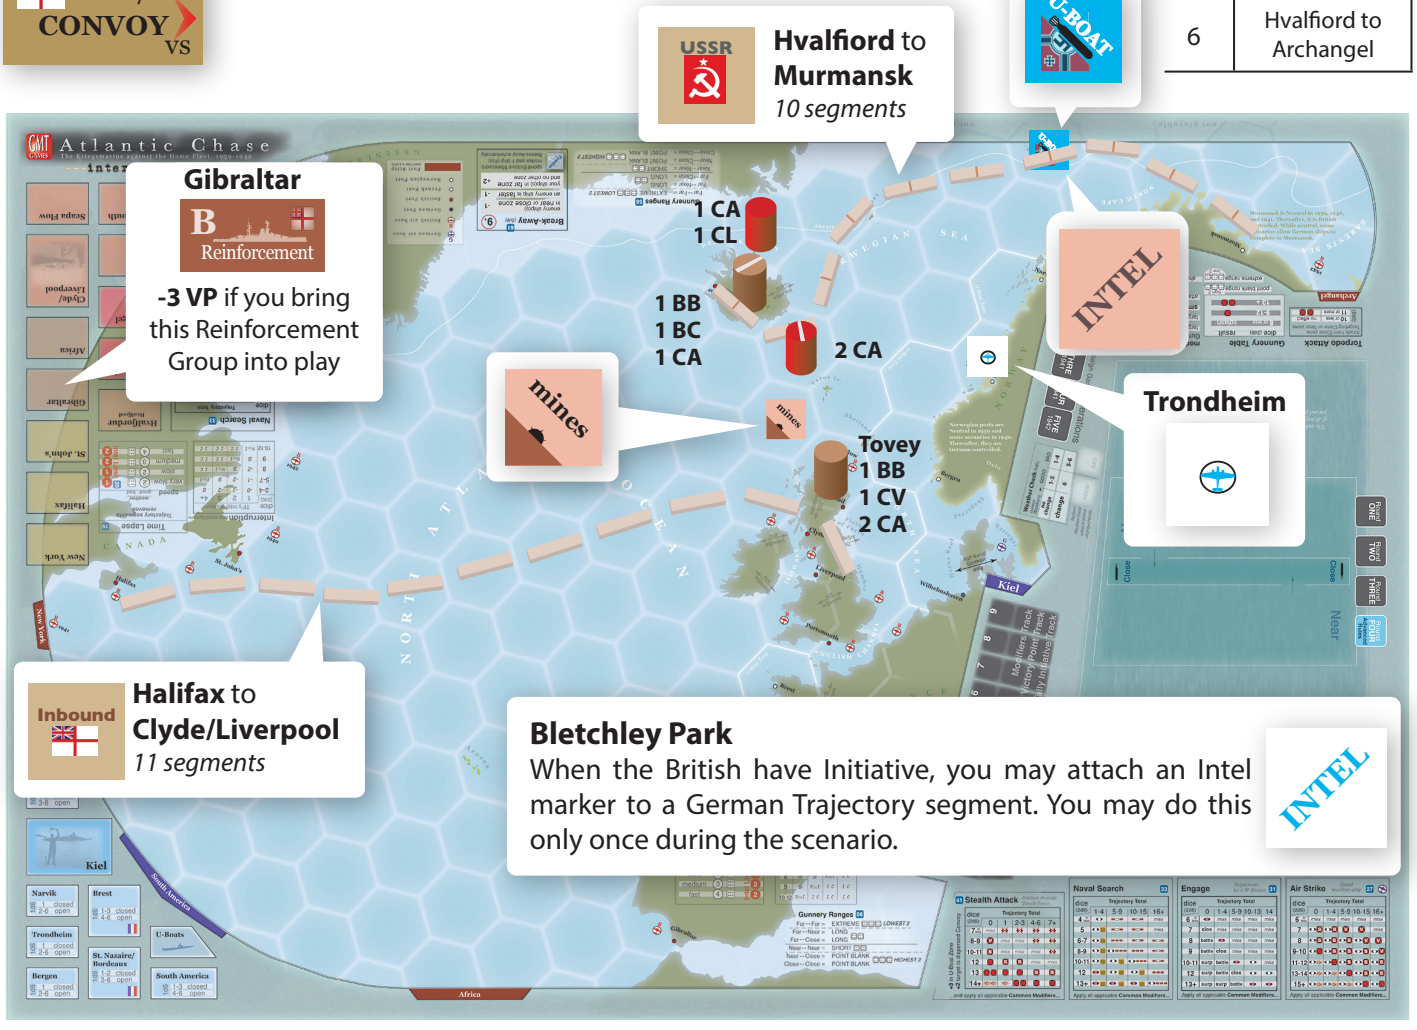

The End

The scenario ends when three Convoys have successfully Completed in their destination ports. It may also end as a result of the German Action Table.

Reinforcement Convoys

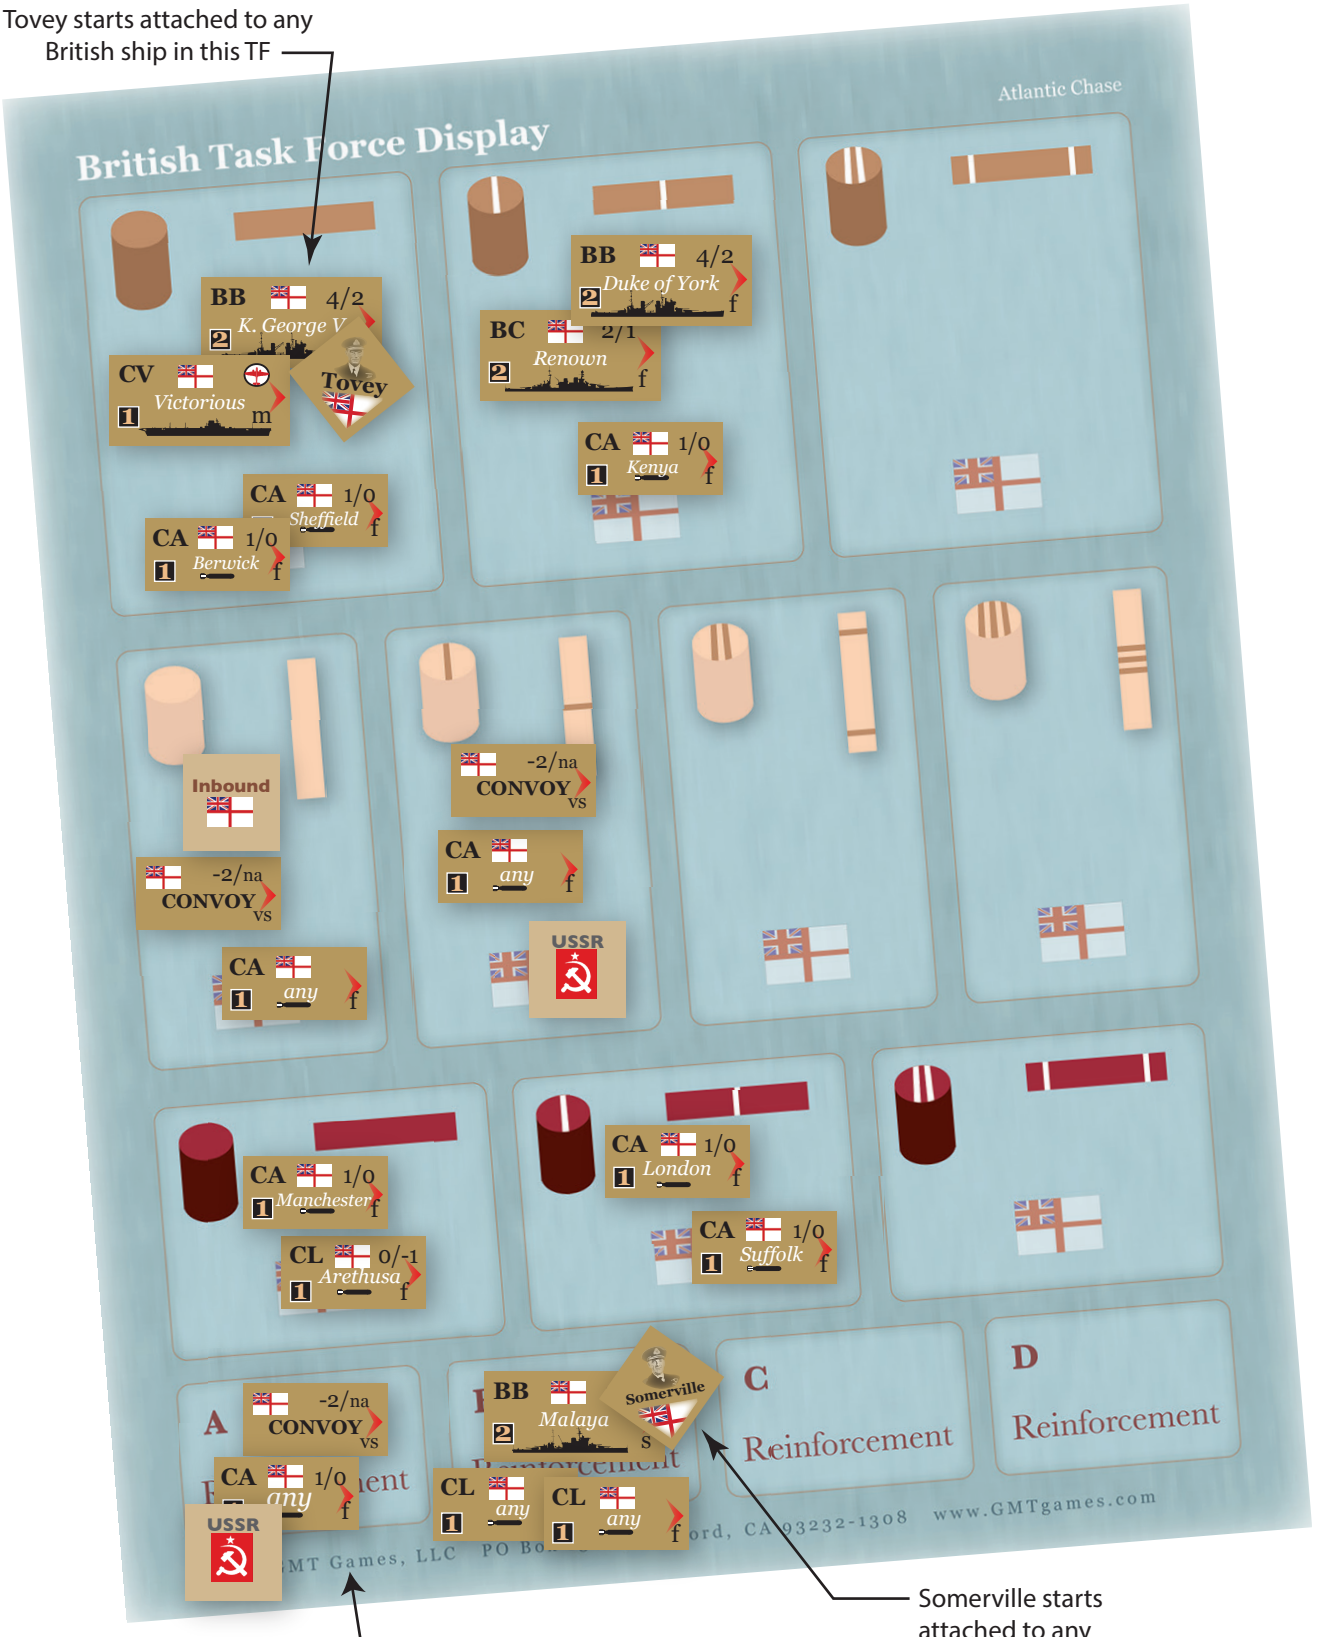

Reinforcement Group A is available without penalty (unlike Reinforcement Group B). However, when you perform a Reorganize action and successfully bring Reinforcement Group A into play, you must randomly determine its starting and destination ports by rolling a die.

1d6	A Reinforcement
1-2	Clyde/Liverpool to Murmansk
3-5	Hvalfiord to Murmansk
6	Hvalfiord to Archangel

© 2022 GMT Games, LLC

Tovey starts attached to any British ship in this TF

Somerville starts attached to any British ship in **Reinforcement Group B**

Reinforcement Group A
This Group must be assigned starting and destination ports when it is brought in as reinforcements (Reorganize action). Roll a die and refer to p. 59 for assignment.

© 2022 GMT Games, LLC

German Actions

When the Germans have Initiative, use the German Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of successful Convoy Completion actions.

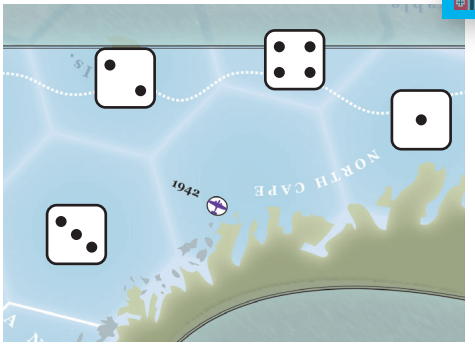

Legend of Action Table Results:

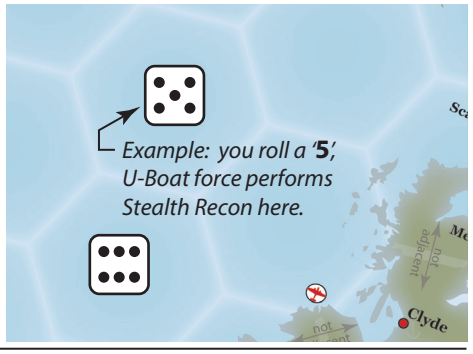

A

AIR STRIKE

Bad Weather: If the Weather is Bad, and a U-Boat force is in a hex with an eligible target (a British TF Station, or segment with a Contact or Intel marker attached), it performs a Stealth attack. If no eligible target, or no U-Boat force is in play, roll a die and apply the result:

1d6	Bad Weather Result
1-2	Germans perform a **Signals action** targeting an Intel marker attached to a Convoy; if none, **Stealth Recon** instead (place U-Boat force in Murmansk).
3-6	The Germans perform a **Stealth Recon** action in the hex indicated by the die (roll a second die to determine which hex). Place a new U-Boat force there, or if already two are in play, move the **nearest** U-Boat force.

Good Weather: If the Weather is Good, perform an Air Strike targeting a British **Convoy** in range of a German airbase (select the target that will give the Germans the most favorable Air Support modifier). If no Convoy in range, target the **nearest** British TF.

No Target? If the Weather is Good but there is no target for an Air Strike, treat as an '**X**' German Action Table result instead.

German Action Table

Number of successful British Convoy Completion actions	1d6 → 1	2	3	4	5	6+
0	**A**	**A**	**A**	**X**	**X**	**C**
1	**A**	**A**	**X**	**X**	**X**	**C**
2+	**A**	**A**	**A**	**X**	**X**	**C**

Modifier: **+1** each Damaged German **ship** in play

C

COMPLETION ACTION

Selection: Select a German TF with a **Damaged** ship. If none, select an **unidentified** TF. If none, select any German TF. The selected TF attempts to perform a Completion action (see "Completion Action" below).

No German TF? If the Germans do not have a Task Force in play, they perform a **Stealth Attack** action instead . Select a U-Boat marker on the Operations Map; it performs the action. If no U-Boat marker is in play or if it does not have a target, treat as an '**A**' German Action Table result instead.

Completion Action: Selected TF attempts to Complete in a port. The TF may need to perform a Trajectory action first (**direct route** avoiding British ports and airbases, and if possible, British air support range too). If prevented from performing Completion due to Intel markers or Trajectory length, the Germans Pass instead or after the Trajectory action (the selected TF performs Time Lapse; remove an Intel marker if possible, otherwise remove segments **farthest** from the port).

Bergen: The hexes in and adjacent to Bergen are in British air support range. They can't be avoided, so German TF segments may be placed in those hexes.

Which Port? If the selected TF has a Damaged ship, it attempts Completion in the nearest German controlled port. Others in Narvik or St. Nazaire, whichever is closer.

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: IC

© 2022 GMT Games, LLC

INTERCEPTION

End? If a German **BB** has Completed or was sunk, the scenario ends. Proceed to Debriefing.

Select TF: Select the **nearest** German TF to a Convoy. If there are no German TFs in play, create an **unidentified** TF . Roll a die and refer to this table to determine its starting port:

1d6	starting port
1-3	**Narvik**
4-5	**Trondheim**
6	**St. Nazaire**

X Action: The selected TF performs actions intended to **Bring to Battle** a British TF with a **Convoy** (however, if the selected TF has a Damaged ship, treat as a '**C**' result instead). If more than one TF has a **Convoy**, it targets the **nearest** one. If possible, the selected TF will avoid the Air Strike range of British airbases (including British CVs). If possible, it will also avoid British TF Stations.

Identify German Ships

1d6 →	1	2	3	4	5	6
	BC	**BC DD**	**BB**	**BB**	**CA**	**PB**

LIMIT: In this scenario, there can't be more ships of a class in excess of the limit indicated on the right ("Ship Limit"). This includes ships in play and those that were in play. If the result would exceed that limit, replace the excess ship with a **CL**.

Ship Limit	
BB	**1**
BC	**1**
CA	**1**
PB	**1**
CL	**2**
DD	**1**

No Convoy? If there are no Convoys in play, or if the only Convoy is in a TF that is a Station in a Port Box, port hex, or a single segment in a British controlled port hex, and therefore can't be targeted, **deduct 1 VP from your score**, and then treat this as a '**C**' result.

Time Lapse: Remove segments **farthest** from the target hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the A1 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:	VP
no Hits	**0**
1 Hit	-1
2-3 Hits	-3
4-5 Hits	-6
6+ Hits	-10

(total all Hits from all Convoys)

Each German **BB** or **BC** ?	VP
sunk	**5**
damaged	2
at sea at end of scenario (not a Station in a port hex or box)	**-2**

Reinf. Group B entered play?	VP
yes	**-3**
no	0

Convoy Completed?	VP
yes (each)	**3**
no	0

If **dispersed**, a Completed Convoy earns only **2 VP**.

British casualties...

Each British ship suffered:	VP		
	BB/BC	**CV**	**CA/CL**
no Hits	**0**	**0**	**0**
Damaged	-1	-2	-1
Sunk	-3	-4	-2

A1 Debriefing Table

VP	OUTCOME
10 +	***Steaming to victory!*** The Kriegsmarine is no longer an effective naval force.
7-9	***Good show.*** Churchill can look Stalin in the eye knowing Britain is doing its part.
4-6	***Strength.*** Churchill's latest radio address emphasizes the word "strength." With every plane, with every tank, with every convoy to the Soviet Union, the force arrayed against the Nazi foe grows stronger.
1-3	***Patience.*** Britain's foreign office is instructed once more to plead for Stalin's patience as the convoys trickle in. If a British ship was sunk, or 3 or more Hits scored on convoys, Churchill reminds Stalin of British sacrifice.
0 to **-3**	***Grim battles.*** If a German ship was sunk, at least Churchill can assure Stalin that the tide is shifting in the Allies' favor. If none were sunk, Churchill has no choice but to invite more help from the Americans.
-4 or less	***Losing?*** If the only Convoys that Completed in Murmansk or Archangel were dispersed, Churchill fumes at the Sea Lords. "When did it happen," he asks them. "When did audacity vacate the British Isles?" He demands a more aggressive campaign.

© 2022 GMT Games, LLC

A2: Last Battle

German player

Early Summer 1942. The war in the east has taken longer than anticipated, and the war in the west failed to knock Britain to her knees. It is vital now that the convoys supplying and reinforcing Soviet armies be intercepted and dealt with, and it is urgent that Britain's own lifeline be assailed.

Objective

Savage British Convoys wherever you find them. The Kriegsmarine has dwindled since 1939, and there is not much left. Don't squander what remains.

Set-Up

Weather: Good
Initiative: German (the player)
Map: Operations Map (game board)
Enemy: British TFs and Mines start as indicated.
RV markers: Optional.

The End

The scenario ends when the Germans have no Task Forces in play (they are sunk or Completed). It may also end as a result of the British Action Table. The scenario may end even if you have yet to make a Fueling Check.

German Ships & Reinforcements

See p. 65 for your pool of assets available in this scenario. Before taking your first action, spend VP to set-up your forces and plan reinforcements.

start with Raeder

Raeder

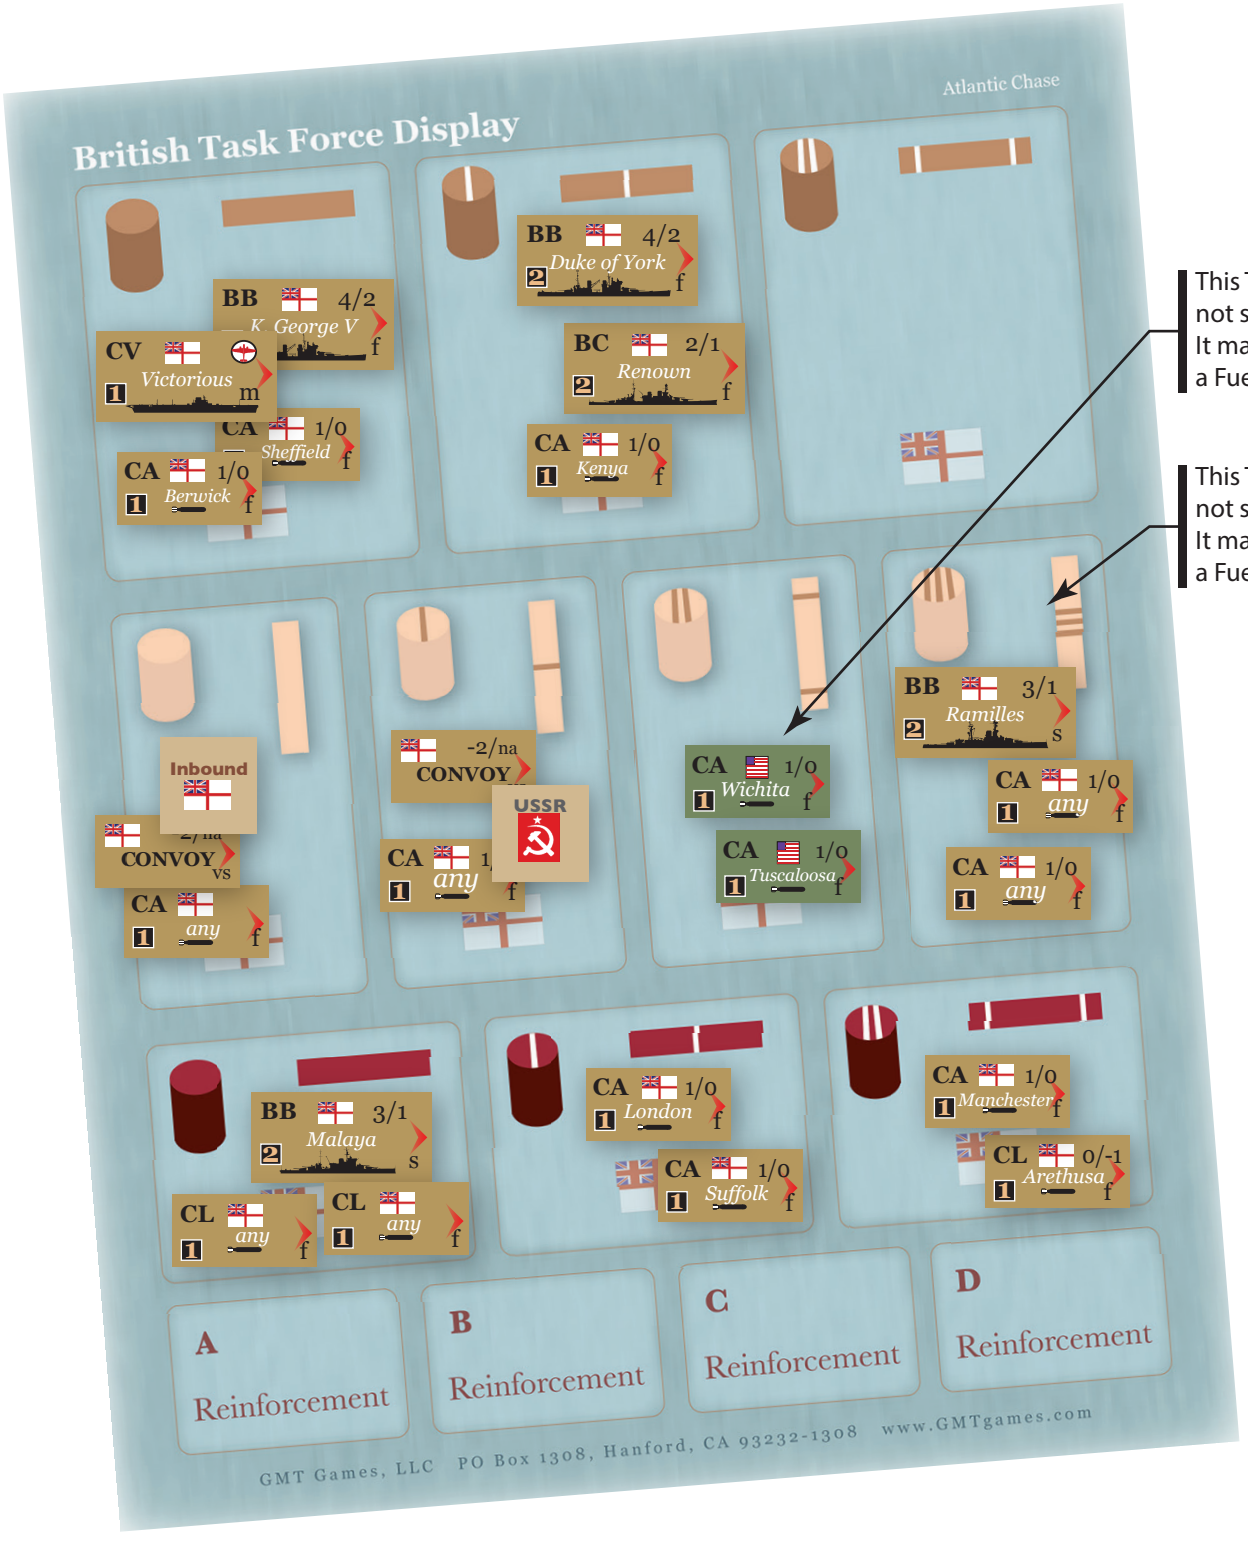

Place a U-Boat force in a hex 3 or fewer hexes from a German controlled port (but not in a space with an enemy Station, port, or airbase). If you place it in a hex with a British Trajectory segment, attach an Intel marker to the segment.

U-BOAT

USSR **Hvalfiord** to **Murmansk**
10 segments

© 2022 GMT Games, LLC

This Task Force does not set up at start. It may enter play via a Fueling Check.

This Task Force does not set up at start. It may enter play via a Fueling Check.

British Ships

Arrange the British Task Force Display as you see here. Some Task Forces may enter play as a result of the British Action Table or a Fueling Check.

Convoys

A Convoy can't be destroyed. It will only disperse during the Maneuver step of a Battle Round, and only if one or more of these conditions are true:

- it has suffered **4+** Hits;
- it is alone on the Battle Board (no other British ships);
- there is a Damaged ship in its Task Force.

© 2022 GMT Games, LLC

German Forces

You are welcome to use all of the ships shown on this page. However, each incurs a cost, to be paid in VP during Debriefing. *The Kriegsmarine was pummeled by this time in the war, as more than two years of operations wore Germany's assets to a breaking point.* Instead of starting with ships at set-up, you may put them in Reinforcement Groups, but a maximum of two Reinforcement Groups may be used in this scenario. If you don't actually successfully enter a Reinforcement Group during the scenario, you don't pay their VP cost during Debriefing. You start with two U-Boat force markers, Raeder, and one RV marker, all free of charge (see p. 63).

= *VP Cost*

Ship	start in a TF in... Kiel	Trondheim	Narvik	Brest	start in Reinforcement... A Reinforcement Kiel	B Reinforcement Brest
BB 4/2 2 Tirpitz m	-2	-3	-4	-5	-1	-5
BC 3/2 2 Scharnhorst f	-1	-2	-3	-5	-1	-2
PB 2/1 1 Lutzow m	0	-1	-2	-5	0	-5
PB 2/1 1 Scheer m	-1	-1	-1	-5	0	-5
CA 1/0 1 Pr. Eugen f	-1	-2	-3	-3	-1	-2
CA 1/0 1 Hipper f	-1	-1	-3	-3	0	-2
DD 0/na SQUADRON s	0	0	0	0	0	0

3 Hits destroys the **DD Squadron** and its Task Force may not have more than 6 segments in its Trajectory (fuel limitations)

RV

-1 each

Rendezvous Marker

The first RV marker is free (0 VP). If you want more, each costs 1 VP (-1 deduction). You may place up to four RV markers on the Operations Map at start. They may be placed in any hexes, one marker per hex, but none may be placed within 2 hexes of a British port or airbase, nor within 2 hexes of a British TF, nor adjacent to another RV marker.

Benefit: RV markers allow you to perform Fueling Checks during the scenario, which will have random consequences, some beneficial. *These markers represent secret points of rendezvous with one or more auxiliary ships. Such clandestine meetings were dangerous, since Bletchley Park had managed to crack the cipher system.*

© 2022 GMT Games, LLC

Fueling Check

When you have Initiative, if a German TF is in the same hex as a Rendezvous marker and the TF is a Station, you must roll a die and apply the result on the Fueling Table. Unless noted otherwise by the Fueling Table result, you maintain Initiative after the check.

Legend of Fueling Table Results:

a. Remove the RV marker. Remove (repair) one Hit from one undamaged German ship in the TF (if none have a Hit to repair, and is not Damaged, gain 1 VP).

New Peril: If Good Weather, place a new British TF Station (shown here) in the hex. Then, attach a Contact marker to the German TF. Then, V for I

2 CAs USA

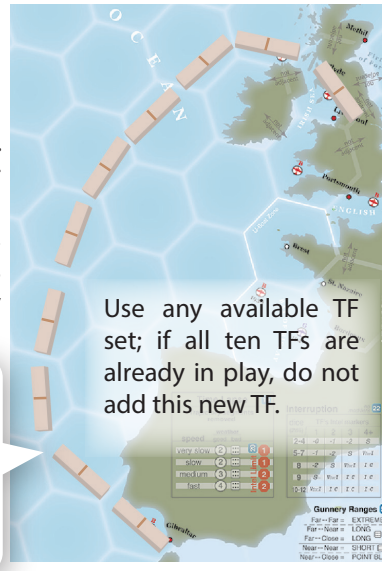

b. Remove the RV marker.

News: If there are fewer than three Convoys on the Operations Map, place a new TF as shown (place a Convoy and a CA in it).

Clyde/Liverpool to **Gibraltar**
10 segments
Convoy *and* **CA**

Gibraltar

Use any available TF set; if all ten TFs are already in play, do not add this new TF.

c. Remove the RV marker, and another RV marker of your choice (if none to remove, V for I).

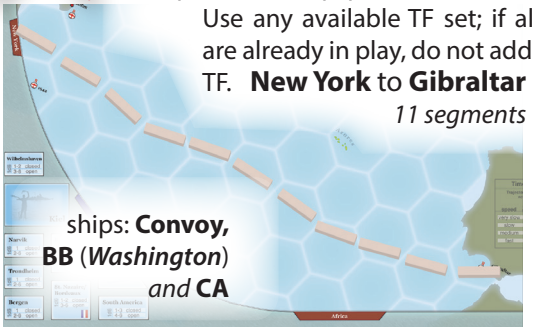

British TF in hex? If a British TF is **in** the hex, and it is a **Station**, attach a Contact marker to the German TF.

d. Remove the RV marker.

News: If there are fewer than three Convoys on the Operations Map, place a new TF as shown.

Use any available TF set; if all ten TFs are already in play, do not add this new TF. **New York** to **Gibraltar**
11 segments

Gibraltar

ships: **Convoy,** **BB** (*Washington*) *and* **CA**

Fueling Table

	1d6 →	1	2	3	4	5	6
Good	W	a.	b.	c.	d.	e.	f.
Bad	W BAD	a.	b.	d.	f.	g.	h.

The British and Americans are actively hunting German supply ships.

e. Remove the RV marker. Also remove an Evasive Maneuvers marker from the German TF (if it has one).

New Objective: The only actions this TF is permitted is Trajectory, Completion, and Pass. The TF may only Complete in Wilhelmshaven, Kiel, or St. Nazaire. You may not attach an Evasive Maneuvers marker to this TF. *The ship has developed severe mechanical problems.*

British TF in hex? If a British TF is **in** the hex, V for I

f. Remove the RV marker. Remove (repair) one Hit from one undamaged German ship in the TF (if none have a Hit to repair, and is not Damaged, gain 1 VP).

New Peril: Place a new British TF station (shown here) in the hex. Then, attach a Contact marker to the German TF. Then, V for I

1 BB
2 CAs

g. Remove the RV marker.

News: If a **BB** or **BC** is in the rendezvous hex, you earn 3 VP. If not, you earn 1VP. *British Admiralty has diverted assets from other theaters to deal with German raiders in the Atlantic.*

h. RV
move 1 hex

Shift the RV marker to an adjacent hex (your choice). Then, V for I

© 2022 GMT Games, LLC

British Actions

When the British have the Initiative, use the British Action Table to determine their actions. Roll a die and find the result in the row corresponding to the number of successful British Completion actions (count only Completion actions involving Convoys).

British Action Table

Number of successful British Convoy Completion actions	1d6 → 1	2	3	4	5	6+
0	A	A	X	C	C	C
1	A	A	X	X	C	C
2+	E	A	X	X	X	C

Modifier: **+1** if no German TFs can be intercepted (all are in Port Boxes, or they are Stations in port or airbase hexes, or their Trajectories do not extend outside of port or airbase hexes)

Legend of Action Table Results:

A

AIR STRIKE

Bad Weather: If the Weather is Bad, treat as an '**X**' result.

Good Weather: If the Weather is Good, perform an Air Strike targeting a German TF in range of a British Airbase or TF with a **CV** (select the target that will give the British the most favorable Air Support modifier).

No Target? If the Weather is Good but there is no target for an Air Strike, treat as an '**X**' British Action Table result (and a '**c.**' result on the '**X Selection Table**' on p. 68).

Time Lapse: Remove segments **farthest** from the target hex.

C

COMPLETION ACTION

Selection: First, remove all Damaged British ships. If this empties a TF, remove the TF. Then, select a British TF with a **Convoy** (if more than one, select the **shortest** Trajectory).

New Convoy? If there are **less than 2 Convoys** in play, create and select a new TF and place a **Convoy** and a **CA** in it. Roll a die and find its starting port and destination port in the New Convoy TF table:

New Convoy TF

1d6 → 1-3	4-5	6
Hvalfiord to Murmansk	St. John's to Clyde/Liverpool	Archangel to Hvalfiord

Action: Selected TF attempts to Complete in its destination port. The TF may need to perform a Trajectory action first (**direct route avoiding Intel triggers** if possible; also, it will do its best to avoid German Air Strike range if possible). If prevented from performing Completion due to Intel markers or Trajectory length, the British Pass instead (the selected TF performs Time Lapse).

Time Lapse: Remove segments **farthest** from the destination port.

After successful Completion action: IC

E

END?

Bad Weather: If the Weather is Bad, remove a **Rendezvous marker** from play. If there are none to remove, the scenario ends. If it does not end, roll a die: if EVEN, treat as an '**X**' British Action Table result; if ODD, treat as a '**C**' British Action Table result.

Good Weather: If the Weather is Good, remove a **U-Boat marker** from play. If there are none to remove, the scenario ends. If it does not end, roll a die: if EVEN, treat as an '**A**' British Action Table result; if ODD, treat as a '**C**' British Action Table result.

X

INTERCEPTION

End? If a German **BB** is sunk, or three German ships are sunk, or **four** Convoys have successfully Completed, the scenario ends. If it does not end, remove all Damaged British ships and proceed to Step 1 (if a TF is empty, remove it).

Step 1 – Select a Convoy: Select a British TF with a **Convoy** in it. If more than one can be selected, select the Convoy with the **shortest** Trajectory. Extend the selected TF's Trajectory to its destination port (if it already has a segment or Station in its destination port, select a different Convoy; if all are in their destination ports, proceed to Step 2). The Trajectory should conform to the **most direct route** while **avoiding Intel triggers**, if possible.

No Convoy? If there is no British TF in play that has a Convoy in it, treat as a '**C**' British Action Table result.

'X' INTERCEPTION is continued on p. 68

© 2022 GMT Games, LLC

INTERCEPTION (continued)

Step 2 – Select TF: Roll a die and select the TF indicated in the **X Selection Table**. If the TF is not available (*for example, you rolled a '**3**' but there are no British TF's with a BC in them*), select another TF (the **nearest** one to an eligible German TF; "eligible means it can be targeted for interception). The selected TF may not have a Convoy.

Action: The selected TF perform actions intended to **Bring to Battle** a German TF (it will not enter a hex with a German controlled port or air base).

Which German target? If there is more than one German TF that can be targeted, roll a die:

X

1-4 = select the TF with a **BB** in it;
5-6 = select the German TF **nearest** a British Convoy.

No Target? If there are no German TFs to intercept, or the only German TFs are Stations in ports or hexes with airbases (or their target Trajectories do not stretch outside of such protective hexes), treat as a '**C**' British Action Table result.

Coordination? If a Convoy is in the target hex, it serves as Coordinating Task Force (CTF). If no Convoy in the hex and the star result is garnered (★), another TF must be designated as CTF (select the **nearest** to the target hex; this CTF may not have a Convoy in it). It will take the most **direct route while avoiding intel triggers** (if Intel can't be avoided, it does not perform a Trajectory action and there is no CTF).

Time Lapse: Remove segments **farthest** from the German TF (and farthest from the target hex).

X Selection Table
no modifiers

1d6 →	1-2	3	4	5	6
	n.	**a.**	**a.★**	**b.★**	**c.**

Legend of results
("nearest" means nearest to a German TF that can be targeted for a Naval Search, Signals, or Engage action)

a. **Nearest** Task Force with a **BC**;

b. **Nearest** Task Force with a **BB**;

c. **Nearest** Task Force with a **CV**;
If the **CV** is in Air Strike range and the Weather is Good, it performs an Air Strike action instead;

n. **Nearest** Task Force with a **BB** or **BC**.

★ Indicates that if a Convoy is not already in the target hex, you must also select a second Task Force to serve as CTF. To determine which TF, roll a die:

1-3 **nearest** TF to the target hex;
4-5 TF with a **CA**, **nearest** to the target hex;
6 TF with a **BB**, **nearest** to the target hex.

Determine Outcome

When the scenario ends, use the following tables to tally Victory Points (VP). Then, refer to the A2 Debriefing Table for the outcome.

Mission objectives...

British Convoys suffered:		VP
total all Hits from all Convoys	**no Hits**	**0**
	1 Hit	2
	2-3 Hits	5
	4-5 Hits	8
	6-8 Hits	12
	9-11 Hits	15
	12+ Hits	20

Each German ship?	VP BB/BC	VP other
sunk	**-4**	**-2**
damaged	-2	-1

Ships & RV markers	VP
VP cost from p. 64	**-?**
Fueling Check VP	+?

British disposition...

Each British ship suffered:	VP BB/BC	VP CV	VP CA/CL	VP Convoy
no Hits →	**0**	**0**	**0**	**0**
Damaged (removed) →	1	0	0	0
Sunk →	**2**	**1**	0	0
Completed →	0	0	0	**-2**

A2 Debriefing Table

VP	OUTCOME
10 +	***Mighty blow!*** The Kriegsmarine makes a powerful strike against the Royal Navy. Raeder is happy to relate the full report to the Führer. Sacrifices were worth it.
5-9	***Sustained.*** The war is brutal, but the German navy struggles to maintain its important role against British convoys. If **7** or fewer Hits were scored on Convoys, reduce this Outcome one row, to "Consolation."
1-4	***Consolation.*** Was this a victory? If the Germans did not lose a **BB** or **BC** (sunk), yes. If Britain lost a **BB** or **BC**, Hitler will tell the Volk this was an astounding victory, and if a German **BB** was sunk, a costly but "astounding victory."
0 to **-4**	***Decline.*** If **7** or more Hits were scored on Convoys, improve this Outcome one row to "Consolation." If a German **BB** was sunk, reduce it one row instead to "Defeat!"
-5 or less	***Defeat!*** The Führer is in a rage, pacing. He shouts at Raeder: "I predicted this!"

Historical Notes

The war depicted by *Atlantic Chase* laid down its historical hull long before September 1939. Once the shooting started, decisions were shaped by the world of 1914. That world had been shaped by naval theorists such as Alfred Mahan, insisting on the decisive battle as a vital instrument ensuring command of the sea. Or perhaps we should dip deeper into the nineteenth century, to the beginnings of the iron-hull navy that replaced the old wooden ships of Admiral Nelson's day. One can still tread the wharves of Portsmouth and board his timber flagship, *HMS Victorious*, and then stroll a little way further along the waterside to board *HMS Warrior* and touch its iron hull. Built in 1860, powered by coal, it and her sister ships ruled Britain's far-flung colonies and trade routes. That empire, so vast in the nineteenth century and so vulnerable in the twentieth, is at the root of the war depicted in *Atlantic Chase*.

The outcome of the Great War necessitated the decimation, by political fiat, of the German navy, so when that nation rebuilt a new navy, its weaponry had advantages over Great Britain's older stock of naval assets. This was very much on the British mind in 1939. Austerity of the 1920s and early 1930s saw politicians, even Winston Churchill, insist on curtailing military spending. International negotiations that restricted the size of navies, as well as a faith in the strictures of the Versailles Treaty, and domestic distractions at home, guided political leaders in Britain. The rise of the Nazi party in Germany, however, with its insistence on rearming the nation, jolted Great Britain into refurbishing its own naval assets and embarking upon a costly program of building modern assets in the late 1930s. Meanwhile, British conservatives, such as Prime Minister Neville Chamberlain, relied on a policy of appeasement in order to buy the Royal Navy the time it needed to modernize.

The leaders of both nation's navies sketched out plans for victory. At the start of 1939, their respective political leaders assured the admirals war would not break out for several years. That was a good thing, since Germany was short on U-boats, its principal weapon against Britain's supply network, and its surface fleet did not yet have its largest capital ships (BBs). Across the water, the Royal Navy was short on destroyers and large capital ships, those new battleships that could keep pace with large and fast ships in the German, Italian, and Japanese navies, and it had not completed enough aircraft carriers either. Its assets would be spread thin (there would be times when its base in Singapore would command the sea more by threat and reputation than by the actual presence of capital ships). A new war in Europe would demand the concentration of assets in the North Sea, the first line of defense against the new Reichsmarine, rechristened in 1935 the "Kriegsmarine," a name signalling the new Germany's martial ambitions.

The year 1939 did not go as planned. Adolf Hitler misjudged Britain's resolve to resist German expansion, while Chamberlain exaggerated the Nazi leader's willingness to avert a hostile war. That war arrived in September, several years early. Not surprisingly, the opening moves by both navies were defensive in character while their leadership pulled out old lessons.

Along the German and British coasts of the North Sea, mines were once again laid down by both nations as they had been twenty years earlier. This time air assets were often employed for this task, especially by Britain, and both sides toyed with the prospect of using the mine as an offensive weapon. Magnetic mines were laid down on the British coast, in the mouth of the Humber and near Methil, by German boats and U-boats, while British submarines and aircraft targeted stretches of coast near Jutland, Texel, and Wilhelmshaven. Plans were sketched for aerial raids along the Rhine in order to install mines on that vital shipping lane.

Meanwhile, the Kriegsmarine sent out small and medium sized surface raiders, initiating war on Britain's imperial network. The smaller ships could be disguised, such as the *Widder* and the *Altmark*, while the larger *panzerschiff,* the "pocket battleships," pushed across the North Sea before the blockade could be tightened, hunting for merchant traffic. The cruise of the *Graf Spee* in the South Atlantic seemed to replay the first war too, as it hunted down one merchant vessel after another before Great Britain could organize a reliable system of convoy traffic. Although the *Graf Spee* would meet its end at the hands of a Royal Navy cruiser squadron, it exposed Great Britain's vulnerability. The airplane also inspired caution among the high commands of both navies, dissuading the Royal Navy from dispatching a squadron of capital ships into the Baltic to assist beleaguered Poland.

Soon the new war would diverge dramatically from the old. In 1940, political machinations over access to Norway's inner leads would give way to all-out war in the Norwegian Sea. Although iron ore from Sweden could be delivered much of the year through the Baltic Sea, for half the year it could only reach German industry by railroad to Narvik, and then south along the vulnerable coast. As the Wehrmacht shifted its force from its Polish conquest to the western frontier of Belgium and France, Norway slowly found itself dragged into the war despite its assertion of neutrality. While the First Lord of the Admiralty, Winston Churchill, insisted on laying mines along Norway's neutral coast, Grand Admiral Raeder and Admiral Donitz, commander of the U-boat force, made persuasive arguments to the Fuhrer about the value of Norway as a naval harbor. Its merchant raiders had already been plying its fiords as a route around the Royal Navy's blockade, and with Britain's threat to sever Sweden's iron ore supply by invasion, a pre-emptive adventure in Norway seemed urgent.

By June 1940, Great Britain would find itself evacuating troops from Narvik in the north and Dunkirk in the south. By

© 2022 GMT Games, LLC

July, the Kriegsmarine not only had access to Norwegian ports, it also could harbor in French ports on the Bay of Biscay. The old strategy of bottling the German navy in the North Sea had been overturned. The debacle in Norway forced Chamberlain to step aside for a more hawkish leader, and before Churchill had moved into 10 Downing Street he would be receiving his French counterpart's dispatch that the French army was broken. By August, the Luftwaffe would begin an aerial campaign against Great Britain, not across the North Sea as anticipated by pre-war planners, but from French airfields across the much shorter distance of the English Channel. Meanwhile, in the Mediterranean Sea, Italy would take advantage of its ally's success and invade Britain's Egyptian colony, threatening the Suez Canal, a vital road to Asia. Royal Navy assets would be spread thin between the North Atlantic, the Mediterranean, and Asian waters.

After the fall of Norway and France, the Kriegsmarine took time to shift assets to new ports. The blockade stretched north to Iceland and the Denmark Strait, as the Royal Navy strove to keep German surface raiders, especially the new battlecruisers, from gaining access to the ports on the Bay of Biscay. It could do little to prevent U-boats from basing there, and the latter months of 1940 proved deadly for Britain's merchant fleet in the North Atlantic.

In 1941, surface assets would be shifted to French ports as well, but Raeder insisted on a finesse strategy minimizing risk. In March, *Operation Berlin* demonstrated the blockade's vulnerability, as the *Scharnhorst* and *Gneisenau* operated for several weeks in the North Atlantic, refueling at sea, and hunting merchant ships until slipping into their new French base in Brittany. That was supposed to be only the first move of a larger naval campaign. The *Bismarck*, an even more lethal battleship, was soon ready to leave the safety of the Baltic and follow the trail to Brittany, accompanied by the *Prinz Eugen*, a heavy cruiser. It rounded the Kattegat in May and was spotted by Swedish and Norwegian agents. By the time Admiral Lutjens' squadron made its way into Norwegian fiords near Bergen, camera-equipped long-range Spitfires were searching the coastline for them. Admiral Tovey, in command of the Home Fleet and responsible for maintaining the blockade, sent assets in motion. Anticipating a route north along the coast and then a turn west into the foggy Denmark Strait, he hoped to intercept Lutjens in the north-western mouth to the Atlantic. Meanwhile, convoys had already been assigned battleship escort, quite a burden of assets, and several convoys were now ordered to return to port or delay embarkation until the crisis was resolved.

Cruisers in the Denmark Strait spotted the German squadron using the war's new technology, radar. The *Bismarck* was "sighted" and yet unseen, except for a brief moment when the British cruiser herself was detected by Lutjens, and the *Bismarck* turned about to confront her. Shadowed through the strait, the *Bismarck* would confront Tovey's big guns, *HMS Prince of Wales* and *HMS Hood*, on the morning of May 24. The battle lasted an hour, and in the first fifteen minutes ordnance from the *Bismarck's* guns penetrated the *Hood's* decks and her magazine under the turret, and she went down. The *Prince of Wales* had mistaken the German cruiser for a battleship, and although the *Bismarck* had been hit effectively, the surviving British battleship withdrew. The chase was on for the next three days as Lutjens strove to elude pursuing cruisers, aircraft from British carriers, and an increasing array of British battleships. Leaking oil, the *Bismarck* headed for France and nearly made it, after enduring several brief encounters with British sea and air assets, but was ultimately sunk just out of Luftwaffe range from Brittany.

The two German battlecruisers already in French ports were still refitting from their own voyage through the blockade, and had been harassed effectively in port by British air assets. Had the *Bismarck* joined those two vessels, reinforced by the heavy cruiser, that new squadron of five ships would have been an impressive force in the North Atlantic. Reinforced later in the year by the second German battleship, the *Tirpitz*, would Raeder have traded finesse for a sledgehammer? Assuming the Kriegsmarine could maintain a viable force in French ports, there are tantalizing possibilities to consider. *Operation Torch*, the allied invasion of North Africa, looks very different, for example. At the end of 1942, the United States' route to Morocco could have been contested by German naval assets based in the Bay of Biscay, or delayed until those threats were dealt with.

By the end of 1941, Germany's assets would shift dramatically east. The campaign in the Baltic States, Russia, and the Ukraine would gobble men and materiel to such an extent that all other theaters in Europe would become secondary to the invasion of the Soviet state. By February the next year, even the battlecruisers and the *Prinz Eugen* in Brittany would be shifted to Norway, where they could interfere with or at least threaten the supply line connecting the Soviet Union to her new unlikely allies, Great Britain and the United States. This shift would make Admiral Tovey's job easier, relieving pressure from the blockade and allowing the war in the Atlantic to be one fought by destroyer and airplane rather than cruiser and battleship. Soon Britain's Admiralty would send naval assets to Asia to shore up the war it was losing against Imperial Japan. Tovey would concentrate his own resources on the Norwegian Sea and the supply route to Murmansk. The naval war on the surface would leave the North Atlantic for that sea, and soon, the weight of American assets and the strain on Germany's naval and air assets, would render the Nazi state incapable of contesting the Royal Navy, except under the water. The *Scharnhorst's* sinking in early 1943 would be the final blow to the mighty Kriegsmarine's surface arm. Admiral Donitz and his dwindling fleet of U-boats would labor on, but the Kriegsmarine was fighting a losing battle.

© 2022 GMT Games, LLC

Terminology examples

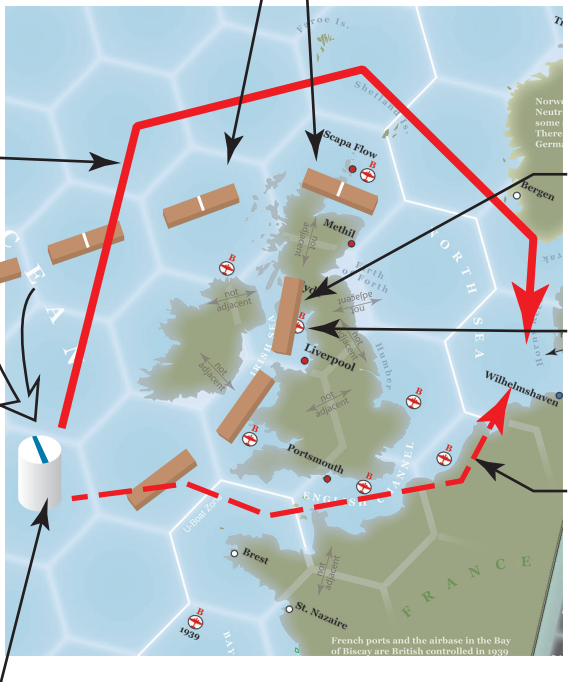

LONGEST This British TF is the longest.

IN This British TF is "in" Scapa Flow's hex. It is also NEAREST to Scapa Flow.

AVOID INTEL TRIGGER
For the German TF, this route is the most direct to Wilhelmshaven while also avoiding Intel triggers (enemy ports, Stations, and air bases).

FARTHEST
For this British TF, this end of the Trajectory is farthest from Scapa Flow.

BRING TO BATTLE
For this British TF, to bring the German TF to Battle, it would need to perform a Trajectory action (adding two segments and triggering Intel attachment in the station's hex), and then an Engage action (after Interruption).

NEAREST
This British TF is nearest the German TF, and to Clyde.

SHORTEST
This TF is the shortest British Trajectory.

DIRECT
For the German TF, this route is the most direct to Wilhelmshaven (but includes Intel triggers).

UNIDENTIFIED
If the German TF is not identified, it has no ships in its box on the Task Force Display. Until identified, it is **very slow**.

Slip

When the imaginary player garners an '**S**' (Slip) result during Interruption, you are welcome to make the decision yourself. If you prefer randomness (or maybe you don't trust yourself to make an honest choice for the imaginary player), roll a die:

1d6	*non-player response*
1-4	Signals action
5-6	Evasive Maneuvers

Evasive Maneuvers

When the imaginary opponent has the choice between attempting to Seize Initiative or take an Evasive Maneuvers marker, make the decision by rolling a die: If **1-4**, it attempts to Seize Initiative, and if **5-6** it takes the Evasive Maneuvers marker (attach it to a TF with a Convoy, or if no Convoy in play, to a TF with a Damaged ship; and if none of those are in play, on any TF). If all TFs already have an Evasive Maneuvers marker, it attempts to Seize Initiative.

When to use an Evasive Maneuvers Marker? As soon as possible. If the imaginary player has the option to use it, it does so.
